

April 30, 2021

**CION ARES DIVERSIFIED CREDIT FUND
CLASS I SHARES (CADUX) OF BENEFICIAL INTEREST**

CION Ares Diversified Credit Fund (the “Fund”) is a Delaware statutory trust that is registered under the Investment Company Act of 1940, as amended (the “1940 Act”), as a diversified, closed-end management investment company.

Investment Objective. The Fund’s investment objective is to provide superior risk-adjusted returns across various market cycles by investing in a diversified portfolio of liquid and illiquid asset classes. The Fund seeks to capitalize on market inefficiencies and relative value opportunities throughout the entire global credit spectrum. There can be no assurance that the Fund will achieve its investment objective.

Interval Fund. The Fund is designed primarily for long-term investors and not as a trading vehicle. The Fund is an “interval fund” (defined below) pursuant to which it, subject to applicable law, will conduct quarterly repurchase offers for between 5% and 25% of the Fund’s outstanding shares of beneficial interest (“Shares”) at net asset value (“NAV”). In connection with any given repurchase offer, it is expected that the Fund will offer to repurchase only the minimum amount of 5% of its outstanding Shares. It is also possible that a repurchase offer may be oversubscribed, with the result that shareholders may only be able to have a portion of their Shares repurchased. The Fund does not currently intend to list its Shares for trading on any national securities exchange. The Shares are, therefore, not readily marketable. Even though the Fund will make quarterly repurchase offers to repurchase a portion of the Shares to try to provide liquidity to shareholders, you should consider the Shares to be illiquid.

Principal Investment Strategies. The Fund will invest primarily in a portfolio of directly originated loans, secured floating and fixed rate syndicated loans, corporate bonds, asset-backed securities, commercial real estate loans and other types of credit instruments, which, under normal circumstances, will represent at least 80% of the Fund’s Managed Assets (as defined in this prospectus). For purposes of this policy, “credit instruments” may include commercial real estate mezzanine loans, real estate mortgages, distressed securities, notes, bills, debentures, bank loans, convertible and preferred securities, government and municipal obligations. The Fund may also invest in foreign instruments and illiquid and restricted securities. **Most of the credit instruments in which the Fund invests will be rated below investment grade by rating agencies or would be rated below investment grade if they were rated. Credit instruments that are rated below investment grade (commonly referred to as “high yield” securities or “junk bonds”) are regarded as having predominantly speculative characteristics with respect to the issuer’s capacity to pay interest and repay principal. Because of the risks associated with investing in high yield securities, an investment in the Fund should be considered speculative. Some of the credit instruments will have no credit rating at all.**

Unlisted Closed-End Fund. An investment in the Fund is subject to, among others, the following risks:

- **There is not expected to be any secondary trading market in the Shares.**
- **Unlike an investor in most closed-end funds, Shareholders should not expect to be able to sell their Shares regardless of how the Fund performs. An investment in the Fund is considered illiquid.**
- **If a Shareholder is able to sell its Shares outside the quarterly repurchase process, the Shareholder likely will receive less than their purchase price and the then current NAV per Share.**
- **Unlike most closed-end funds, the Shares are not listed on any securities exchange. The Fund intends to provide liquidity through quarterly offers to repurchase a limited amount of the Fund’s Shares (at least 5%).**
- **There is no assurance that monthly distributions paid by the Fund will be maintained at the targeted level or that dividends will be paid at all.**
- **The Fund’s distributions may be funded from unlimited amounts of offering proceeds or borrowings, which may constitute a return of capital and reduce the amount of capital available to the Fund for investment. Any capital returned to Shareholders through distributions will be distributed after payment of fees and expenses.**
- **A return of capital to Shareholders is a return of a portion of their original investment in the Fund, thereby reducing the tax basis of their investment. As a result from such reduction in tax basis, Shareholders may be subject to tax in connection with the sale of Fund Shares, even if such Shares are sold at a loss relative to the Shareholder’s original investment.**
- **The Fund’s distributions may result from expense reimbursements from CION Ares Management, LLC (“CAM” or the “Advisor”), which are subject to repayment by the Fund. Shareholders should understand that any such distributions are not based on the Fund’s investment performance, and can only be sustained if the Fund achieves positive investment performance in future periods and/or CAM continues to make such expense reimbursements. Shareholders should also understand that the Fund’s future repayments will reduce the distributions that a Shareholder would otherwise receive.**

Investing in Shares involves a high degree of risk. See “Types of Investments and Related Risks” beginning on page 34 of this prospectus.

The date of this prospectus is April 30, 2021.

	Per Share ⁽¹⁾	Total ⁽¹⁾
Public Offering Price	Current NAV	\$2,020,000,000
Sales Load ⁽¹⁾	\$—	\$ —
	\$ amount invested	
Proceeds to Fund Before Expenses ⁽²⁾	at current NAV	\$2,020,000,000

- (1) Generally, the stated minimum initial investment by an investor in the Fund for Class I Shares is \$1,000,000, which stated minimum may be reduced for certain investors pursuant to the purchase terms (“Purchase Terms”) in the Fund’s plan of distribution (the “Plan of Distribution”). Class I Shares are not subject to a sales load. The Fund is offering on a continuous basis up to 80,000,000 Shares, including Class I Shares, through July 31, 2021. Effective August 1, 2021, the Fund will offer an unlimited number of shares of beneficial interest.
- (2) Assumes all amounts currently registered are sold in the continuous offering. Pursuant to an amended and restated expense support and conditional reimbursement agreement (the “Expense Support and Conditional Reimbursement Agreement”) between the Fund and the Advisor, the Fund will be obligated to reimburse the Advisor for any such payments. See “Fund Expenses.”

Structure. The Fund does not currently intend to list its Shares for trading on any securities exchange and does not expect any secondary market to develop for its Shares. Shareholders of the Fund are not able to have their Shares redeemed or otherwise sell their Shares on a daily basis because the Fund is an unlisted closed-end fund. To provide some liquidity to Shareholders, the Fund is structured as an “interval fund” and conducts periodic repurchase offers for a portion of its outstanding Shares, as described below. An investment in the Fund is suitable only for long-term investors who can bear the risks associated with the limited liquidity of the Shares.

Investment Advisor and Sub-Advisor. The investment advisor to the Fund is CAM, a joint venture between affiliates of Ares Management Corporation (“Ares”) and CION Investment Group, LLC (“CION”), that is registered as an investment advisor with the U.S. Securities and Exchange Commission (the “SEC”) under the Investment Advisers Act of 1940, as amended (the “Advisers Act”). The investment sub-advisor to the Fund is Ares Capital Management II LLC (“Ares Capital” or the “Sub-Advisor” and collectively with the Advisor, the “Advisors”), an investment advisor registered with the SEC under the Advisers Act. CAM oversees the management of the Fund’s activities and is responsible for making investment decisions for the Fund’s portfolio with recommendations and support from Ares Capital.

Securities Offered. The Fund is offering on a continuous basis up to 80,000,000 Shares, including Class I Shares, through July 31, 2021. Effective August 1, 2021, the Fund will offer an unlimited number of shares of beneficial interest. . Class I Shares are not subject to a sales load. Class I Shares are offered by this prospectus. The Fund offers Class A Shares, Class C Shares, Class L Shares, Class U Shares, Class U-2 Shares and Class W Shares through different prospectuses. The minimum initial investment by a shareholder for Class I Shares is \$1,000,000, while subsequent investments may be made in any amount. The Fund reserves the right to waive the investment minimum. Class I Shares are being offered through ALPS Distributors, Inc. (the “Distributor”) at an offering price equal to the Fund’s then current NAV per Share.

This prospectus concisely provides the information that a prospective investor should know about the Fund before investing. Investors are advised to read this prospectus carefully and to retain it for future reference. Additional information about the Fund, including a statement of additional information, dated April 30, 2021 (the “Statement of Additional Information”), has been filed with the SEC and is incorporated by reference in its entirety into this prospectus. The Statement of Additional Information and, when available, the Fund’s annual and semi-annual reports and other information filed with the SEC, can be obtained upon request and without charge by writing to the Fund at CION Securities, LLC, 3 Park Avenue, New York, NY 10016 or by calling toll-free 888-729-4266. Investors may request the Fund’s Statement of Additional Information, annual and semi-annual reports when available and other information about the Fund or make Shareholder inquiries by calling 888-729-4266 or by visiting www.cioninvestments.com. In addition, the contact information provided above may be used to request additional information about the Fund and to make Shareholder inquiries. The Statement of Additional Information, other material incorporated by reference into this prospectus and other information about the Fund is also available on the SEC’s website at <http://www.sec.gov>. The address of the SEC’s website is provided solely for the information of prospective investors and is not intended to be an active link.

The Fund and the Advisors have obtained exemptive relief to, among other things, (i) designate multiple classes of Shares; and (ii) impose class specific annual asset-based distribution fees on the assets of the various classes of Shares to be used to pay for expenses incurred in fostering the distribution of the Shares of the particular class.

Shares are not deposits or obligations of, and are not guaranteed or endorsed by, any bank or other insured depository institution, and Shares are not insured by the Federal Deposit Insurance Corporation, the Board of Governors of the Federal Reserve System or any other government agency.

Neither the SEC nor any state securities commission has approved or disapproved these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

SUMMARY OF TERMS

This is only a summary and does not contain all of the information that a prospective investor should consider before investing in the Fund. Before investing, a prospective investor in the Fund should carefully read the more detailed information appearing elsewhere in this prospectus and the Statement of Additional Information.

THE FUND The Fund is a Delaware statutory trust that is registered under the 1940 Act as a diversified, closed-end management investment company. The Fund is operated as an “interval fund” (as defined below).

THE ADVISOR CAM serves as the Fund’s investment advisor. CAM is registered as an investment advisor with the SEC under the Advisers Act.

CAM is a joint venture between affiliates of Ares and CION and is controlled by Ares.

THE SUB-ADVISOR Ares Capital serves as the Fund’s investment sub-advisor. Ares Capital is registered as an investment advisor with the SEC under the Advisers Act.

CAM and Ares Capital are collectively referred to as the Advisors. CAM oversees the management of the Fund’s activities and is responsible for making investment decisions for the Fund’s portfolio with recommendations and support from Ares Capital.

INVESTMENT OBJECTIVE The Fund’s investment objective is to provide superior risk-adjusted returns across various market cycles by investing in a diversified portfolio of liquid and illiquid asset classes. The Fund seeks to capitalize on market inefficiencies and relative value opportunities throughout the entire global credit spectrum. There can be no assurance that the Fund will achieve its investment objective.

INVESTMENT OPPORTUNITIES
AND STRATEGIES The Fund will invest primarily in a portfolio of directly originated loans, secured floating and fixed rate syndicated loans, corporate bonds, asset-backed securities, commercial real estate loans and other types of credit instruments, which, under normal circumstances, will represent at least 80% of the Fund’s Managed Assets. For purposes of this policy, “credit instruments” may include commercial real estate mezzanine loans, real estate mortgages, distressed securities, notes, bills, debentures, bank loans, convertible and preferred securities, government and municipal obligations. The Fund may also invest in foreign instruments and illiquid and restricted securities. “Managed Assets” means the total assets of the Fund (including any assets attributable to any preferred shares that may be issued or to indebtedness) minus the Fund’s liabilities other than liabilities relating to indebtedness.

Opportunistic, Flexible, Untethered Credit Investments Strategy. The Advisors employ an opportunistic, flexible and untethered global credit investments strategy based on absolute and relative value considerations, as well as analysis

of the credit markets. The Advisors seek risk-adjusted returns over full market cycles by creating and managing a diversified portfolio across multiple industry sectors and geographic regions. The Advisors systematically allocate capital across multiple segments of the global fixed-income markets, including U.S. and non-U.S. credit instruments. It is anticipated that most of the Fund's investments will be rated below investment grade or would be rated below investment grade if they were rated. Non-investment grade fixed income securities, also known as "junk bonds", are considered speculative. Some of the credit instruments will have no credit rating at all. The Fund is untethered to benchmark-specific guidelines, thereby providing the Advisors with significant latitude to invest where they see opportunities and to reduce exposure to areas where they see less value or heightened downside risks.

Relative Value Focus. A primary driver of the Fund's investment strategy is a relative value focus whereby the Advisors seek to identify market dislocations caused by, among other factors, (i) significant corporate transactional events, such as spinoffs, mergers and acquisitions, industry consolidations, liquidations, reorganizations, bankruptcies, recapitalizations and share buybacks and other extraordinary corporate transactions; (ii) market inefficiencies resulting from the misunderstanding by the broader investment community of a particular company or industry, which misunderstanding results in the income of such investment reflecting a higher risk premium or the market price of such investment reflecting a lower value than is deemed warranted by the Advisors; (iii) companies experiencing financial stress resulting in a mispricing of their securities either because such securities pay higher income due to perceived risk or trade at a significant discount to fair value whereby the underlying asset values limit downside risk and offer meaningful upside potential; and (iv) sell-offs in one or more of the relevant credit markets.

Access to Ares Transaction Flow. The Advisors intend to benefit from the market presence, scale, infrastructure and demonstrated investment experience of Ares to gain access to transaction flow and a broad set of investment opportunities across the non-investment grade credit spectrum. Unlike many other alternative investment managers, Ares operates in a fully integrated manner and encourages frequent collaboration among its investment professionals. This unique approach allows Ares to draw from the collective market insight, industry expertise, contacts and experience of its approximately 400 investment professionals around the world.

The Fund intends to focus on what the Advisors believe are the broader Ares platform's most attractive investment ideas from a risk-adjusted return standpoint in order to achieve its investment objective. The Advisors intend to be opportunistic. As such, the Advisors have the flexibility to

invest where they see opportunities, based on their extensive credit research expertise and analysis of the relevant credit markets, in a variety of credit instruments with varying yield and risk profiles.

Active Monitoring and Investing, with Bottom-Up and Top-Down Credit Analysis by Deep and Experienced Team.

The Advisors will actively construct and manage a portfolio of credit investments and, as necessary, periodically rebalance the Fund's allocation of assets among different types of credit investments utilizing the Advisors' strategies to seek to optimize the Fund's allocation to achieve the Fund's investment objective under the market conditions existing at such time.

With respect to each investment opportunity, the Advisors intend to take a bottom-up and top-down approach to their credit analysis that will focus on each individual investment as well as global macroeconomic factors and the industry in which the subject entity operates. The Advisors' investment process will be rigorous, proactive and continuous, and will emphasize team management. Close monitoring of each investment in the portfolio provides the basis for making buy, sell and hold decisions. In managing the Fund's portfolio, the Advisors will utilize their and the broader Ares platform's deep and experienced teams of credit specialists to analyze investments and engage in regular and periodic monitoring of credit risk with a goal toward the early identification, and sale, of credit instruments and other investments with potential credit problems. This monitoring process may include reviewing (i) an issuer's financial resources and operating history; (ii) a comparison of an issuer's current operating results with the Advisors' initial investment thesis for the investment and initial expectations for the performance of the obligation; (iii) an issuer's sensitivity to economic conditions; (iv) the performance of an issuer's management; (v) an issuer's debt maturities and borrowing requirements; (vi) an issuer's interest and asset coverage; and (vii) the relative value of an investment based on an issuer's anticipated cash flow or where other comparable assets are trading in the market.

