

CION Ares Diversified Credit Fund

Looking beyond traditional
bonds for income

Disclosure

This is neither an offer to sell nor a solicitation to purchase the securities described herein. An offering is made only by the prospectus which must precede or accompany this presentation. Please read the prospectus prior to making any investment decisions and consider the risks, charges, and expenses and other information described therein. Additional copies of the prospectus may be obtained by contacting CION Securities at 800.435.5697 or by visiting cioninvestments.com.

Risks and limitations include, but are not limited to, the following: investment instruments may be susceptible to economic downturns; most of the underlying credit instruments are rated below investment grade and considered speculative; there is no guarantee all shares can be repurchased; the Fund's business and operations may be impacted by fluctuations in the capital markets; the Fund is a diversified, closed-end investment company with limited operating history; diversification does not eliminate the risk of investment losses.

Please be aware that the Fund, the Advisers, the Distributor or the Wholesale Marketing Agent and their respective officers, directors, employees and affiliates do not undertake to provide impartial investment advice or to give advice in a Fiduciary capacity in connection with the Fund's public offering of shares to retail investors.

CION Securities, LLC (CSL) is the wholesale marketing agent for CION Ares Diversified Credit Fund, advised by CION Ares Management, LLC (CAM) and distributed by ALPS Distributors, Inc (ADI). CSL, member FINRA, and CAM are not affiliated with ADI, member FINRA.

Risks

An investment in shares of the Fund's common stock involves a high degree of risk and considered speculative. Potential investors should carefully consider the risk factors described in the prospectus before deciding to invest. An investment in the Fund is subject to, among others, the following risks:

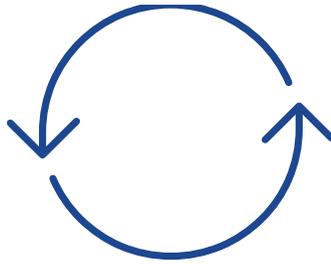

- There is not expected to be any secondary trading market in the Shares.
- Unlike an investor in most closed-end funds, Shareholders should not expect to be able to sell their Shares regardless of how the Fund performs. An investment in the Fund is considered illiquid.
- If a Shareholder is able to sell its Shares outside the quarterly repurchase process, the Shareholder likely will receive less than their purchase price and the then current NAV per Share.
- An investor may pay a sales load of up to 5.75% depending on the share class.
- Unlike most closed-end funds, the Shares are not listed on any securities exchange. The Fund intends to provide liquidity through quarterly offers to repurchase a limited amount of the Fund's Shares (at least 5%).
- There is no assurance that monthly distributions paid by the Fund will be maintained at the targeted level or that dividends will be paid at all.
- The Fund's distributions may be funded from unlimited amounts of offering proceeds or borrowings, which may constitute a return of capital and reduce the amount of capital available to the Fund for investment. Any capital returned to Shareholders through distributions will be distributed after payment of fees and expenses.

Risks (continued)

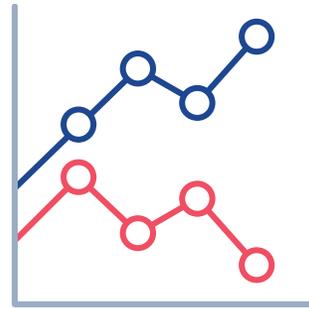

- A return of capital to Shareholders is a return of a portion of their original investment in the Fund, thereby reducing the tax basis of their investment. As a result from such reduction in tax basis, Shareholders may be subject to tax in connection with the sale of Fund Shares, even if such Shares are sold at a loss relative to the Shareholder's original investment.
- The Fund's distributions may result from expense reimbursements from CION Ares Management, LLC (CAM or the Advisor), which are subject to repayment by the Fund. Shareholders should understand that any such distributions are not based on the Fund's investment performance, and can only be sustained if the Fund achieves positive investment performance in future periods and/or CAM continues to make such expense reimbursements. Shareholders should also understand that the Fund's future repayments will reduce the distributions that a Shareholder would otherwise receive.

Most of the credit instruments in which the Fund invests will be rated below investment grade by rating agencies or would be rated below investment grade if they were rated. Credit instruments that are rated below investment grade (commonly referred to as "high yield" securities or "junk bonds") are regarded as having predominantly speculative characteristics with respect to the issuer's capacity to pay interest and repay principal. Because of the risks associated with investing in high yield securities, an investment in the Fund should be considered speculative. Some of the credit instruments will have no credit rating at all.

The Role of Income Investments

⁴ IG corporate bonds represented by Bloomberg Barclays US Corporate Index (LUACTRUU) as of December 31st of each year noted. 2019 data as of December 31, 2019.