PORTFOLIO COMPOSITION

The Fund's portfolio will consist of some combination of the following types of investments:

Direct Lending. The Fund may invest in first lien senior secured loans (including "unitranche" loans, which are loans that combine both senior and mezzanine debt, generally in a first lien position), second lien senior secured loans and mezzanine debt, which in some cases includes an equity component, of U.S. and European middle-market companies, where the Advisors believe the supply of primary capital is limited and the investment opportunities are most attractive. These investments are typically made to companies with annual EBITDA between \$10 million and

\$250 million. As used herein, EBITDA represents net income before net interest expense, income tax expense, depreciation and amortization.

Syndicated Corporate Loans. Senior, secured corporate loans (“Syndicated Loans”) generally benefit from liens on collateral, are rated below-investment grade and typically pay interest at rates that are determined periodically on the basis of a floating base lending rate, primarily the London-Interbank Offered Rate (“LIBOR”), plus a spread. Syndicated Loans are typically made to U.S. and, to a lesser extent, non-U.S. corporations, partnerships, limited liability companies and other business entities (together with issuers of Corporate Bonds (as defined below) and other debt securities, (“Borrowers”) which operate in various industries and geographical regions. Borrowers may obtain Syndicated Loans, among other reasons, to refinance existing debt, engage in acquisitions, pay dividends, recapitalize, complete leveraged buyouts and for general corporate purposes. Syndicated Loans rated below investment grade are sometimes referred to as “leveraged loans”. The Fund may invest in Syndicated Loans through assignments of or, to a lesser extent, participations in Syndicated Loans. The Fund may utilize various types of derivative instruments (“Derivatives”), including total return swaps for the purpose of gaining exposure to Syndicated Loans.

Corporate Bonds. An issuer of high-yield corporate bonds (“Corporate Bonds”) typically pays the investor a fixed rate of interest and must repay the amount borrowed on or before maturity. The investment return of Corporate Bonds reflects interest on the security and changes in the market value of the security. The market value of a Corporate Bond generally may be expected to rise and fall inversely with interest rates. The value of intermediate- and longer-term Corporate Bonds normally fluctuates more in response to changes in interest rates than does the value of shorter-term Corporate Bonds. The market value of a Corporate Bond also may be affected by investors’ perceptions of the creditworthiness of the issuer, the issuer’s performance and perceptions of the issuer in the market place. There is a risk that the issuers of Corporate Bonds may not be able to meet their obligations on interest or principal payments at the time called for by an instrument. The Fund may utilize various types of Derivatives, including swaps, for the purpose of gaining exposure to Corporate Bonds.

Structured Credit. The Fund may invest in asset-backed opportunities across broad sectors such as consumer and commercial specialty finance and corporate credit. The Fund will target investment opportunities that are directly originated and privately negotiated that may include (i) financings secured by pools of consumer loans, commercial loans or real estate assets; (ii) the outright purchase of pools of consumer loans, commercial loans or real estate assets; and (iii) debt and equity investments in

U.S.-dollar-denominated collateralized loan obligations (“CLOs”) that are primarily backed by corporate leveraged loans issued to primarily U.S. obligors (“U.S. CLOs”), as well as Euro-denominated CLOs that are backed primarily by corporate leveraged loans issued to primarily European obligors (“European CLOs”). The investments in the “equity” of structured credit products (including CLOs) refers to the junior-most or residual debt tranche of such structured credit products (i.e., the tranche whose rights to payment are not senior to any other tranche, which does not typically receive a credit rating and is typically not secured (and is also typically referred to as subordinated notes, income notes, preferred shares or preferred securities, or, more generally, as “equity”)) (the “Residual Tranche”).

The CLO equity tranches (or other similar junior tranches) and privately issued asset-backed securities in which the Fund invests may be highly leveraged, which magnifies the Fund’s risk of loss on such investments.

Stressed Investments. The Fund may invest in Syndicated Loans and Corporate Bonds and other obligations of companies, referred to herein as “Stressed Issuers,” that may be in some level of financial or business distress, including companies involved in, or that have recently completed, bankruptcy or other reorganization and liquidation proceedings. These investments may include (i) corporate debt instruments relating to stressed and distressed industries or issuers; (ii) rescue-capital opportunities; (iii) public and private stock issued in connection with restructurings and reorganizations or otherwise (“post-reorganization securities”); and (iv) other opportunistic investments resulting from periods of market dislocation.

Commercial Real Estate Loans.

Senior Mortgage Loans: These mortgage loans are typically secured by first liens on commercial properties, including the following property types: office, multifamily, retail, industrial, hospitality and mixed-use. In some cases, first lien mortgages may be divided into an A-Note and a B-Note. The A-Note is typically a privately negotiated loan that is secured by a first mortgage on a commercial property or group of related properties that is senior to a B-Note secured by the same first mortgage property or group.

Subordinated Debt: These loans may include structurally subordinated first mortgage loans and junior participations in first mortgage loans or participations in these types of assets. As noted above, a B-Note is typically a privately negotiated loan that is secured by a first mortgage on a commercial property or group of related properties and is subordinated to an A-Note secured by the same first mortgage property or group. The subordination of a B-Note or junior

participation typically is evidenced by participations or intercreditor agreements with other holders of interests in the note. B-Notes are subject to more credit risk with respect to the underlying mortgage collateral than the corresponding A-Note.

Preferred Equity: Real estate preferred equity investments are subordinate to first mortgage loans and are not collateralized by the property underlying the investment. As a holder of preferred equity, the Fund seeks to enhance its position with covenants that limit the activities of the entity in which the Fund has an interest and protect the Fund's equity by obtaining an exclusive right to control the underlying property after an event of default, should such a default occur on the Fund's investment.

Mezzanine Loans: Like B-Notes, these loans are also subordinated, but are usually secured by a pledge of the borrower's equity ownership in the entity that owns the property or by a second lien mortgage on the property. In a liquidation, these loans are generally junior to any mortgage liens on the underlying property, but senior to any preferred equity or common equity interests in the entity that owns the property. Investor rights are usually governed by intercreditor agreements.

Other Investment Strategies. The Fund may also invest in commercial real estate mezzanine loans, real estate mortgages, distressed securities, notes, bills, debentures, bank loans, convertible and preferred securities, government and municipal obligations and other credit instruments with similar economic characteristics. In addition, from time to time, the Fund may invest in or hold common stock and other equity securities incidental to the purchase or ownership of a Syndicated Loan or Corporate Bond or in connection with a reorganization of a borrower. The Fund may engage in short sales. The Fund may also use Derivatives to gain investment exposure to credit instruments, to provide downside protection and to dampen volatility. Derivatives may allow the Fund to increase or decrease the level of risk to which the Fund is exposed more quickly and efficiently than transactions in other types of instruments. The Fund may invest in securities of other investment companies, including ETFs, to the extent that these investments are consistent with the Fund's investment objective, strategies and policies and permissible under the 1940 Act or any applicable exemption therefrom. The Fund may invest in other investment companies to gain broad market or sector exposure, including during periods when it has large amounts of uninvested cash or when the Advisors believe share prices of other investment companies offer attractive values.

Other Characteristics

Below Investment Grade Credit Instruments. Most of the credit instruments in which the Fund may invest will be rated below investment grade (also known as “junk bonds”). Securities rated below investment grade are those that, at the time of investment, are rated Ba1 or lower by Moody’s Investors Service, Inc. (“Moody’s”), or BB+ or lower by Standard & Poor’s Corporation Ratings Group (“S&P”) or Fitch Ratings, Inc. (“Fitch”), or if unrated are determined by the Advisors to be of comparable quality. Below investment grade securities often are regarded as having predominately speculative characteristics with respect to an issuer’s capacity to pay interest and repay principal. In addition, lower quality debt securities tend to be more sensitive to general economic conditions. Although many of the Fund’s investments may consist of securities rated below investment grade, the Fund reserves the right to invest in credit instruments of any credit quality, maturity and duration.

Foreign Instruments. The Fund may make investments in non-U.S. entities, including issuers in emerging markets. Emerging market countries are countries that major international financial institutions, such as the World Bank, generally consider to be less economically mature than developed nations, such as the United States or most nations in Western Europe. Emerging market countries can include every nation in the world except the United States, Canada, Japan, Australia, New Zealand and most countries located in Western Europe. The Fund expects that its investment in non-U.S. issuers will be made primarily in U.S. dollar denominated securities, but it reserves the right to purchase securities that are foreign currency denominated. Some non-U.S. securities may be less liquid and more volatile than securities of comparable U.S. issuers.

Illiquid and Restricted Securities. The Fund may invest in instruments that, at the time of investment, are illiquid (generally, those securities that cannot be disposed of within seven days in the ordinary course of business at approximately the value at which the Fund has valued the securities). Although the Fund may invest in such instruments without limitation, pursuant to the requirements of the 1940 Act, the Board of Trustees (the “Board”) has adopted, and the Fund follows, procedures designed to ensure that the Fund maintains sufficient liquidity to meet its periodic repurchase obligations as an interval fund. The Fund may also invest, without limit, in securities that are unregistered (but are eligible for purchase and sale by certain qualified institutional buyers) or are held by control persons of the issuer and securities that are subject to contractual restrictions on their resale.

The Fund may invest its cash balances in money market instruments, U.S. government securities, commercial paper, certificates of deposit, repurchase agreements and other

high-quality debt instruments maturing in one year or less, among other instruments. In addition, and in response to adverse market, economic or political conditions, the Fund may invest in high-quality fixed income securities, money market instruments and money market funds or may hold significant positions in cash or cash equivalents for defensive purposes.

MANAGEMENT AND INCENTIVE
FEES

Pursuant to the investment advisory agreement, dated as of December 6, 2016 (the “Investment Advisory Agreement”), by and between the Fund and the Advisor, and in consideration of the advisory services provided by the Advisor to the Fund, the Advisor is entitled to a fee consisting of two components — a base management fee (the “Management Fee”) and an incentive fee (the “Incentive Fee”). The Investment Advisory Agreement was most recently amended and restated as of May 22, 2020. Pursuant to the investment sub-advisory agreement, dated as of December 6, 2016 (the “Investment Sub-Advisory Agreement”), by and between the Advisors and the Fund, the Advisor pays the Sub-Advisor 40% of the Management Fee and Incentive Fee actually received and retained and not otherwise used to support expenses.

The Management Fee is calculated and payable monthly at the annual rate of 1.25% of the average daily value of the Fund’s Managed Assets.

The Incentive Fee is calculated and payable quarterly in arrears based upon “pre-incentive fee net investment income” attributable to each class of the Fund’s common shares for the immediately preceding fiscal quarter, and is subject to a hurdle rate, expressed as a rate of return based on each class’s average daily net asset value (calculated in accordance with GAAP), equal to 1.50% per quarter (or an annualized hurdle rate of 6.00%), subject to a “catch-up” feature. For this purpose, “pre-incentive fee net investment income” means interest income, dividend income and any other income accrued during the fiscal quarter, minus each class’s operating expenses for the quarter and the distribution and/or shareholder servicing fees (if any) applicable to each class accrued during the fiscal quarter. For such purposes, the Fund’s operating expenses will include the Management Fee, expenses reimbursed to CAM under the administration agreement, dated as of December 6, 2016 (the “CAM Administration Agreement”), by and between the Fund and CAM, and any interest expense and distributions paid on any issued and outstanding preferred shares, but will exclude the Incentive Fee.

The “catch-up” provision is intended to provide the Advisor with an incentive fee of 15% on each class’s pre-incentive fee net investment income when that class’s pre-incentive fee net investment income reaches 1.765% of the class’s average daily net asset value (calculated in accordance with GAAP) in any fiscal quarter.

The Advisors are obligated to pay expenses associated with providing the investment services stated in the Investment Advisory Agreement and Investment Sub-Advisory Agreement, including compensation of and office space for their officers and employees connected with investment and economic research, trading and investment management of the Fund.

The Board, including a majority of the members of the Board (each, a “Trustee”) that are considered independent and are not “interested persons” (as defined in the 1940 Act) of the Fund or the Advisors (collectively, the “Independent Trustees”), oversees and monitors the Fund’s investment performance and will periodically review the Investment Advisory Agreement and Investment Sub-Advisory Agreement to determine, among other things, whether the fees payable under such agreements are reasonable in light of the services provided.

The Advisor and the Fund have entered into an amended and restated expense support and conditional reimbursement agreement (“Expense Support and Conditional Reimbursement Agreement”) under which the Advisor may voluntarily determine to reimburse the Fund’s operating expenses to the extent that it deems appropriate in order to ensure that the Fund bears an appropriate level of expenses. The Expense Support and Conditional Reimbursement Agreement may be renewed for additional one-year terms by the mutual agreement of the Advisor and the Fund.

The Fund has agreed to repay the Advisor in the amount of any Fund expenses reimbursed under the Expense Support and Conditional Reimbursement Agreement (including any organizational, offering, or operating costs reimbursed under the original and first amended and restated expense support and conditional reimbursement agreements (collectively, the “Expense Support and Conditional Reimbursement Agreements”)) (each such payment, an “Expense Payment”), subject to the limitation that a reimbursement (an “Advisor Reimbursement”) will be made only if and to the extent that (i) it is payable not more than three years from the last business day of the calendar quarter in which the applicable Expense Payment was made by the Advisor; (ii) the Advisor Reimbursement does not cause Other Fund Operating Expenses (as defined herein) (on an annualized basis and net of any reimbursements received by the Fund during such fiscal year) during the applicable quarter to exceed the percentage of the Fund’s average net assets attributable to Class I Shares represented by Other Fund Operating Expenses (on an annualized basis) during the quarter in which the applicable Expense Payment from the Advisor was made; and (iii) the distributions per share declared by the Fund for the applicable class at the time of the applicable Expense Payment are less than the effective rate of distributions per share for such class at the time the Advisor Reimbursement would be paid. See “Fund Expenses —

Expense Support and Conditional Reimbursement Agreement” for additional information. The Expense Support and Conditional Reimbursement Agreement will remain in effect at least until July 31, 2021, unless and until the Board approves its modification or termination. This agreement may be terminated only by the Board on notice to the Advisor. See “Fund Expenses.”

FUND EXPENSES

Pursuant to the CAM Administration Agreement, CAM furnishes the Fund with office equipment and clerical, bookkeeping and record keeping services at the Fund’s office facilities. Under the CAM Administration Agreement, the Fund is obligated to reimburse CAM, at cost, based upon the Fund’s allocable portion of CAM’s overhead and other expenses (including travel expenses) incurred by CAM in performing its obligations under the CAM Administration Agreement, including the Fund’s allocable portion of the compensation of certain of its officers (including but not limited to the chief compliance officer, chief financial officer, chief accounting officer, general counsel, treasurer and assistant treasurer) and their respective staffs. The CAM Administration Agreement may be terminated by either party without penalty upon 60 days’ written notice to the other party.

Pursuant to the administration agreement between ALPS Fund Services, Inc. (“ALPS Fund Services”) and the Fund (the “ALPS Administration Agreement”), ALPS Fund Services performs, or administers the performance of, certain of the Fund’s required administrative services, which include, among other things, providing administrative assistance in accounting, legal, compliance, and operations, preparing the financial records that the Fund is required to maintain and preparing reports to the Fund’s shareholders and reports filed with the SEC. In addition, ALPS Fund Services coordinates the preparation and filing of the Fund’s tax returns and generally coordinates the payment of the Fund’s expenses and the performance of administrative and professional services rendered to the Fund.

It is also understood and agreed that if persons associated with the Advisors or any of their affiliates, including persons who are officers of the Fund, provide accounting, legal, clerical or administrative services to the Fund at the request of the Fund, the Fund will reimburse the Advisors and their affiliates for their costs in providing such accounting, legal, clerical or administrative services to the Fund (which costs may include an allocation of overhead including rent and the allocable portion of the salaries and benefits of the relevant persons and their respective staffs, including travel expenses), using a methodology for determining costs approved by the Board. Nothing contained herein shall be construed to restrict the Fund’s right to hire its own employees or to contract for services to be performed by third parties.

DISTRIBUTIONS

The Fund’s distribution policy is to make monthly distributions to shareholders. See “Distributions.”

The Board reserves the right to change the distribution policy from time to time.

DIVIDEND REINVESTMENT

PLAN

The Fund will operate under a dividend reinvestment plan (“DRP”) administered by DST Systems, Inc. (“DST”). Pursuant to the plan, the Fund’s income dividends or capital gains or other distributions (each, a “Distribution” and collectively, “Distributions”), net of any applicable U.S. withholding tax, are reinvested in the same class of shares of the Fund.

Shareholders automatically participate in the DRP, unless and until an election is made to withdraw from the plan on behalf of such participating shareholder. A shareholder who does not wish to have Distributions automatically reinvested may terminate participation in the Plan at any time by written instructions to that effect to DST. Shareholders who elect not to participate in the DRP will receive all distributions in cash paid to the shareholder of record (or, if the shares are held in street or other nominee name, then to such nominee). Such written instructions must be received by DST 30 days prior to the record date of the Distribution or the shareholder will receive such Distribution in shares through the DRP. Under the DRP, the Fund’s Distributions to shareholders are reinvested in full and fractional shares. See “Distributions — Dividend Reinvestment Plan.”

BOARD OF TRUSTEES

The Board has overall responsibility for monitoring and overseeing the Fund’s management and operations. A majority of the Trustees are Independent Trustees. See “Management of the Fund.”

PURCHASES OF SHARES

The Fund’s Shares are offered on a daily basis. Please see “Plan of Distribution” on page 100 for purchase instructions and additional information.

The minimum initial investment for Class I Shares is \$1,000,000; subsequent investments may be made in any amount. The Fund reserves the right to waive the investment minimum

. See “Distributions — Dividend Reinvestment Plan.”

PLAN OF DISTRIBUTION

ALPS Distributors, Inc., located at 1290 Broadway, Suite 1000, Denver, CO 80203, serves as the Fund’s principal underwriter and acts as the Distributor of the Fund’s Shares on a best efforts basis, subject to various conditions. The Fund’s Shares are offered for sale through the Distributor at NAV plus the applicable sales load. The Distributor also may enter into broker-dealer selling agreements with other broker dealers for the sale and distribution of the Fund’s Shares.

The Distributor is not required to sell any specific number or dollar amount of the Fund’s Shares, but will use its best efforts to solicit orders for the sale of the Shares. Shares of the Fund will not be listed on any national securities exchange and the Distributor will not act as a market maker in Fund Shares. Class I Shares are not subject to a distribution fee.

The Distributor has entered into a wholesale marketing agreement with CION Securities, LLC (“CION Securities”), a registered broker-dealer and an affiliate of CION. Pursuant to the terms of the wholesale marketing agreement, CION Securities will seek to market and otherwise promote the Fund through various wholesale distribution channels, including, but not limited to, regional and independent retail broker-dealers and registered investment advisors.

The Advisors or their affiliates, in the Advisors’ discretion and from their own resources, may pay additional compensation to financial intermediaries and their agents that have made arrangements with the Fund and are authorized to buy and sell shares of the Fund (collectively, “Financial Intermediaries”) in connection with the sale of Fund Shares (the “Additional Compensation”). In return for the Additional Compensation, the Fund may receive certain marketing advantages including access to a broker’s or dealer’s registered representatives, placement on a list of investment options offered by a broker or dealer, or the ability to assist in training and educating the broker’s or dealer’s registered representatives. The Additional Compensation may differ among brokers or dealers in amount or in the amount of calculation. Payments of Additional Compensation may be fixed dollar amounts or, based on the aggregate value of outstanding Shares held by Shareholders introduced by the broker or dealer, or determined in some other manner. The receipt of Additional Compensation by a selling broker or dealer may create potential conflicts of interest between an investor and its broker or dealer who is recommending the fund over other potential investments.

ERISA PLANS AND OTHER
TAX-EXEMPT ENTITIES

Investors subject to the Employee Retirement Income Security Act of 1974, as amended (“ERISA”), and other tax-exempt entities, including employee benefit plans, individual retirement accounts (“IRAs”), 401(k) plans and Keogh plans, may purchase Shares. Because the Fund is registered as an investment company under the 1940 Act, the underlying assets of the Fund will not be considered to be “plan assets” of the ERISA plans investing in the Fund for purposes of ERISA’s fiduciary responsibility and prohibited transaction rules. Thus, none of the Fund or the Advisors will be a fiduciary within the meaning of ERISA with respect to the assets of any ERISA plan that becomes a Shareholder, solely as a result of the ERISA plan’s investment in the Fund. See “ERISA Considerations.”

UNLISTED CLOSED-END
INTERVAL FUND STRUCTURE

The Fund has been organized as a continuously offered, diversified closed-end management investment company. Closed-end funds differ from open-end funds (commonly known as mutual funds) in that investors in closed-end funds do not have the right to redeem their shares on a daily basis. Unlike most closed-end funds, which typically list their

shares on a securities exchange, the Fund does not currently intend to list the Shares for trading on any securities exchange, and the Fund does not expect any secondary market to develop for the Shares in the foreseeable future. Therefore, an investment in the Fund, unlike an investment in a typical closed-end fund, is not a liquid investment. To provide some liquidity to Shareholders, the Fund will be structured as an “interval fund” and conduct quarterly repurchase offers for a limited amount of the Fund’s Shares (at least 5%).

The Fund believes that an unlisted closed-end structure is most appropriate for the long-term nature of the Fund’s strategy. With event-driven strategies or similar types of investments, the ability to hold positions — through all manner of market environments — until the occurrence of the anticipated event or catalyst that unlocks value is crucial. Features that interfere with this ability (such as daily redemptions permitted by open-end funds that can require the premature sale of investments) could impair the Fund’s ability to execute its investment strategy. Accordingly, an unlisted closed-end structure helps the Fund achieve its investment objective. The Fund’s NAV per Share may be volatile. As the Shares are not traded, investors will not be able to dispose of their investment in the Fund no matter how poorly the Fund performs. Because exchange-traded closed-end funds also do not redeem Shares, they also could execute the Fund’s buy-and-hold strategy. Because an exchange-traded closed-end fund’s shares can trade at a discount to NAV, they may present a more attractive opportunity to investors.

SHARE CLASSES

The Fund currently offers seven different classes of shares: Class A, Class C, Class I, Class L, Class U, Class U-2 and Class W Shares. The Fund began continuously offering its common shares on January 3, 2017. As of July 11, 2017, the Fund simultaneously redesignated its issued and outstanding common shares as Class A Shares and created its Class C, Class I and Class L Shares. As of December 4, 2018, the Fund created its Class U and Class W Shares. As of March 31, 2020, the Fund created its Class U-2 Shares. An investment in any share class of the Fund represents an investment in the same assets of the Fund. However, the purchase restrictions and ongoing fees and expenses for each share class are different. The fees and expenses for the Fund are set forth in “Summary of Fees and Expenses.” If you have hired an intermediary and are eligible to invest in more than one class of shares, the intermediary may help determine which share class is appropriate for you. When selecting a share class, you should consider which share classes are available to you, how much you intend to invest, how long you expect to own shares, and the total costs and expenses associated with a particular share class. The Fund offers Class A Shares, Class C Shares, Class L Shares, Class U Shares, Class U-2 Shares and Class W Shares through different prospectuses.

Each investor's financial considerations are different. You should speak with your financial advisor to help you decide which share class is best for you. Not all Financial Intermediaries offer all classes of shares. If your Financial Intermediary offers more than one class of shares, you should carefully consider which class of shares to purchase.

VALUATIONS

The Board is responsible for the valuation of the Fund's portfolio investments for which market quotations are not readily available, as determined in good faith pursuant to the Fund's valuation policy and consistently applied valuation process. The Board has delegated day-to-day responsibility for implementing the portfolio valuation process set forth in the Fund's valuation policy to Fund management, which is comprised of officers and employees of the Advisors, and has authorized the Advisors to utilize the independent third-party pricing services and independent third-party valuation services that have been approved by the Board. Portfolio securities and other assets for which market quotes are readily available are valued at market value. In circumstances where market quotes are not readily available, the Board has adopted methods for determining the fair value of such securities and other assets. The Fund utilizes the Fund's NAV per Fund Share, as determined by the Fund in accordance with the methodology described in the Fund's valuation policy, in determining the Fund's NAV per Share. Valuations of Fund investments are disclosed in reports publicly filed with the SEC.

The Advisors will provide the Board with periodic reports, no less than quarterly, that discuss the functioning of the valuation process, if applicable to that period, and that identify issues and valuation problems that have arisen, if any. To the extent deemed necessary by the Advisors, the Capital Markets Valuation Committee of the Sub-Advisor ("Valuation Committee") will review any securities valued by the Advisors in accordance with the Fund's valuation policies. See "Determination of Net Asset Value."

SHARE REPURCHASE PROGRAM

The Shares have no history of public trading, nor is it intended that the Shares will be listed on a public exchange at this time. No secondary market is expected to develop for the Fund's Shares.

The Fund is an "interval fund," a type of fund which, to provide some liquidity to Shareholders, makes quarterly offers to repurchase between 5% and 25% of its outstanding Shares at NAV, pursuant to Rule 23c-3 under the 1940 Act, unless such offer is suspended or postponed in accordance with regulatory requirements (as discussed below). In connection with any given repurchase offer, it is expected the Fund will offer to repurchase only the minimum amount of 5% of its outstanding Shares. Quarterly repurchases occur in the months of March, June, September and December. The offer to purchase Shares is a fundamental policy that may

not be changed without the vote of the holders of a majority of the Fund's outstanding voting securities (as defined in the 1940 Act). Written notification of each quarterly repurchase offer (the "Repurchase Offer Notice") is sent to Shareholders at least 21 calendar days before the repurchase request deadline (i.e., the date by which Shareholders can tender their Shares in response to a repurchase offer) (the "Repurchase Request Deadline"). The Fund expects to determine the NAV applicable to repurchases on the Repurchase Request Deadline. However, the NAV will be calculated no later than the 14th calendar day (or the next business day if the 14th calendar day is not a business day) after the Repurchase Request Deadline (the "Repurchase Pricing Date"), although the NAV is expected to be determined on the Repurchase Request Deadline. The Fund expects to distribute payment to Shareholders between one and three business days after the Repurchase Pricing Date and will distribute such payment no later than seven calendar days after such Date. The Fund's Shares are not listed on any securities exchange, and the Fund anticipates that no secondary market will develop for its Shares. Accordingly, you may not be able to sell Shares when and/or in the amount that you desire. Thus, the Shares are appropriate only as a long-term investment. In addition, the Fund's repurchase offers may subject the Fund and Shareholders to special risks. See "Types of Investments and Related Risks — Repurchase Offers Risks."

SUMMARY OF TAXATION

The Fund has elected to be treated for U.S. federal income tax purposes, and intends to qualify annually, as a regulated investment company ("RIC") under Subchapter M of the Internal Revenue Code of 1986, as amended (the "Code"). As a RIC, the Fund generally will not be subject to corporate-level U.S. federal income taxes on any net ordinary income or capital gains that is currently distributed as dividends for U.S. federal income tax purposes to Shareholders, as applicable. To qualify and maintain its qualification as a RIC for U.S. federal income tax purposes, the Fund is required to meet certain specified source-of-income and asset diversification requirements, and is required to distribute dividends for U.S. federal income tax purposes of an amount at least equal to 90% of the sum of its net ordinary income and realized net short-term capital gains in excess of realized net long-term capital losses each tax year to Shareholders, as applicable. See "Distributions" and "Tax Aspects."

FISCAL YEAR

For accounting purposes, the Fund's fiscal year is the 12-month period ending on December 31.

REPORTS TO SHAREHOLDERS . . .

As soon as practicable after the end of each calendar year, a statement on Form 1099-DIV identifying the sources of the distributions paid by the Fund to Shareholders for tax purposes will be furnished to Shareholders subject to Internal Revenue Service ("IRS") reporting. In addition, the Fund will prepare and transmit to Shareholders an

unaudited semi-annual and an audited annual report within 60 days after the close of the period for which the report is being made, or as otherwise required by the 1940 Act.

RISK FACTORS

Investing in the Fund involves risks, including the risk that a Shareholder may receive little or no return on their investment or that a Shareholder may lose part or all of their investment. Below is a summary of some of the principal risks of investing in the Fund. For a more complete discussion of the risks of investing in the Fund, see “Types of Investments and Related Risks.” Shareholders should consider carefully the following principal risks before investing in the Fund:

- Unlike most closed-end funds, the Fund’s Shares will not be listed on any securities exchange;
- Although the Fund intends to implement a quarterly share repurchase program, there is no guarantee that an investor will be able to sell all of the Shares that the investor desires to sell. The Fund should therefore be considered to offer limited liquidity;
- The capital markets may experience periods of disruption and instability. Such market conditions may materially and adversely affect debt and equity capital markets, which may have a negative impact on the Fund’s business and operations;
- If a Shareholder is able to sell its Shares, the Shareholder likely will receive less than its purchase price and the then current NAV per Share;
- The Fund’s distributions may be funded from offering proceeds or borrowings, which may constitute a return of capital and reduce the amount of capital available to the Fund for investment. Any capital returned to Shareholders through distributions will be distributed after payment of fees and expenses, as well as the sales load;
- A return of capital to Shareholders is a return of a portion of their original investment in the Fund, thereby reducing the tax basis of their investment. As a result from such reduction in tax basis, Shareholders may be subject to tax in connection with the sale of Fund Shares, even if such Shares are sold at a loss relative to the Shareholder’s original investment;
- The Fund’s investments in securities and other obligations of companies that are experiencing distress involve a substantial degree of risk, require a high level of analytical sophistication for successful investment, and require active monitoring;

- Below investment grade instruments (also known as “junk bonds”) have predominantly speculative characteristics and may be particularly susceptible to economic downturns, which could cause losses;
- Certain investments may be exposed to the credit risk of the counterparties with whom the Fund deals;
- The valuation of securities or instruments that lack a central trading place (such as fixed-income securities or instruments) may carry greater risk than those that trade on an exchange;
- It is expected that most of the securities and instruments held by the Fund will not trade on an exchange;
- The value of convertible securities may be adversely affected by changes in interest rates, as well as the market price and volatility of the underlying security;
- Derivative investments have risks, including the imperfect correlation between the value of such instruments and the underlying assets of the Fund;
- The Fund may be materially adversely affected by market, economic and political conditions and public health emergencies (e.g. the coronavirus outbreak, epidemics and other pandemics) globally and in the jurisdictions and sectors in which the Fund invests;
- Non-U.S. securities may be traded in undeveloped, inefficient and less liquid markets and may experience greater price volatility and changes in value;
- Changes in foreign currency exchange rates may adversely affect the U.S. dollar value of and returns on foreign denominated investments;
- Credit intermediation involving entities and activities outside the regular banking system (i.e., the “shadow banking system” in Europe) could result in increased regulatory and operating costs, which could adversely affect the implementation of the Fund’s investment strategies, income and returns;
- Although the U.S. credit markets are not currently experiencing the same extreme volatility and market disruption as occurred during 2008 to 2009, extreme volatility or market disruption may recur in the future;
- Legal and regulatory changes, including those implemented in connection with the Dodd-Frank

Wall Street Reform and Consumer Protection Act (the “Dodd-Frank Act”), could occur, which may materially adversely affect the Fund;

- The Fund is a diversified, closed-end investment company;
- The Fund’s ability to grow depends on its ability to raise capital;
- The Fund may borrow money, which magnifies the potential for gain or loss on amounts invested, subjects the Fund to certain covenants with which it must comply and may increase the risk of investing with the Fund;
- The Fund operates in a highly competitive market for investment opportunities;
- The Fund is exposed to risks associated with changes in interest rates;
- The Fund’s financial condition and results of operations could be negatively affected if a significant investment fails to perform as expected;
- There are significant and potential conflicts of interest that could impact the Fund’s investment returns;
- To qualify and remain eligible for the special tax treatment accorded to RICs and their shareholders under the Code, the Fund must meet certain source-of-income, asset diversification and annual distribution requirements, and failure to do so could result in the loss of RIC status.