⁵ Certificates of deposit represented by the CD 12M Index as of February 19th of each year noted. 2019 data as of February 19, 2020.

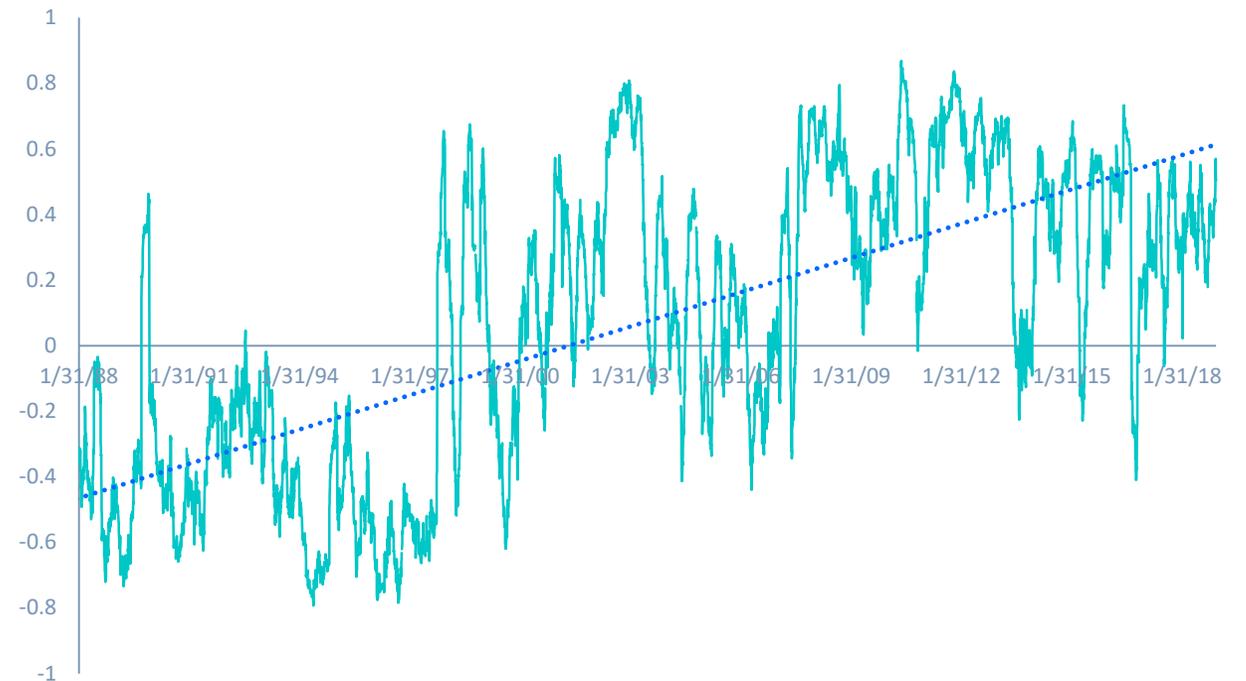

Bonds and Treasuries are Not Negatively Correlated as They Once Were

One of the major functions of income investments is to mitigate downside risk from the volatility in traded equity markets. As debt markets become increasingly positively correlated with equities, the stabilizing effect of diversification is greatly diminished.

“The notion that fixed income offers a refuge from stormy equity markets is a ‘slippery concept,’ given the number of times the correlation has flipped over the years.”

– Andy Sparks, MSCI’s Head of Portfolio Management Research

Traditional Retail Alternative Products Aren't Measuring Up

Barriers to Entry

Older generation alternatives limit participation to accredited investors and require large investment minimums (\$100,000-1,000,000)

Lack of Transparency

Traditional alternatives tend to provide irregular updates on performance, minimal information on underlying asset holdings, a lack of uniform reporting standard

Narrow Strategies

Many alternative managers and strategies have a singular focus, lacking the flexibility to adjust the investment approach as the market ebbs and flows while typically using aggressive leverage to deliver returns

Total Illiquidity

Older generation alternatives are subject to a lock-up period of typically 5-7 years and liquidity/exit events are uncertain

How can you adapt your
income strategy for
today's environment?