Accordingly, the Fund should be considered a speculative investment that entails substantial risks, and a prospective investor should invest in the Fund only if they can sustain a complete loss of their investment.

SUMMARY OF FEES AND EXPENSES

The following table illustrates the aggregate fees and expenses that the Fund expects to incur and that Shareholders can expect to bear directly or indirectly.

SHAREHOLDER TRANSACTION EXPENSES	I Share
Maximum sales load imposed on purchases	None
Maximum contingent deferred sales charge	None
 ANNUAL FUND EXPENSES⁽¹⁾	
(as a percentage of projected average net assets attributable to Shares)	
Management fee ⁽²⁾	1.61%
Incentive fee ⁽³⁾	0.64%
Interest payments on borrowed funds and securities sold short ⁽⁴⁾	0.61%
Other expenses ⁽⁵⁾	
Shareholder servicing fee	None
Distribution fee	None
Remaining other expenses	0.66%
Expense support recoupment ⁽⁶⁾	0.00%
Total annual fund expenses	3.52%

- (1) Assumes the Fund raises approximately \$690 million in proceeds in the one year period beginning April 1, 2021 resulting in estimated average net assets of approximately \$1.3 billion.
- (2) The Management Fee paid by the Fund is calculated at the annual rate of 1.25% of the average daily value of the Fund's Managed Assets which includes assets purchased with borrowed money. The table above assumes that the Fund borrows money for investment purposes at an average amount of 30% of its net assets. The Management Fee estimate in the table is greater than 1.25% since it is computed as a percentage of the Fund's net assets for presentation therein. In addition, if the Fund borrows money in excess of the 30% debt-to-NAV ratio, then the Management Fee in relation to its net assets would be higher than the estimate presented in the table.
- (3) The Fund anticipates that it may have interest income that could result in the payment of an Incentive Fee to the Advisor during certain periods. However, the Incentive Fee is based on the Fund's performance and will not be paid unless the Fund achieves certain performance targets. The Fund expects the Incentive Fee the Fund pays to increase to the extent the Fund earns greater interest income through its investments. The Incentive Fee is calculated and payable quarterly in arrears based upon "pre-incentive fee net investment income" attributable to each class of the Fund's common shares for the immediately preceding fiscal quarter, and is subject to a hurdle rate, expressed as a rate of return on each class's average daily net asset value (calculated in accordance with GAAP), equal to 1.50% per quarter, or an annualized hurdle rate of 6.00%, subject to a "catch-up" feature. See "Management and Incentive Fees" for a full explanation of how the Incentive Fee is calculated.
- (4) These expenses represent estimated interest payments the Fund expects to incur in connection with its expected credit facility and short sales during the current fiscal year. See "Investment Objective, Opportunities and Strategies — Leverage." The amount shown in the table above is based on the assumption that the Fund borrows money for investment purposes at an average amount of 30% of its net assets.
- (5) Other expenses include accounting, legal and auditing fees of the Fund, and offering costs, as well as the reimbursement of the compensation of administrative personnel and fees payable to the Independent Trustees. The amount presented in the table estimates the amounts the Fund expects to pay during the one year period beginning April 1, 2021, assuming the Fund raises approximately \$690 million of proceeds during that time.

- (6) Pursuant to the Expense Support and Conditional Reimbursement Agreement, the Advisor has previously made expense support payments to the Fund to reimburse the Fund’s organizational and offering costs, as well as certain operating expenses. Under the Expense Support and Conditional Reimbursement Agreement, the Fund is obligated to repay the Advisor (referred to as “recoupment”) in the amount of any such expense support payments made to the Fund, subject to certain limitations (as described below under “Fund Expenses — Expense Support and Conditional Reimbursement Agreement”). The amount presented in the table estimates the amounts the Fund expects to pay during the one-year period beginning April 1, 2021 to reimburse the Advisor for past expense support.

Example:

The following example demonstrates the projected dollar amount of total expenses that would be incurred over various periods with respect to a hypothetical investment in Shares. In calculating the following expense amounts, the Fund has assumed its direct and indirect annual operating expenses would remain at the percentage levels set forth in the table above and do not include any expense support from the Advisor.

An investor would pay the following expenses on a \$1,000 investment, assuming a 5.0% annual return:

Share Class	1 Year	3 Years	5 Years	10 Years
Class I	\$35	\$108	\$183	\$379

The example and the expenses in the tables above should not be considered a representation of the Fund’s future expenses, and actual expenses may be greater or less than those shown. While the example assumes a 5.0% annual return, as required by the SEC, the Fund’s performance will vary and may result in a return greater or less than 5.0%. For a more complete description of the various fees and expenses borne directly and indirectly by the Fund, see “Fund Expenses” and “Management and Incentive Fees.”

FINANCIAL HIGHLIGHTS

The financial highlights table is intended to help you understand the Fund's financial performance. The information for the periods below has been derived from the Fund's financial statements, which have been audited by Ernst & Young LLP, an independent registered public accounting firm, whose report, along with this information and additional Fund performance and portfolio information, appears in the Fund's Annual Report dated December 31, 2020. To request the Fund's Annual Report please call 888-729-4266. The table below sets forth financial data for one Class I Share throughout the periods presented.

CION Ares Diversified Credit Fund

Financial Highlights

(in thousands, except per share data, percentages and as otherwise noted)

	For the Year Ended December 31, 2020	For the Period Ended December 31, 2019*	For the Year Ended October 31, 2019	For the Year Ended October 31, 2018	For the Period from July 12, 2017 (commencement of operations) to October 31, 2017
Class I					
Per share data:					
Net asset value, beginning of period . . .	\$ 25.93	\$ 25.44	\$ 25.80	\$ 25.25	\$ 24.95
Income from investment operations:

Portfolio turnover rate	59.77%	5.42% ^(c)	63.58%	28.36%	164.09% ^(c)

* For the two month period ended December 31, 2019.

- (a) Per share net investment income has been calculated using the average shares outstanding during the period.
- (b) Based on net asset value per share. Distributions, if any, are assumed for purposes of this calculation to be reinvested at prices obtained under the Fund's Dividend Reinvestment Plan. Total Return is not annualized for periods less than one year. Total return excludes expense support provided or recouped by the Advisor.
- (c) Not annualized.
- (d) Based on net asset value per share. Distributions, if any, are assumed for purposes of this calculation to be reinvested at prices obtained under the Fund's Dividend Reinvestment Plan. Total Return is not annualized for periods less than one year. Total return includes expense support provided or (recouped) by the Advisor.
- (e) Includes organizational and offering costs.
- (f) Annualized, except for certain non-recurring costs.
- (g) Includes expense support provided or recouped by the Advisor.
- (h) For the year ended December 31, 2020, the ratio of operating expenses to average net assets consisted of 1.59% of base management fees, 0.25% of incentive fee, 0.53% of the cost of borrowing, 0.43% of net expense support and 1.14% of other operating expenses. For the period ended December 31, 2019, the ratio of operating expenses to average net assets consisted of 1.56% of base management fees, 0.68% of the cost of borrowing, 0.13% of net expense support and 1.51% of other operating expenses. For the year ended October 31, 2019, the ratio of operating expenses to average net assets consisted of 1.48% of base management fees, 0.71% of the cost of borrowing, 0.68% of net expense support and 1.68% of other operating expenses. For the year ended October 31, 2018, the ratio of operating expenses to average net assets consisted of 1.49% of base management fees, 0.00% of the cost of borrowing, (4.79)% of net expense support and 3.64% of other operating expenses. For the period ended October 31, 2017, the ratio of operating expenses to average net assets consisted of 1.49% of base management fees, 0.00% of the cost of borrowing, (29.81)% of net expense support and 28.33% of other operating expenses.

SENIOR SECURITIES

Information about the Fund's senior securities as of December 31, 2020, December 31, 2019 and October 31, 2019 is shown in the following table. There were no senior securities outstanding as of October 31, 2018 or October 31, 2017. *The information contained in the following table is derived from the Fund's Annual Report dated December 31, 2020.*

Class and Period Ended	Total Amount Outstanding Exclusive of Treasury Securities ⁽¹⁾ (in thousands)	Asset Coverage Per Unit ⁽²⁾ (\$)	Involuntary Liquidating Preference per Unit ⁽³⁾	Average Market Value per Unit ⁽⁴⁾
Revolving Credit Facility (Wells Fargo Bank, N.A.)				
December 31, 2020	\$ 77,025	6,233	—	N/A
December 31, 2019	\$ 19,054	5,383	—	N/A
October 31, 2019	\$ 19,397	3,847	—	N/A
Revolving Credit Facility (State Street Bank and Trust Company)				
December 31, 2020	\$111,283	6,233	—	N/A
December 31, 2019	\$110,387	5,383	—	N/A
October 31, 2019	\$144,357	3,847	—	N/A

-
- (1) Total amount of each class of senior securities outstanding at principal value at the end of the period presented.
 - (2) The asset coverage ratio for a class of senior securities representing indebtedness is calculated as our consolidated total assets, less all liabilities and indebtedness not represented by senior securities, divided by total senior securities representing indebtedness. This asset coverage ratio is multiplied by \$1,000 to determine the "Asset Coverage Per Unit".
 - (3) The amount to which such class of senior security would be entitled upon our involuntary liquidation in preference to any security junior to it. The "—" in this column indicates that the SEC expressly does not require this information to be disclosed for certain types of senior securities.
 - (4) Not applicable to senior securities outstanding as of period end.

THE FUND

The Fund is a diversified, closed-end management investment company that is registered under the 1940 Act. The Fund is structured as an “interval fund” and continuously offers its Shares. The Fund was organized as a Delaware statutory trust on June 21, 2016. The principal office of the Fund is located at 3 Park Avenue, 36th Floor, New York, NY 10016 and its telephone number is 212-418-4700.

The Fund’s investment objective is to provide superior risk-adjusted returns across various market cycles by investing in a diversified portfolio of liquid and illiquid asset classes. The Fund seeks to capitalize on market inefficiencies and relative value opportunities throughout the entire global credit spectrum.

The Fund invests primarily in a portfolio of directly originated loans, secured floating and fixed rate syndicated loans, corporate bonds, asset-backed securities, commercial real estate loans and other types of credit instruments, which, under normal circumstances, will represent at least 80% of the Fund’s Managed Assets (as defined below). In addition, the Fund invests primarily in those countries where creditors’ rights are protected by law, such as countries in North America and Western Europe, although in select situations the Fund may invest in securities of issuers domiciled elsewhere. The geographic areas of focus are subject to change from time to time and may be changed without notice to Shareholders. There is no minimum or maximum limit on the amount of the Fund’s assets that may be invested in non-U.S. securities.

The Fund seeks to achieve its investment objective by employing an opportunistic, dynamic and untethered global credit investments strategy based on absolute and relative value considerations and its analysis of credit markets. It seeks risk-adjusted returns over full market cycles by creating and managing a portfolio with balanced exposures to multiple industry sectors and geographic regions, systematically allocating capital across multiple segments of the global fixed-income markets, including U.S. and non-U.S. credit instruments. For a further discussion of the Fund’s principal investment strategies, see “Investment Objective, Opportunities and Strategies.” There can be no assurance that the Fund will achieve its investment objective.

The Fund’s investment advisor is CAM. Ares Capital is the Fund’s investment sub-advisor. CAM oversees the management of the Fund’s activities and is responsible for making investment decisions for the Fund’s portfolio with recommendations and support from Ares Capital. See “The Advisor and Sub-Advisor.” Responsibility for monitoring and overseeing the Fund’s investment program, management and operation is vested in the individuals who serve on the Board.

THE ADVISOR AND SUB-ADVISOR

CAM, an investment advisor registered with the SEC under the Advisers Act, serves as the Advisor. CAM is a joint venture between affiliates of Ares and CION and is controlled by Ares.

CION is a leading manager of alternative investment solutions that focuses on alternative credit strategies for individual investors. CION manages CION Investment Corporation (“CIC”), a leading non-traded business development company with approximately \$1.6 billion in assets under management as of December 31, 2020, and sponsors, through CAM, the Fund. Its affiliated broker-dealer, CION Securities, provides distribution services and has entered into a wholesale marketing agreement with the Distributor and a dealer manager agreement with the Fund. The dealer manager arrangement is applicable only to certain share classes of the Fund.

Ares Capital, an investment advisor registered with the SEC under the Advisers Act, serves as the Sub-Advisor. Ares is a publicly traded, leading global alternative investment manager with over 1,450 employees located in offices across the United States, Europe, Asia and Australia⁽¹⁾. Ares had approximately \$197 billion in assets under management (“AUM”) as of December 31, 2020, of which approximately \$145.5 billion was related to its credit business, across a diverse platform that it manages on behalf of organizations including but not limited to pension and endowment funds, sovereign wealth funds, financial institutions, insurance companies and individual investors.*

* As of December 31, 2020, AUM amounts include funds managed by Ivy Hill Asset Management, L.P., a wholly owned portfolio company of Ares Capital Corporation (“ARCC”) and a registered investment advisor.

(1) Ares has a presence in Sydney, Australia through its joint venture, Ares Australia Management Pty Ltd, with Fidante Partners Limited, a wholly owned subsidiary of Challenger Limited.

USE OF PROCEEDS

The proceeds from the sale of Shares are invested by the Fund to pursue its investment program and strategies.

There can be no assurance that the Fund will be able to sell all the Shares it is offering.

INVESTMENT OBJECTIVE, OPPORTUNITIES AND STRATEGIES

Investment Objective

The Fund's objective is to provide superior risk-adjusted returns across various market cycles by investing in a diversified portfolio of liquid and illiquid asset classes. The Fund seeks to capitalize on market inefficiencies and relative value opportunities throughout the entire global credit spectrum. There can be no assurance that the Fund will achieve its investment objective.

Investment Opportunities and Strategies

The Fund invests primarily in a portfolio of directly originated loans, secured floating and fixed rate syndicated loans, corporate bonds, asset-backed securities, commercial real estate loans and other types of credit instruments, which, under normal circumstances, will represent at least 80% of the Fund's Managed Assets. For purposes of this policy, "credit instruments" may include commercial real estate mezzanine loans, real estate mortgages, distressed securities, notes, bills, debentures, bank loans, convertible and preferred securities, government and municipal obligations. The Fund may also invest in foreign instruments and illiquid and restricted securities.

Opportunistic, Flexible, Untethered Credit Investments Strategy. The Advisors intend to employ an opportunistic, flexible and untethered global credit investments strategy based on absolute and relative value considerations and their analysis of the credit markets. The Advisors seek risk-adjusted returns over full market cycles by creating and managing a portfolio with balanced exposures to multiple industry sectors and geographic regions. The Advisors will make tactical allocations of assets across multiple segments of the global fixed-income markets, including U.S. and non-U.S. credit instruments. It is anticipated that most of the Fund's investments will be rated below investment grade or would be rated below investment grade if they were rated. Non-investment grade fixed income securities, also known as "junk bonds", are considered speculative. Some of the credit instruments will have no credit rating at all. The Fund is untethered to benchmark-specific guidelines, thereby providing the Advisors with significant latitude to invest where they see opportunities and to reduce exposure to areas where they see less value or heightened downside risks.

Relative Value Focus. A primary driver of the Fund's investment strategy will be a relative value focus whereby the Advisors seek to identify market dislocations caused by, among other factors, (i) significant corporate transactional events, such as spinoffs, mergers and acquisitions, industry consolidations, liquidations, reorganizations, bankruptcies, recapitalizations and share buybacks and other extraordinary corporate transactions; (ii) market inefficiencies resulting from the misunderstanding by the broader investment community of a particular company or industry, which misunderstanding results in the income of such investment reflecting a higher risk premium or the market price of such investment reflecting a lower value than is deemed warranted by the Advisors and; (iii) companies experiencing financial stress resulting in a mispricing of their securities either because such securities pay higher income due to perceived risk or trade at a significant discount to fair value whereby the underlying asset values limit downside risk and offer meaningful upside potential; and (iv) sell-offs in one or more of the relevant credit markets.

Access to Ares Transaction Flow. The Advisors intend to benefit from the market presence, scale, infrastructure and demonstrated investment experience of Ares to gain access to transaction flow and a broad set of investment opportunities across the non-investment grade credit spectrum. Unlike many other alternative investment managers, Ares operates in a fully integrated manner and encourages frequent collaboration among its investment professionals. This unique approach allows Ares to draw from the collective market insight, industry expertise, contacts and experience of its approximately 400 investment professionals around the world.

The Fund intends to focus on what the Advisors believe are the broader Ares platform's most attractive investment ideas and allocate investments sourced from Ares's multi-billion dollar credit platform to achieve its investment objective. As such, the Advisors have the flexibility to invest where they see opportunities, based on their extensive credit research expertise and analysis of the relevant credit markets, in a variety of credit instruments with varying yield and risk profiles. Many investment vehicles available for retail investors do not include certain asset classes that the Fund will invest in such as private asset-backed investments and directly originated loans, and therefore the Fund offers a differentiated investment opportunity to the retail investor base.

Active Monitoring and Investing, with Bottom-Up and Top-Down Credit Analysis by Deep and Experienced Team. The Advisors will actively construct and manage a portfolio of credit investments and, as necessary, periodically rebalance the Fund's allocation of assets among different types of credit investments utilizing the Advisors' strategies to seek to optimize the Fund's allocation to achieve the Fund's investment objective under the market conditions existing at such time.

With respect to each investment opportunity, the Advisors intend to take a bottom-up and top-down approach to their credit analysis that will focus on each individual investment as well as global macroeconomic factors and the industry in which the subject entity operates. The Advisors' investment process will be rigorous, proactive and continuous, and will emphasize team management. Close monitoring of each investment in the portfolio provides the basis for making buy, sell and hold decisions. In managing the Fund's portfolio, the Advisors will utilize their and the broader Ares platform's deep and experienced teams of credit specialists to analyze investments and engage in regular and periodic monitoring of credit risk with a goal toward the early identification, and sale, of credit instruments and other investments with potential credit problems. This monitoring process may include reviewing (i) an issuer's financial resources and operating history; (ii) a comparison of an issuer's current operating results with the Advisors' initial investment thesis for the investment and initial expectations for the performance of the obligation; (iii) an issuer's sensitivity to economic conditions; (iv) the performance of an issuer's management; (v) an issuer's debt maturities and borrowing requirements; (vi) an issuer's interest and asset coverage; and (vii) the relative value of an investment based on an issuer's anticipated cash flow or where other comparable assets are trading in the market.

Portfolio Composition

The Fund's portfolio will consist of some combination of the following types of investments:

Direct Lending. The Fund may invest in first lien senior secured loans (including "unitranche" loans, which are loans that combine both senior and mezzanine debt, generally in a first lien position), second lien senior secured loans and mezzanine debt, which in some cases includes an equity component, of U.S. and European middle-market companies, where the Advisors believe the supply of primary capital is limited and the investment opportunities are most attractive. These investments are typically made to companies with annual EBITDA between \$10 million and \$250 million. As used herein, EBITDA represents net income before net interest expense, income tax expense, depreciation and amortization.

Syndicated Corporate Loans. Syndicated Loans generally hold the most senior position in the capital structure of a Borrower, are typically secured with specific collateral and have a claim on the assets and/or stock of the Borrower that is senior to that held by unsecured creditors, subordinated debt holders and holders of equity of the Borrower. Typically, in order to borrow money pursuant to a Syndicated Loan, a Borrower will, for the term of the Syndicated Loan, pledge collateral (subject to typical exceptions), including but not limited to (i) working capital assets, such as accounts receivable and inventory; (ii) tangible fixed assets, such as real property, buildings and equipment; (iii) intangible assets, such as trademarks and patent rights; and (iv) security interests in shares of stock of subsidiaries or affiliates. In the case of Syndicated Loans made to non-public companies, the company's shareholders or owners may provide collateral in the form of secured guarantees and/or security interests in assets that they own. In many instances, a Syndicated Loan may be secured only by stock in the Borrower or its subsidiaries. Collateral may consist of assets that may not be readily liquidated, and there is no assurance that the liquidation of such assets would satisfy fully a Borrower's obligations under a Syndicated Loan.

A Borrower must comply with various covenants contained in a loan agreement or note purchase agreement between the Borrower and the holders of the Syndicated Loan (the "Loan Agreement"). In a typical Syndicated Loan, an administrative agent (the "Agent") administers the terms of the Loan Agreement. In such cases, the Agent is normally responsible for the collection of principal and interest payments from the Borrower and the apportionment of these payments to the credit of all institutions that are parties to the Loan Agreement. The Fund will generally rely upon the Agent or an intermediate participant to receive and forward to the Fund its portion of the principal and interest payments on the Syndicated Loan. Additionally, the Fund normally will rely on the Agent and the other loan investors to use appropriate credit remedies against the Borrower. The Agent is typically responsible for monitoring compliance with covenants contained in the Loan Agreement based upon reports prepared by the

Borrower. The Agent may monitor the value of the collateral and, if the value of the collateral declines, may accelerate the Syndicated Loan, may give the Borrower an opportunity to provide additional collateral or may seek other protection for the benefit of the participants in the Syndicated Loan. The Agent is compensated by the Borrower for providing these services under a Loan Agreement, and such compensation may include special fees paid upon structuring and funding the Syndicated Loan and other fees paid on a continuing basis.

Syndicated Loans typically have rates of interest that are determined daily, monthly, quarterly or semi-annually by reference to a base lending rate, plus a premium or credit spread. As a result, as short-term interest rates increase, interest payable to the Fund from its investments in Syndicated Loans should increase, and as short-term interest rates decrease, interest payable to the Fund from its investments in Syndicated Loans should decrease. These base lending rates are primarily LIBOR and secondarily the prime rate offered by one or more major U.S. banks and the certificate of deposit rate or other base lending rates used by commercial lenders.

Although not initially a principal investment strategy, the Fund may purchase and retain in its portfolio Syndicated Loans where the Borrower has experienced, or may be perceived to be likely to experience, credit problems, including involvement in or recent emergence from bankruptcy court proceedings or other forms of debt restructuring. Such distressed investments may provide opportunities for enhanced income as well as capital appreciation, although they also will be subject to greater risk of loss. At times, in connection with the restructuring of a Syndicated Loan either outside of bankruptcy court or in the context of bankruptcy court proceedings, the Fund may determine or be required to accept equity securities or junior credit securities in exchange for all or a portion of a Syndicated Loan.

In the process of buying, selling and holding Syndicated Loans, the Fund may receive and/or pay certain fees. These fees are in addition to interest payments received and may include facility fees, commitment fees, amendment fees, commissions and prepayment penalty fees. On an ongoing basis, the Fund may receive a commitment fee based on the undrawn portion of the underlying line of credit portion of a Syndicated Loan. In certain circumstances, the Fund may receive a prepayment penalty fee upon the prepayment of a Syndicated Loan by a Borrower. Other fees received by the Fund may include covenant waiver fees, covenant modification fees or other amendment fees.

Corporate Bonds. An issuer of Corporate Bonds typically pays the investor a fixed rate of interest and must repay the amount borrowed on or before maturity. The investment return of Corporate Bonds reflects interest on the security and changes in the market value of the security. The market value of a Corporate Bond generally may be expected to rise and fall inversely with interest rates. The value of intermediate- and longer-term Corporate Bonds normally fluctuates more in response to changes in interest rates than does the value of shorter-term Corporate Bonds. The market value of a Corporate Bond also may be affected by investors' perceptions of the creditworthiness of the issuer, the issuer's performance and perceptions of the issuer in the market place. There is a risk that the issuers of Corporate Bonds may not be able to meet their obligations on interest or principal payments at the time called for by an instrument. The Fund may utilize various types of Derivatives, including swaps, for the purpose of gaining exposure to Corporate Bonds.

Structured Credit. The Fund may invest in asset-backed opportunities across broad sectors such as consumer and commercial specialty finance and corporate credit. The Fund will target investment opportunities that are directly originated and privately negotiated that may include (i) financings secured by pools of consumer loans, commercial loans or real estate assets; (ii) the outright purchase of pools of consumer loans, commercial loans or real estate assets; and (iii) debt and equity investments in U.S.-dollar-denominated CLOs that are primarily backed by corporate leveraged loans issued to primarily U.S. CLOs, as well as Euro-denominated CLOs that are backed primarily by corporate leveraged loans issued to primarily European CLOs. The investments in the "equity" of structured credit products (including CLOs) refers to the Residual Tranche.

The CLO equity tranches (or other similar junior tranches) and privately issued asset-backed securities in which the Fund invests may be highly leveraged, which magnifies the Fund's risk of loss on such investments.

Stressed Investments. The Fund may invest in preferred or common shares, or other instruments, of companies undergoing, or that have recently completed, bankruptcies, reorganizations, insolvencies, liquidations or other fundamental changes or similar proceedings or other Stressed Issuers. In any investment opportunity involving any such type, there exists the risk that the contemplated transaction either will be unsuccessful, will take considerable time or will result in a distribution of cash or new securities, the value of which will be less than the purchase price to the Fund of the securities or other financial instruments in respect of which such distribution is received. Similarly, if an anticipated transaction does not in fact occur, the Fund may be required to sell its investment at a loss. The consummation of such transactions can be prevented or delayed by a variety of factors, including but not limited to (i) intervention of a regulatory agency; (ii) market conditions resulting in material changes in securities prices; (iii) compliance with any applicable bankruptcy, insolvency or securities laws; and (iv) the inability to obtain adequate financing. Because there is substantial uncertainty concerning the outcome of transactions involving financially troubled companies in which the Fund intends to invest, there is a potential risk of loss by the Fund of its entire investment in such companies.

Commercial Real Estate Loans.

Senior Mortgage Loans: These mortgage loans are typically secured by first liens on commercial properties, including the following property types: office, multifamily, retail, industrial, hospitality and mixed-use. In some cases, first lien mortgages may be divided into an A-Note and a B-Note. The A-Note is typically a privately negotiated loan that is secured by a first mortgage on a commercial property or group of related properties that is senior to a B-Note secured by the same first mortgage property or group.

Subordinated Debt: These loans may include structurally subordinated first mortgage loans and junior participations in first mortgage loans or participations in these types of assets. As noted above, a B-Note is typically a privately negotiated loan that is secured by a first mortgage on a commercial property or group of related properties and is subordinated to an A-Note secured by the same first mortgage property or group. The subordination of a B-Note or junior participation typically is evidenced by participations or intercreditor agreements with other holders of interests in the note. B-Notes are subject to more credit risk with respect to the underlying mortgage collateral than the corresponding A-Note.

Preferred Equity: Real estate preferred equity investments are subordinate to first mortgage loans and are not collateralized by the property underlying the investment. As a holder of preferred equity, the Fund seeks to enhance its position with covenants that limit the activities of the entity in which the Fund has an interest and protect the Fund's equity by obtaining an exclusive right to control the underlying property after an event of default, should such a default occur on the Fund's investment.

Mezzanine Loans: Like B-Notes, these loans are also subordinated, but are usually secured by a pledge of the borrower's equity ownership in the entity that owns the property or by a second lien mortgage on the property. In a liquidation, these loans are generally junior to any mortgage liens on the underlying property, but senior to any preferred equity or common equity interests in the entity that owns the property. Investor rights are usually governed by intercreditor agreements.

Other Investment Strategies. The Fund may also invest in distressed securities, notes, bills, debentures, bank loans, convertible and preferred securities, government and municipal obligations and other credit instruments with similar economic characteristics. In addition, from time to time, the Fund may invest in or hold common shares and other equity securities incidental to the purchase or ownership of a Syndicated Loan or Corporate Bond or in connection with a reorganization of a borrower. The Fund may engage in short sales. The Fund may also use Derivatives to gain investment exposure to credit instruments, to provide downside protection and to dampen volatility. Derivatives may allow the Fund to increase or decrease the level of risk to which the Fund is exposed more quickly and efficiently than transactions in other types of instruments. The Fund may invest in securities of other investment companies, including ETFs, to the extent that these investments are consistent with the Fund's investment objective, strategies and policies and permissible under the 1940 Act or any applicable exemption therefrom. The Fund may invest in other investment companies to gain broad market or sector exposure, including during periods when it has large amounts of uninvested cash or when the Advisors believe share prices of other investment companies offer attractive values.

Other Characteristics

Below Investment Grade Credit Instruments. Most of the credit instruments in which the Fund may invest will be rated below investment grade (also known as “junk bonds”). Securities rated below investment grade are those that, at the time of investment, are rated Ba1 or lower by Moody’s, or BB+ or lower by S&P or Fitch, or if unrated are determined by the Advisors to be of comparable quality. Below investment grade securities often are regarded as having predominately speculative characteristics with respect to an issuer’s capacity to pay interest and repay principal. In addition, lower quality debt securities tend to be more sensitive to general economic conditions. Although many of the Fund’s investments may consist of securities rated below investment grade, the Fund reserves the right to invest in credit instruments of any credit quality, maturity and duration.