CION Ares Diversified Credit

FOCUS

CADC is focused on **harnessing the power of Ares' global credit platform** by **dynamically allocating** across the full breadth of **liquid and illiquid credit** assets in the U.S. and Europe

FLEXIBILITY

The fund's **strategy** seeks to maneuver **flexibly** to capitalize on market inefficiencies and **relative value** opportunities

FIT

The fund is designed to be a **core** product for the **income** side of a portfolio. By making use of a wide range of **credit assets**, the fund's objective is to provide superior risk adjusted returns across various market cycles by investing in a diversified portfolio of liquid and illiquid asset classes

A Familiar Structure, Evolved

	LISTED CLOSED-END FUND	INTERVAL FUND	OPEN-ENDED MUTUAL FUND
Offering	One Time via IPO	Continuous	Continuous
Liquidity	Exchange Traded	Periodic Repurchase	Daily redemption
Pricing	Market	NAV	NAV
Valuation	Daily	Daily	Daily
Maximum Allowed Illiquid Assets	No Limit	No Limit ¹	15%
Taxed	Form 1099	Form 1099	Form 1099

¹ Must have liquid assets to cover repurchase offers, otherwise no limit.

The Manager for the Mandate

To execute on a **diversified credit** strategy CION sought out a manager with **experience** across the breadth of liquid and **illiquid credit** assets and a track record of **performance**.

CION Ares Management – A Joint Venture

Solutions-Based Alternative Investments

CION provides investors with direct access to solutions-based credit focused alternative investments that are not readily available through traditional investment managers. Our alternative investments platform offers differentiated product solutions, experienced portfolio management, and investments targeting underserved markets — features that are not easily replicated or commoditized.

With a foundation built on more than 30 years of credit investing, CION is an expert in originating, underwriting, managing and distributing credit strategies.

A Global Leader in Alternative Investments

Ares Management Corporation (NYSE: ARES) is a leading global alternative investment manager operating three integrated businesses across Credit, Private Equity and Real Estate. Ares Management’s investment groups collaborate to deliver innovative investment solutions and consistent and attractive investment returns for fund investors throughout market cycles. Ares Management’s global platform had \$149 billion of assets under management as of December 31, 2019 with over 1,200 employees in over 20 offices in more than 10 countries. Please visit www.aresmgmt.com for additional information.

The Strategy & Portfolio

Rationale for Diversified Credit

1	DOWNSIDE MANAGEMENT	Portfolio consists predominantly of floating rate, senior secured loans underwritten by professionals across the Ares Credit Group
2	YIELD PREMIUM	Seeks enhanced yield due to the premium associated with less liquid assets
3	FLEXIBILITY	Managers identify and dynamically allocate to what they believe are the best relative value opportunities in credit
4	LOW CORRELATION	Asset classes have become increasingly more correlated over time, making diversification less effective against short-term market volatility
5	DIVERSIFICATION	Well-diversified portfolio across credit strategies and issuer concentration levels seeks to provide optimal risk-return profile

Note: Diversification does not assure profit or protect against market loss.

Current Portfolio Snapshot (as of 1/31/2020)

Characteristics

Number of Issuers 379

Top Ten Issuers 11.5%

Distribution Rate* 5.37%

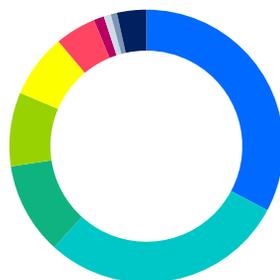

Floating Rate Assets 94.5%

Annualized Return
Since Inception 7/12/2017
(I Share) 7.22%

Standard Deviation (I Share) 2.52%

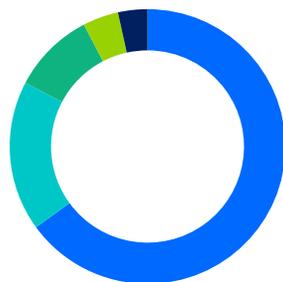

Sharpe Ratio (I Share) 2.03

Allocation By Asset Type

U.S. Direct Lending	35.2%	High Yield Bonds	5.2%
Syndicated Loans	31.1%	Private Asset-Backed	1.3%
European Direct Lending	11.7%	Opportunistic	0.9%
CLO Debt	9.4%	RE Debt	0.8%
CLO Equity	8.1%	Cash	-3.7%

Allocation By Geography

United States	69.8%	Australia	0.0%
Broader North America	19.0%	Broader Asia	0.0%
United Kingdom	10.4%	Other	0.0%
Broader Europe	4.5%	Cash	-3.7%

Note: Portfolio characteristics of CADC are as of January 31, 2020 and are subject to change. Returns include reinvestment of distributions and reflect fund expenses inclusive of recoupment of previously provided expense support. The estimated net expense ratio, which includes expense support recoupment, is 3.61%. The estimated gross expense ratio, which excludes expense support recoupment, is 3.10%. Expense ratios are annualized and calculated as a percentage of estimated average net assets. Share values will fluctuate, therefore if repurchased, they may be worth more or less than their original cost. Past performance is not indicative of future results. Additional details can be found in Offering Profile located in the Appendix.