Foreign Instruments. The Fund may make investments in non-U.S. entities, including issuers in emerging markets. Emerging market countries are countries that major international financial institutions, such as the World Bank, generally consider to be less economically mature than developed nations, such as the United States or most nations in Western Europe. Emerging market countries can include every nation in the world except the United States, Canada, Japan, Australia, New Zealand and most countries located in Western Europe. The Fund expects that its investment in non-U.S. issuers will be made primarily in U.S. dollar denominated securities, but it reserves the right to purchase securities that are foreign currency denominated. Some non-U.S. securities may be less liquid and more volatile than securities of comparable U.S. issuers.

Illiquid and Restricted Securities. The Fund may invest in instruments that, at the time of investment, are illiquid (generally, those securities that cannot be disposed of within seven days in the ordinary course of business at approximately the value at which the Fund has valued the securities). Although the Fund may invest in such instruments without limitation, pursuant to the requirements of the 1940 Act, the Board has adopted, and the Fund follows, procedures designed to ensure that the Fund maintains sufficient liquidity to meet its periodic repurchase obligations as an interval fund. The Fund may also invest, without limit, in securities that are unregistered (but are eligible for purchase and sale by certain qualified institutional buyers) or are held by control persons of the issuer and securities that are subject to contractual restrictions on their resale.

The Fund may invest its cash balances in money market instruments, U.S. government securities, commercial paper, certificates of deposit, repurchase agreements and other high-quality debt instruments maturing in one year or less, among other instruments. In addition, and in response to adverse market, economic or political conditions, the Fund may invest in high-quality fixed income securities, money market instruments and money market funds or may hold significant positions in cash or cash equivalents for defensive purposes.

The Investment Process

The Fund’s portfolio is managed by CAM employees Mitch Goldstein and Greg Margolies, who are also employees of an affiliate of Ares, where Mr. Goldstein is Co-Head of the Ares Credit Group and Mr. Margolies is a Partner. In managing the portfolio, they employ two principal inputs, a quantitative allocation model and the Sub-Advisor’s Allocation Committee comprised of portfolio managers and investment officers from each underlying credit discipline.

The Ares model utilizes a scoring system intended to quantify the following with a common scale:

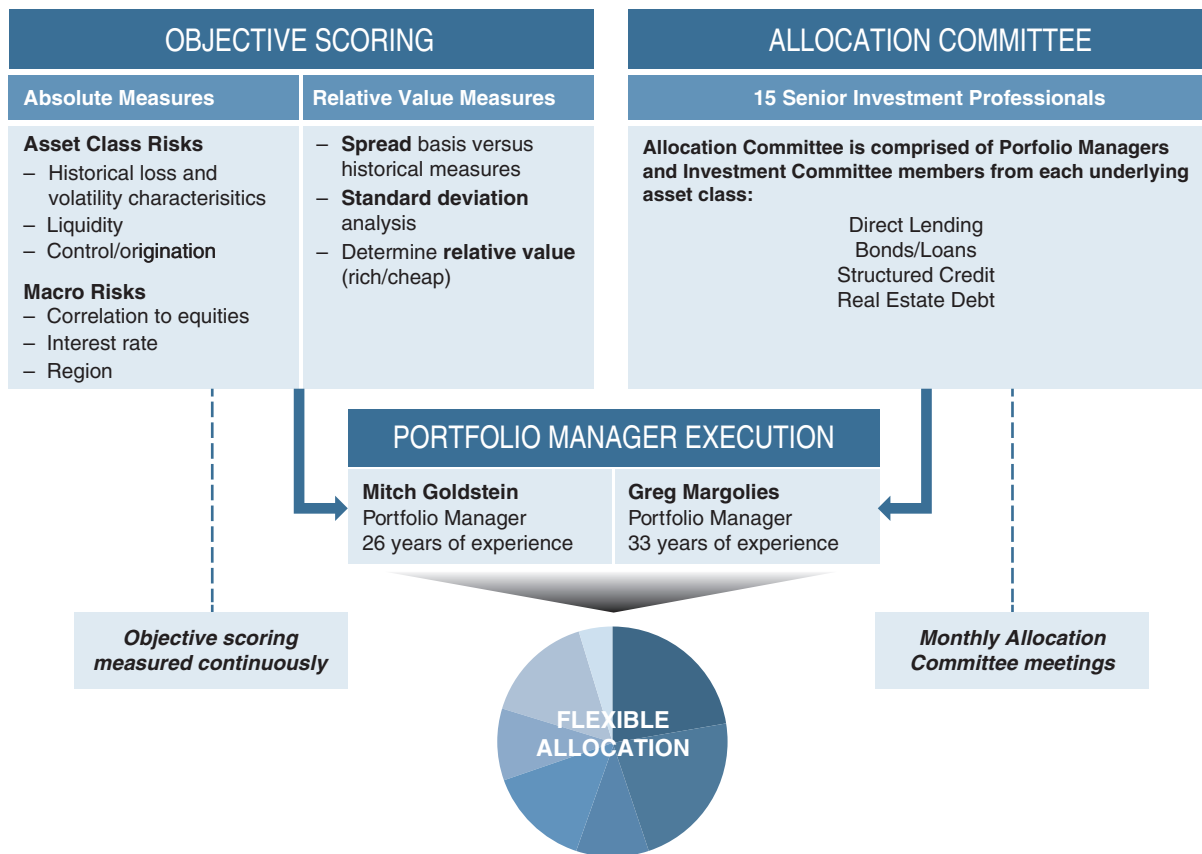

- four risk factors for each asset class including:
 - volatility: variability of price for a given security;
 - liquidity: extent to which an asset or security can be purchased or sold within the context of its current quoted price;
 - loss probability: probability of realizing a loss from default; and
 - control premium: premium to value associated with having a controlling position in structuring and originating debt instruments

- three macroeconomic risk factors including correlation to equities, interest rate risk, and geographic/regional risk
- relative value spread basis between different asset classes, based on standard deviations in price of each asset
- relative value of each asset class as compared to its own historical average measured by standard deviation

The Ares scoring for each asset class is then used to solve for an optimal allocation mix using a range of targeted returns. Minimum and maximum concentration and diversification limits may be applied. This output is meant as an objective measure of relative value, useful in guiding both Allocation Committee discussion and in advising Ares co-portfolio managers as to portfolio construction.

Allocation Committee meetings are held monthly and serve multiple ends. The forum is intended to facilitate a congress of expert opinions from across the credit spectrum. Members discuss macroeconomic trends, U.S. and global growth (or contraction), labor market trends, inflation trends, fiscal and monetary policy trends, asset valuations, liquidity conditions and investor sentiment. Each is addressed with respect to its potential effect on lending conditions and credit spreads across underlying asset classes. Consensus is not required, however the agenda will tend to facilitate development of broad “house views” as to macroeconomic forecasts. Specific focus is given to the subject of valuation, and whether each credit asset class is priced attractively relative to its fundamental (absolute) risk and also by comparison to other credit assets. Healthy disagreement on this topic is encouraged, and particular consideration given to the spreads at which most recent loans or bonds have been underwritten by the investment teams of each asset class. The end objective is to determine which asset classes appear cheaply valued and most attractive relative to the risks inherent to each asset class.

The process culminates as Mr. Goldstein and Mr. Margolies determine portfolio positioning and will decide how much of the Fund’s portfolio is invested in each credit asset class. The composition and construction of each underlying asset category is then determined by the portfolio managers specific to that asset category. To the extent possible, such portfolio managers are the same as would be employed in managing a standalone fund within that underlying asset class and the pool of investment ideas from which the underlying asset category is populated would similarly be the same. All investments are either sourced from third parties or by Ares directly, but the Fund expects the vast majority of the Fund’s investments to be directly originated by the Ares investment teams. While each underlying investment team employs its own distinct investment process tailored to that asset class, all portfolio investments undergo intensive screening, due diligence, and credit analyses focused on principal preservation and long-term value creation in market leading businesses. This ensures integrity of process down to the selection of specific companies and credits and is intended to maximize “best ideas” capture across the platform. As the allocation between various asset classes change, underlying portfolio managers are directed to monetize assets or increase their investments to raise liquidity or deploy additional investment capital.

TYPES OF INVESTMENTS AND RELATED RISKS

Investors should carefully consider the risk factors described below, before deciding on whether to make an investment in the Fund. The risks set out below are not the only risks the Fund faces. Additional risks and uncertainties not currently known to the Fund or that the Fund currently deems to be immaterial also may materially adversely affect the Fund's business, financial condition and/or operating results. If any of the following events occur, the Fund's business, financial condition and results of operations could be materially adversely affected. In such case, the NAV of the Fund's Shares could decline, and investors may lose all or part of their investment.

Risks Relating to Investment Strategies and Fund Investments

Distressed and Event-Driven Investing Risk. The Fund may invest in securities and other obligations of companies that are involved in significant financial or business distress, including companies involved in bankruptcy or other reorganization and liquidation proceedings. Although such investments may result in significant income and returns for the Fund, they involve a substantial degree of risk. The level of analytical sophistication, both financial and legal, necessary for successful investment in distressed assets is particularly high. There is no assurance that the Fund will correctly evaluate the value of the assets collateralizing the Fund's investments or the prospects for a successful reorganization or similar action in respect of any company. In any reorganization or liquidation proceeding relating to a company in which the Fund invests, the Fund may lose its entire investment, may be required to accept cash or securities with a value less than the Fund's original investment and/or may be required to accept payment over an extended period of time. Troubled company investments and other distressed asset-based investments require active monitoring.

The Fund may also invest in companies in expectation of a specific event or catalyst, which may be external (e.g., a macroeconomic event impacting relevant markets) or an event that is specific to the company (e.g., a Chapter 11 filing). Such event-driven investing requires the Fund to make judgments concerning (i) the likelihood that an event will occur; and (ii) the impact such event will have on the value of the Fund's investment in the relevant company. If the event fails to occur or it does not have the effect foreseen, significant losses can result.

Market Price Inefficiency Risk. The Fund seeks investment opportunities based on what the Advisors perceive as market inefficiencies. However, recognizing market inefficiencies requires a high level of market expertise and is inherently difficult because it requires the recognition of information that the majority of market participants have not identified. The Fund may not effectively recognize market inefficiencies and, even if it does, the market may not correct as the Fund predicts, either of which could result in significant losses to the Fund.

Limited Portfolio Companies Risk. The Fund seeks to achieve its investment objective by focusing on a limited number of opportunities across the investment universe that it believes offer potentially exceptional risk-adjusted income and returns as compared to more traditional investment strategies under current and expected economic conditions. As a result, the Fund's portfolio may be focused in a limited number of portfolio companies and industries. Beyond the asset diversification requirements associated with the Fund's qualification as a RIC under Subchapter M of the Code and the fundamental investment limitations set forth in the Statement of Additional Information, the Fund does not have fixed guidelines for diversification, and while the Fund is not targeting any specific industries, the Fund's investments may be focused in relatively few industries or portfolio companies. As a result, the aggregate income and returns the Fund realizes may be significantly adversely affected if a small number of investments perform poorly or if the Fund needs to write down the value of any one investment. Additionally, a downturn in any particular industry in which the Fund is invested could also significantly impact the aggregate income and returns it realizes.

Debt Instruments Risk. The Fund may invest in loans and other types of debt instruments and securities. Such investments may be secured, partially secured or unsecured and may be rated or unrated, and whether or not rated, may have speculative characteristics. Changes in interest rates generally will cause the value of fixed rate debt investments held by the Fund to vary inversely to such changes. Debt investments with longer terms to maturity or duration are subject to greater volatility than investments in

shorter-term obligations. The issuer of a debt security or instrument may not be able or willing to pay interest or to repay principal when due in accordance with the terms of the associated agreement. An obligor's willingness to pay interest or to repay principal due in a timely manner may be affected by, among other factors, its cash flow. Commercial bank lenders may be able to contest payments to the holders of other debt obligations of the same obligor in the event of default under their commercial bank loan agreements. See also "— Credit Risk."

The Fund may invest in loans and other similar forms of debt. Such forms of indebtedness may be different from traditional debt securities in that debt securities are typically part of a large issue of securities and loans and similar debt instruments may not be securities, but may represent a specific commercial loan to a borrower. Loan participations typically represent direct participation, together with other parties, in a loan to a corporate borrower, and generally are offered by banks or other financial institutions or lending syndicates. The Fund may participate in such syndications, or can buy part of a loan, becoming a part lender. When purchasing indebtedness and loan participations, the Fund assumes the credit risk associated with the borrower and may assume the credit risk associated with an interposed bank or other Financial Intermediary. Members of a syndicate in which the Fund participates may have different and sometimes superior rights to those of the Fund. Where the Fund invests as a sub-participant in syndicated debt, it may be subject to certain risks as a result of having no direct contractual relationship with the underlying borrower. As a result, the Fund will generally be dependent on the lender to enforce its rights and obligations under the loan arrangements in the event of a default by the underlying borrower and will generally not have any direct rights against the underlying borrower, any direct rights in the collateral, if any, securing such borrowing, or any right to deal directly with such borrower. The lender will, in general, retain the right to determine whether remedies provided for in the underlying loan arrangement will be exercised, or waived. In the event that the Fund enters into such an investment, there can be no assurance that its ability to realize upon a participation will not be interrupted or impaired in the event of the bankruptcy or insolvency of any of the borrower or the lender or that in such circumstances the Fund will benefit from any set-off between the lender and the borrower. Claims by third parties arising from these and other risks may be borne by the Fund.

Syndicated Loans Risk. The Syndicated Loans in which the Fund will invest will primarily be rated below investment grade, but may also be unrated and of comparable credit quality. As a result, the risks associated with such Syndicated Loans are generally similar to the risks of other below investment grade fixed income instruments, although Syndicated Loans are senior and typically secured in contrast to other below investment grade fixed income instruments, which are often subordinated or unsecured. Investments in below investment grade Syndicated Loans are considered speculative because of the credit risk of the Borrowers. Such Borrowers are more likely than investment grade Borrowers to default on their payments of interest and principal owed to the Fund, and such defaults could reduce the Fund's NAV and income dividends. An economic downturn would generally lead to a higher non-payment rate, and a Syndicated Loan may lose significant market value before a default occurs. Moreover, any specific collateral used to secure a Syndicated Loan may decline in value or become illiquid, which would adversely affect the Syndicated Loan's value. Syndicated Loans are subject to a number of risks described elsewhere in this prospectus, including liquidity risk and the risk of investing in below investment grade fixed income instruments.

Syndicated Loans are subject to the risk of non-payment of scheduled interest or principal. Such non-payment would result in a reduction of income to the Fund, a reduction in the value of the investment and a potential decrease in the NAV of the Fund. There can be no assurance that the liquidation of any collateral securing a Syndicated Loan would satisfy the Borrower's obligation in the event of non-payment of scheduled interest or principal payments, whether when due or upon acceleration, or that the collateral could be liquidated, readily or otherwise. In the event of bankruptcy or insolvency of a Borrower, the Fund could experience delays or limitations with respect to its ability to realize the benefits of the collateral, if any, securing a Syndicated Loan. The collateral securing a Syndicated Loan, if any, may lose all or substantially all of its value in the event of the bankruptcy or insolvency of a Borrower. Some Syndicated Loans are subject to the risk that a court, pursuant to fraudulent conveyance or other similar laws, could subordinate such Syndicated Loans to presently existing or future indebtedness of the Borrower or take other action detrimental to the holders of Syndicated Loans including, in certain circumstances, invalidating such Syndicated Loans or causing interest previously paid to be refunded to the Borrower.

Additionally, a Syndicated Loan may be “primed” in bankruptcy, which reduces the ability of the holders of the Syndicated Loan to recover on the collateral. Priming takes place when a debtor in bankruptcy is allowed to incur additional indebtedness by the bankruptcy court and such indebtedness has a senior or pari passu lien with the debtor’s existing secured indebtedness, such as existing Syndicated Loans or secured Corporate Bonds.

There may be less readily available information about most Syndicated Loans and the Borrowers thereunder than is the case for many other types of securities, including securities issued in transactions registered under the Securities Act of 1933, as amended (the “1933 Act”), or registered under the Securities Exchange Act of 1934, as amended (the “Exchange Act”), and Borrowers subject to the periodic reporting requirements of Section 13 of the Exchange Act. Syndicated Loans may be issued by companies that are not subject to SEC reporting requirements and these companies, therefore, do not file reports with the SEC that must comply with SEC form requirements and in addition are subject to a less stringent liability disclosure regime than companies subject to SEC reporting requirements. As a result, the Advisors will rely primarily on their own evaluation of a Borrower’s credit quality rather than on any available independent sources. Therefore, the Fund will be particularly dependent on the analytical abilities of the Advisors.

The secondary trading market for Syndicated Loans may be less liquid than the secondary trading market for registered investment grade debt securities. No active trading market may exist for certain Syndicated Loans, which may make it difficult to value them. Illiquidity and adverse market conditions may mean that the Fund may not be able to sell Syndicated Loans quickly or at a fair price. To the extent that a secondary market does exist for certain Syndicated Loans, the market for them may be subject to irregular trading activity, wide bid/ask spreads and extended trade settlement periods.

Syndicated Loans and other variable rate debt instruments are subject to the risk of payment defaults of scheduled interest or principal. Such payment defaults would result in a reduction of income to the Fund, a reduction in the value of the investment and a potential decrease in the NAV of the Fund. Similarly, a sudden and significant increase in market interest rates may increase the risk of payment defaults and cause a decline in the value of these investments and in the Fund’s NAV. Other factors (including, but not limited to, rating downgrades, credit deterioration, a large downward movement in share prices, a disparity in supply and demand of certain securities or market conditions that reduce liquidity) can reduce the value of Syndicated Loans and other debt obligations, impairing the Fund’s NAV.

Syndicated Loans are subject to legislative risk. If legislation or state or federal regulations impose additional requirements or restrictions on the ability of financial institutions to make loans, the availability of Syndicated Loans for investment by the Fund may be adversely affected. In addition, such requirements or restrictions could reduce or eliminate sources of financing for certain Borrowers. This would increase the risk of default. If legislation or federal or state regulations require financial institutions to increase their capital requirements this may cause financial institutions to dispose of Syndicated Loans that are considered highly levered transactions. Such sales could result in prices that, in the opinions of the Advisors, do not represent fair value. If the Fund attempts to sell a Syndicated Loan at a time when a financial institution is engaging in such a sale, the price the Fund could receive for the Syndicated Loan may be adversely affected.

The Fund expects to acquire Syndicated Loans through assignments and, to a lesser extent, through participations. The purchaser of an assignment typically succeeds to all the rights and obligations of the assigning institution and becomes a lender under the credit agreement with respect to the debt obligation; however, the purchaser’s rights can be more restricted than those of the assigning institution, and the Fund may not be able to unilaterally enforce all rights and remedies under the loan and with regard to any associated collateral. In general, a participation is a contractual relationship only with the institution participating out the interest, not with the Borrower. Sellers of participations typically include banks, broker-dealers, other financial institutions and lending institutions. In purchasing participations, the Fund generally will have no right to enforce compliance by the Borrower with the terms of the loan agreement against the Borrower, and the Fund may not directly benefit from the collateral supporting the debt obligation in which it has purchased the participation. As a result, (i) the Fund will be exposed to the credit risk of both the Borrower and the institution selling the participation; and (ii) both the Borrower and the institution selling the participation will be considered issuers for purposes of the Fund’s investment

restriction concerning industry concentration. See “Investment Restrictions”. Further, in purchasing participations in lending syndicates, the Fund may be more limited than it otherwise would be in its ability to conduct due diligence on the Borrower. In addition, as a holder of the participations, the Fund may not have voting rights or inspection rights that the Fund would otherwise have if it were investing directly in the Syndicated Loan, which may result in the Fund being exposed to greater credit or fraud risk with respect to the Borrower or the Syndicated Loan.

Subordinated Loans Risk. Although the Fund does not initially expect Subordinated Loans to be a significant component of its portfolio, it may invest in such instruments from time to time. Subordinated Loans generally are subject to similar risks as those associated with investments in Syndicated Loans, except that such loans are subordinated in payment and/or lower in lien priority to first lien holders. In the event of default on a Subordinated Loan, the first priority lien holder has first claim to the underlying collateral of the loan to the extent such claim is secured. Additionally, an oversecured creditor may be entitled to additional interest and other charges in bankruptcy increasing the amount of their allowed claim. Subordinated Loans are subject to the additional risk that the cash flow of the Borrower and property securing the loan or debt, if any, may be insufficient to meet scheduled payments after giving effect to the senior obligations of the Borrower. This risk is generally higher for subordinated unsecured loans or debt, which are not backed by a security interest in any specific collateral. Subordinated Loans generally have greater price volatility than Syndicated Loans and may be less liquid.

Corporate Bond Risk. The market value of a Corporate Bond generally may be expected to rise and fall inversely with interest rates. The market value of intermediate- and longer-term Corporate Bonds is generally more sensitive to changes in interest rates than is the market value of shorter-term Corporate Bonds. The market value of a Corporate Bond also may be affected by factors directly related to the issuer, such as investors’ perceptions of the creditworthiness of the issuer, the issuer’s financial performance, perceptions of the issuer in the market place, performance of management of the issuer, the issuer’s capital structure and use of financial leverage and demand for the issuer’s goods and services. Certain risks associated with investments in Corporate Bonds are described elsewhere in this Prospectus in further detail, including under “Credit Risk”, “Prepayment Risk” and “Inflation and Deflation Risk”. There is a risk that the issuers of Corporate Bonds may not be able to meet their obligations on interest or principal payments at the time called for by an instrument. The Fund expects to invest primarily in Corporate Bonds that are high yield issues rated below investment grade. High yield Corporate Bonds are often high risk and have speculative characteristics. High yield Corporate Bonds may be particularly susceptible to adverse issuer-specific developments. High yield Corporate Bonds are subject to the risks described below under “Below Investment Grade Rating Risk.”

Asset-Backed Securities Risk. Asset-backed securities often involve risks that are different from or more acute than risks associated with other types of debt instruments. For instance, asset-backed securities may be particularly sensitive to changes in prevailing interest rates. In addition, the underlying assets are subject to prepayments that shorten the securities’ weighted average maturity and may lower their return. Asset-backed securities are also subject to risks associated with their structure and the nature of the assets underlying the security and the servicing of those assets. Payment of interest and repayment of principal on asset-backed securities is largely dependent upon the cash flows generated by the assets backing the securities and, in certain cases, supported by letters of credit, surety bonds or other credit enhancements. The values of asset-backed securities may be substantially dependent on the servicing of the underlying asset pools, and are therefore subject to risks associated with the negligence by, or defalcation of, their servicers. Furthermore, debtors may be entitled to the protection of a number of state and federal consumer credit laws with respect to the assets underlying these securities, which may give the debtor the right to avoid or reduce payment. In addition, due to their often complicated structures, various asset-backed securities may be difficult to value and may constitute illiquid investments. If many borrowers on the underlying loans default, losses could exceed the credit enhancement level and result in losses to investors in asset-backed securities.

Below Investment Grade Rating Risk. The Fund expects initially that its investments in Syndicated Loans, Subordinated Loans, Corporate Bonds and other debt instruments will consist primarily of securities and loans that are rated below investment grade or unrated and of comparable credit quality. Corporate Bonds that are rated below investment grade are often referred to as “high yield” securities or

“junk bonds.” Below investment grade Syndicated Loans, high yield securities and other similar instruments are rated “Ba1” or lower by Moody’s, “BB+” or lower by S&P or “BB+” or lower by Fitch or, if unrated, are judged by the Advisors to be of comparable credit quality. While generally providing greater income and opportunity for gain, below investment grade rated Corporate Bonds and Syndicated Loans and similar debt instruments may be subject to greater risks than securities or instruments that have higher credit ratings, including a higher risk of default. The credit rating of a Corporate Bond and Syndicated Loan that is rated below investment grade does not necessarily address its market value risk, and ratings may from time to time change, positively or negatively, to reflect developments regarding the issuer’s financial condition. Below investment grade Corporate Bonds and Syndicated Loans and similar instruments often are considered to be speculative with respect to the capacity of the Borrower to timely repay principal and pay interest or dividends in accordance with the terms of the obligation and may have more credit risk than higher rated securities. Lower grade securities and similar debt instruments may be particularly susceptible to economic downturns. It is likely that a prolonged or deepening economic recession could adversely affect the ability of some Borrowers issuing such Corporate Bonds, Syndicated Loans and similar debt instruments to repay principal and pay interest on the instrument, increase the incidence of default and severely disrupt the market value of the securities and similar debt instruments.

The secondary market for below investment grade Corporate Bonds and Syndicated Loans and similar instruments may be less liquid than that for higher rated instruments. Because unrated securities may not have an active trading market or may be difficult to value, the Fund might have difficulty selling them promptly at an acceptable price. To the extent that the Fund invests in unrated securities, the Fund’s ability to achieve its investment objectives will be more dependent on the Advisors’ credit analysis than would be the case when the Fund invests in rated securities.

Under normal market conditions, the Fund will invest in Syndicated Loans and Corporate Bonds, and may invest in Subordinated Loans and other debt instruments, rated in the lower rating categories (“Caal” or lower by Moody’s, “CCC+” or lower by S&P or CCC+ or lower by Fitch) or unrated and of comparable quality. For these securities, the risks associated with below investment grade instruments are more pronounced. The Fund may incur additional expenses to the extent it is required to seek recovery upon a default in the payment of principal or interest on its portfolio holdings. In any reorganization or liquidation proceeding relating to an investment, the Fund may lose its entire investment or may be required to accept cash or securities with a value substantially less than its original investment.

Collateralized Loan Obligations Risk. CLOs issue debt securities in tranches with different payment characteristics and different credit ratings. The rated tranches of CLO Debt Securities are generally assigned credit ratings by one or more nationally recognized statistical rating organization (“NRSRO”). Residual tranches are the most junior tranches and do not receive ratings. Below investment grade tranches of CLO Debt Securities typically experience a lower recovery, greater risk of loss or deferral or non-payment of interest than more senior tranches of the CLO.

The transaction documents relating to the issuance of CLO Debt Securities may impose eligibility criteria on the assets of the CLO, restrict the ability of the CLO’s investment manager to trade investments and impose certain portfolio-wide asset quality requirements. These criteria, restrictions and requirements may limit the ability of the CLO’s investment manager to maximize returns on the CLO Debt Securities. In addition, other parties involved in CLOs, such as third party credit enhancers and investors in the rated tranches may impose requirements that have an adverse effect on the returns of the various tranches of CLO Debt Securities. Furthermore, CLO Debt Securities issuance transaction documents generally contain provisions that, in the event that certain tests are not met (generally interest coverage and over-collateralization tests at varying levels in the capital structure), proceeds that would otherwise be distributed to holders of a junior tranche must be diverted to pay down the senior tranches until such tests are satisfied. Failure (or increased likelihood of failure) of a CLO to make timely payments on a particular tranche will have an adverse effect on the liquidity and market value of such tranche.

Payments to holders of CLO Debt Securities may be subject to deferral. If cash flows generated by the underlying assets are insufficient to make all current and, if applicable, deferred payments on CLO Debt Securities, no other assets will be available for payment of the deficiency and, following realization of the underlying assets, the obligations of the issuer of the related CLO Debt Securities to pay such deficiency will be extinguished.

The market value of CLO Debt Securities may be affected by, among other things, changes in the market value of the underlying assets held by the CLO, changes in the distributions on the underlying assets, defaults and recoveries on the underlying assets, capital gains and losses on the underlying assets, prepayments on underlying assets and the availability, prices and interest rate of underlying assets. Furthermore, the leveraged nature of each subordinated class may magnify the adverse impact on such class of changes in the value of the assets, changes in the distributions on the assets, defaults and recoveries on the assets, capital gains and losses on the assets, prepayment on assets and availability, price and interest rates of assets. Finally, CLO Debt Securities are limited recourse and may not be paid in full and may be subject to up to 100% loss.

Commercial Real Estate Lending Investments Risk. The Fund's senior commercial real estate loans are secured by commercial property and are subject to risks of delinquency and foreclosure, and risks of loss that may be greater than similar risks associated with loans made on the security of single-family residential property. The ability of a borrower to repay a loan secured by an income-producing property typically is dependent primarily upon the successful operation of such property rather than upon the existence of independent income or assets of the borrower. If the net operating income of the property is reduced, the borrower's ability to repay the loan may be impaired. Net operating income of an income-producing property can be adversely affected by, among other things,

- tenant mix;
- success of tenant businesses;
- property management decisions;
- property location, condition and design;
- competition from comparable types of properties;
- changes in laws that increase operating expenses or limit rents that may be charged;
- changes in national, regional or local economic conditions and/or specific industry segments, including the credit and securitization markets;
- declines in regional or local real estate values;
- declines in regional or local rental or occupancy rates;
- increases in interest rates, real estate tax rates and other operating expenses;
- costs of remediation and liabilities associated with environmental conditions;
- the potential for uninsured or underinsured property losses;
- changes in governmental laws and regulations, including fiscal policies, zoning ordinances and environmental legislation and the related costs of compliance; and
- acts of God, terrorist attacks, social unrest and civil disturbances.

In the event of any default under a mortgage loan held directly by the Fund, the Fund will bear a risk of loss of principal to the extent of any deficiency between the value of the collateral and the principal and accrued interest of the mortgage loan, which could have a material adverse effect on the Fund's cash flow from operations and limit amounts available for distribution to the Fund's shareholders. In the event of the bankruptcy of a mortgage loan borrower, the mortgage loan to such borrower will be deemed to be secured only to the extent of the value of the underlying collateral at the time of bankruptcy (as determined by the bankruptcy court), and the lien securing the mortgage loan will be subject to the avoidance powers of the bankruptcy trustee or debtor-in-possession to the extent the lien is unenforceable under state law. Foreclosure of a mortgage loan can be an expensive and lengthy process, which could have a substantial negative effect on the Fund's anticipated return on the foreclosed mortgage loan.

Duration and Maturity Risk. The Fund has no fixed policy regarding portfolio maturity or duration. Holding long duration and long maturity investments will expose the Fund to certain magnified risks.

Distressed and Defaulted Debt Risk. The Fund may invest, to a limited extent, in securities, including loans purchased in the secondary market, that are the subject of bankruptcy proceedings or otherwise in default or at risk of being in default as to the repayment of principal and/or interest at the time of acquisition by the Fund (“Distressed Debt”). Investment in Distressed Debt is speculative and involves significant risks.