*Based on a Current NAV of \$25.94 as of 1/31/2020. Distribution rate is expressed as a percentage equal to the projected annualized distribution amount (which is calculated by annualizing the current daily cash distribution per share without compounding), divided by the relevant net asset value per share. See slide 28 for additional information.

Why the CION Ares Diversified Credit Fund?

FIXED INCOME YIELDS ARE COMPRESSED

Traditional fixed income investments yield has been in decline for decades

ILLIQUIDITY CAN BE A POWERFUL TOOL

Illiquid credit assets can provide enhanced yield in exchange for daily liquidity

CAM OFFERS EXPERIENCED MANAGEMENT

CAM gives individual investors direct access to the Ares credit platform for the first time

A DIVERSIFIED STRATEGY BRINGS FLEXIBILITY

Dynamically managed to seek relative value opportunities and superior risk-adjusted returns

FUND OBJECTIVE

To provide superior risk adjusted returns across various market cycles by investing in a diversified portfolio of liquid and illiquid asset classes. The Fund seeks to achieve this objective by capitalizing on market inefficiencies and relative value opportunities throughout the entire global credit spectrum.

INVESTMENT STRATEGY

The Fund invests primarily in a portfolio of directly originated loans, secured floating and fixed rate syndicated loans, corporate bonds, asset-backed securities, commercial real estate loans and other types of credit instruments.

¹ Subject to a 1.00% contingent deferred sales charge if redeemed during the first 365 days after purchase.

² Subject to a shareholder servicing fee of up to 0.25% per year.

³ Subject to a 0.75% (Class C) or 0.25% (Class L) annual distribution fee.

⁴ Subject to management fees and other expenses.

Glossary of Terms

Duration - is a measure of the degree of likely change in value if interest rates were to rise or fall. The higher the number, the higher the sensitivity to changes in interest rates.

Floating Rate Asset - refers to any type of debt instrument, such as a loan, bond, mortgage, or credit, that does not have a fixed rate of interest over the life of the instrument.

Standard Deviation – a widely used measure of an investment’s performance volatility. Standard deviation shows how much variation from the mean exists with a larger number indicating the data points are more spread out over a larger range of values.

Sharpe Ratio – a risk adjusted measure that measures reward per unit of risk. The higher the Sharpe Ratio, the better. The numerator is the difference between a portfolio’s return and the return of a risk-free instrument. The denominator is the portfolio’s standard deviation.

Collateralized Loan Obligations (CLOs) - a form of securitization where payments from multiple middle sized and large business loans are pooled together and passed on to different classes of owners in various tranches. A CLO is a type of collateralized debt obligation.

Bank of America Merrill Lynch US High Yield Total Return Index - the index tracks the performance of below-investment-grade U.S. dollar-denominated corporate bonds publicly issued in the U.S. domestic market.

Barclays Capital US Aggregate Bond Index - the index measures the performance of the U.S. investment grade bond market. The index invests in a wide spectrum of public, investment-grade, taxable, fixed income securities in the United States – including government, corporate, and international dollar-denominated bonds, as well as mortgage-backed and asset-backed securities, all with maturities of more than 1 year.

Credit Suisse Leveraged Loan Index - the index represents tradable, senior-secured, U.S.-dollar-denominated non-investment-grade loans.

Endnotes to Slide 19: Distribution Rate

A portion of distributions may be a direct result of expense support payments provided by CION Ares Management, LLC (CAM), which are subject to repayment by CADC within three years. The purpose of this arrangement is to ensure that CADC bears an appropriate level of expenses. Any such distributions may not be entirely based on investment performance and can only be sustained if positive investment performance is achieved in future periods and/or CAM continues to make such expense support payments. Future repayments will reduce cash otherwise potentially available for distributions. There can be no assurance that such performance will be achieved in order to sustain these distributions. CAM has no obligation to provide expense support payments in future periods.

CADC may fund distributions from unlimited amounts of offering proceeds or borrowings, which may constitute a return of capital, as well as net income from operations, capital and non-capital gains from the sale of assets, dividends or distributions from equity investments and expense support payments from CAM, which are subject to repayment. For the year ending December 31, 2019, distributions were paid from taxable income and did not include a return of capital for tax purposes. It is not anticipated that the current distribution rate will contain a return of capital. If expense support payments from CAM were not provided, some or all of the distributions may have been a return of capital which would reduce the available capital for investment. The sources of distributions may vary periodically. Please refer to the semi-annual or annual reports filed with the SEC for the sources of distributions.