The Fund may make such investments when the Advisors believe it is reasonably likely that the issuer of Distressed Debt will make an exchange offer or will be the subject of a plan of reorganization pursuant to which the Fund will receive new securities in return for Distressed Debt. There can be no assurance, however, that such an exchange offer will be made or that such a plan of reorganization will be adopted. In addition, a significant period of time may pass between the time at which the Fund makes its investment in Distressed Debt and the time that any such exchange offer or plan of reorganization is completed, if at all. During this period, it is unlikely that the Fund would receive any interest payments on the Distressed Debt, the Fund would be subject to significant uncertainty whether the exchange offer or plan of reorganization will be completed and the Fund may be required to bear certain extraordinary expenses to protect and recover its investment. Therefore, to the extent the Fund seeks capital appreciation through investment in Distressed Debt, the Fund’s ability to achieve current income for its shareholders may be diminished. The Fund also will be subject to significant uncertainty as to when and in what manner and for what value the obligations evidenced by the Distressed Debt will eventually be satisfied (*e.g.*, through a liquidation of the obligor’s assets, an exchange offer or plan of reorganization involving the Distressed Debt or a payment of some amount in satisfaction of the obligation). Even if an exchange offer is made or plan of reorganization is adopted with respect to Distressed Debt held by the Fund, there can be no assurance that the securities or other assets received by the Fund in connection with such exchange offer or plan of reorganization will not have a lower value or income potential than may have been anticipated when the investment was made or no value. Moreover, any securities received by the Fund upon completion of an exchange offer or plan of reorganization may be restricted as to resale. Similarly, if the Fund participates in negotiations with respect to any exchange offer or plan of reorganization with respect to an issuer of Distressed Debt, the Fund may be restricted from disposing of such securities. To the extent that the Fund becomes involved in such proceedings, the Fund may have a more active participation in the affairs of the issuer than that assumed generally by an investor.

Credit Risk. Credit risk is the risk that one or more loans or debt securities in the Fund’s portfolio will decline in price or one or more Borrowers will fail to pay interest or principal when due because one or more Borrowers experiences a decline in its financial condition. While a senior position in the capital structure of a Borrower may provide some protection with respect to the Fund’s investments in Syndicated Loans, losses may still occur because the market value of Syndicated Loans is affected by the creditworthiness of Borrowers and by general economic and specific industry conditions. To the extent the Fund invests in below investment grade Corporate Bonds, Syndicated Loans or other investments, it will be exposed to a greater amount of credit risk than a fund that invests in investment grade securities or loans. Typically, the prices of lower grade securities or loans are more sensitive to negative developments, such as a decline in the Borrower’s revenues or a general economic downturn, than are the prices of higher grade securities or loans.

Credit Ratings Risk. Credit ratings represent only the opinion of a rating agency with respect to the ability of a company to make principal and interest payments on its securities. In determining a credit rating, rating agencies do not evaluate the risks of fluctuations in market value. Further, there may be limits on the effectiveness of the rating agencies’ financial models. For these and other reasons, a credit rating may not fully reflect the risks inherent in the relevant security. Further, a rating agency may have a conflict of interest with respect to a security for which it assigns a particular rating. For example, if the issuer or sponsor of a security pays a rating agency for the analysis of its security, a conflict of interest exists that could affect the reliability of the rating. In addition, credit rating agencies may or may not make timely changes to a rating to reflect changes in the economy or in the conditions of the issuer that affect the market value of the security. In other words, a security or an issuer may maintain a certain credit rating

even though conditions have deteriorated or improved since the rating was issued. Consequently, credit ratings should not necessarily be relied upon as an indicator of investment quality. If a rating agency changes the rating assigned to one or more of the Fund's investments, the Fund is not required to sell the relevant securities.

Covenant Breach Risk. A borrower may fail to satisfy financial or operating covenants imposed by the Fund or other lenders, which could lead to defaults and, potentially, termination of its loans and foreclosure on its secured assets, which could trigger cross-defaults under other agreements and jeopardize such company's ability to meet its obligations under the debt or equity securities that the Fund holds. The Fund may incur expenses to the extent necessary to seek recovery upon default or to negotiate new terms, which may include the waiver of certain financial covenants, with a defaulting company.

Prepayment Risk. During periods of declining interest rates, Borrowers may exercise their option to prepay principal earlier than scheduled. For Corporate Bonds, such payments often occur during periods of declining interest rates, which may require the Fund to reinvest in lower yielding securities, resulting in a possible decline in the Fund's income and dividends to shareholders. This is known as prepayment or "call" risk. Below investment grade Corporate Bonds frequently have call features that allow the issuer to redeem the security at dates prior to its stated maturity at a specified price (typically greater than the stated principal amount) only if certain prescribed conditions are met ("Call Protection"). An issuer may redeem Corporate Bonds if, for example, the issuer can refinance the debt at a lower cost due to declining interest rates or an improvement in the credit standing of the issuer. Fixed income securities may be purchased at prices below or above their stated principal amount. For premium Corporate Bonds (Corporate Bonds acquired at prices that exceed their stated principal amount), prepayment risk may be enhanced given that the Fund would lose the potential value of the yield-to-maturity of the bonds in the event they are redeemed at the stated principal amount.

Syndicated Loans and Subordinated Loans are subject to prepayment risk and typically do not have Call Protection. The degree to which Borrowers prepay Syndicated Loans and Subordinated Loans, whether as a contractual requirement or at their election, may be affected by general business conditions, the financial condition of the Borrower and competitive conditions among Syndicated Loan and Subordinated Loan investors, among others. For these reasons, prepayments cannot be predicted with accuracy. Upon a prepayment, either in part or in full, the outstanding debt from which the Fund derives interest income will be reduced. The Fund may not be able to reinvest the proceeds received on terms as favorable as the prepaid loan.

Short Sales Risk. A short sale is a transaction in which the Fund sells an instrument that it does not own in anticipation that the market price will decline. To deliver the securities to the buyer, the Fund arranges through a broker to borrow the securities and, in so doing, the Fund becomes obligated to replace the securities borrowed at their market price at the time of replacement. When selling short, the Fund intends to replace the securities at a lower price and therefore profit from the difference between the cost to replace the securities and the proceeds received from the sale of the securities. When the Fund makes a short sale, the proceeds it receives from the sale will be held on behalf of a broker until the Fund replaces the borrowed securities. The Fund may have to pay a premium to borrow the securities and must pay any dividends or interest payable on the securities until they are replaced. The Fund's obligation to replace the securities borrowed in connection with a short sale will be secured by collateral deposited with the broker that consists of cash and/or liquid securities. In addition, the Fund will place in a segregated account an amount of cash and/or liquid securities equal to the difference, if any, between (i) the market value of the securities sold at the time they were sold short; and (ii) any cash and/or liquid securities deposited as collateral with the broker in connection with the short sale. Short sales involve certain risks and special considerations. If the Fund incorrectly predicts that the price of the borrowed security will decline, the Fund will have to replace the securities with securities with a greater value than the amount received from the sale. As a result, losses from short sales differ from losses that could be incurred from a purchase of a security because losses from short sales may be unlimited, whereas losses from purchases can equal only the total amount invested.

No Control Over Portfolio Companies. The Fund does not expect to control most of its portfolio companies, although its debt agreements with such portfolio companies may contain certain restrictive covenants. As a result, the Fund is subject to the risk that a portfolio company in which it invests may make

business decisions with which it disagrees and the management of such company, as representatives of the holders of its common equity, may take risks or otherwise act in ways that do not serve the Fund's interests as a debt investor. A portfolio company may make decisions that could decrease the value of the Fund's portfolio holdings. The Fund may not be able to dispose of its interests in its portfolio companies as readily as it would like or at an appropriate valuation, if it invests in non-traded companies. In addition, where the Fund is entitled to occupy a seat on the board of a portfolio company, such involvement may prevent the Fund from freely disposing of its debt investments and may subject the Fund to additional liability or result in re-characterization of its debt investments as equity.

Mezzanine Investments Risk. The Fund may invest in mezzanine debt instruments, which are expected to be unsecured and made in companies with capital structures having significant indebtedness ranking ahead of the investments, all or a significant portion of which may be secured. While the investments may benefit from the same or similar financial and other covenants as those applicable to the indebtedness ranking ahead of the investments and may benefit from cross-default provisions and security over the company's assets, some or all of such terms may not be part of particular investments and the mezzanine debt will be subordinated in recovery to senior classes of debt in the event of a default. Mezzanine investments generally are subject to various risks, including, without limitation: (i) a subsequent characterization of an investment as a "fraudulent conveyance"; (ii) the recovery as a "preference" of liens perfected or payments made on account of a debt in the 90 days before a bankruptcy filing; (iii) equitable subordination claims by other creditors; (iv) so-called "lender liability" claims by the issuer of the obligations; and (v) environmental liabilities that may arise with respect to any collateral securing the obligations.

Convertible Securities Risk. Convertible securities are bonds, debentures, notes, preferred stocks or other securities that may be converted into or exchanged for a specified amount of common stock or other equity security of the same or a different issuer within a particular period of time at a specified price or formula. A convertible security entitles its holder to receive interest that is generally paid or accrued on debt or a dividend that is paid or accrued on preferred stock until the convertible security matures or is redeemed, converted or exchanged. Convertible securities have unique investment characteristics in that they generally: (i) have higher yields than common stocks, but lower yields than comparable non-convertible securities; (ii) are less subject to fluctuation in value than the underlying common stock due to their fixed-income characteristics; and (iii) provide the potential for capital appreciation if the market price of the underlying common stock increases.

The value of a convertible security is a function of its "investment value," or determined by its yield in comparison with the yields of other securities of comparable maturity and quality that do not have a conversion privilege, and its "conversion value," or the security's worth, at market value, if converted into the underlying common stock. The investment value of a convertible security is influenced by changes in interest rates, with investment value declining as interest rates increase and increasing as interest rates decline. The credit standing of the issuer and other factors also may have an effect on the convertible security's investment value. The conversion value of a convertible security is determined by the market price of the underlying common stock. If the conversion value is low relative to the investment value, the price of the convertible security is governed principally by its investment value. To the extent the market price of the underlying common stock approaches or exceeds the conversion price, the price of the convertible security will be increasingly influenced by its conversion value. A convertible security generally will sell at a premium over its conversion value by the extent to which investors place value on the right to acquire the underlying common stock while holding a fixed-income security. Generally, the amount of the premium decreases as the convertible security approaches maturity. Although under normal market conditions longer-term convertible debt securities have greater yields than do shorter-term convertible debt securities of similar quality, they are subject to greater price fluctuations.

A convertible security may be subject to redemption at the option of the issuer at a price established in the convertible security's governing instrument. If a convertible security held by the Fund is called for redemption, the Fund will be required to permit the issuer to redeem the security, convert it into the underlying common stock or sell it to a third party. Any of these actions could have an adverse effect on the Fund's ability to achieve its investment objective.

Equity Securities Risk. The value of equity securities, including common stocks, preferred stocks and convertible stocks, will fluctuate in response to factors affecting the particular company, as well as broader market and economic conditions. Moreover, in the event of a company's bankruptcy, claims of certain creditors, including bondholders, will have priority over claims of holders of common stock and are likely to have varying types of priority over holders of preferred and convertible stock.

Risks Associated with Investments in Equity Securities Incidental to Investments in Syndicated Loans. Investments in equity securities incidental to investments in Syndicated Loans or other debt instruments entail certain risks in addition to those associated with investments in Syndicated Loans or other debt instruments. Because equity is merely the residual value of a Borrower after all claims and other interests, it is inherently more risky than Syndicated Loans or other debt instruments of the same Borrower. The value of the equity securities may be affected more rapidly, and to a greater extent, by company- and industry-specific developments and general market conditions. These risks may increase fluctuations in the NAV of the common shares. The Fund frequently may possess material non-public information about a Borrower as a result of its ownership of a Syndicated Loan or other debt instruments of a Borrower. Because of prohibitions on trading in securities while in possession of material non-public information, the Fund might be unable to enter into a transaction in a security of the Borrower when it would otherwise be advantageous to do so.

Dividends. The Fund may invest in equity securities from time to time. Dividends relating to these equity securities may not be fixed, but may be declared at the discretion of a portfolio company's board of directors. There is no guarantee that a company in which the Fund invests will declare dividends in the future or that, if declared, the dividends will remain at current levels or increase over time.

Derivatives Risk.

Swap Agreements Risk. The Fund may enter into swap agreements, including interest rate and index swap agreements, for hedging purposes, as a form of leverage or to seek to obtain a particular desired return at a lower cost to the Fund than if the Fund had invested directly in an instrument yielding the desired return. Swap agreements are two party contracts entered into primarily by institutional investors for periods ranging from a few weeks to more than one year. In a typical "swap" transaction, two parties agree to exchange the returns (or differentials in rates of return) earned or realized on particular predetermined investments or instruments. Whether the Fund's use of swap agreements will be successful in furthering its investment objective will depend on the Advisors' ability to correctly predict whether certain types of investments are likely to produce greater returns than other investments. Because they are two party contracts and because they may have terms of greater than seven days, some swap agreements may be considered by the Fund to be illiquid. Moreover, the Fund bears the risk of loss of the amount expected to be received under a swap agreement in the event of the default or bankruptcy of a swap agreement counterparty. The Fund may seek to reduce this risk to some extent by entering into a transaction only if the counterparty meets the Advisors' current credit standards for OTC option counterparties. Swap agreements also bear the risk that the Fund will not be able to meet its payment obligations to the counterparty. Generally, the Fund will deposit in a segregated account liquid assets permitted to be so segregated under current regulatory requirements in an amount equal to or greater than the market value of the Fund's liabilities under the swap agreement or the amount it would cost the Fund initially to make an equivalent direct investment plus or minus any amount the Fund is obligated to pay or is to receive under the swap agreement. Restrictions imposed by the tax rules applicable to regulated investment companies may limit the Fund's ability to use swap agreements. The swap market currently is largely unregulated. It is possible that developments in the swap market, including potential significant government regulation, could adversely affect the Fund's ability to enter into or terminate swap agreements or to realize amounts to be received under these agreements. Swap transactions may involve substantial leverage.

The Fund may enter into credit default swap agreements and similar agreements, and may also buy credit-linked securities. Credit default swaps are often structured with significant leverage and may be considered speculative. The credit default swap agreement or similar instrument may have as reference obligations one or more securities that are not currently held by the Fund. The protection "buyer" in a credit default contract may be obligated to pay the protection "seller" an upfront payment or a periodic stream of payments over the term of the contract provided generally that no credit event on a reference

obligation has occurred. If a credit event occurs, the seller generally must pay the buyer the “par value” (full notional value) of the swap in exchange for an equal face amount of deliverable obligations of the reference entity described in the swap, or the seller may be required to deliver the related net cash amount, if the swap is cash settled. The Fund may be either the buyer or seller in the transaction. If the Fund is a buyer and no credit event occurs, the Fund recovers nothing if the swap is held through its termination date. However, if a credit event occurs, the Fund may elect to receive the full notional value of the swap in exchange for an equal face amount of deliverable obligations of the reference entity that may have little or no value. As a seller, the Fund generally receives an upfront payment or a fixed rate of income throughout the term of the swap, which typically is between six months and three years, provided that there is no credit event. If a credit event occurs, generally the seller must pay the buyer the full notional value of the swap in exchange for an equal face amount of deliverable obligations of the reference entity that may have little or no value.

Swaptions Risk. The Fund, to the extent permitted under applicable law, may enter into “swaptions,” which are options on swap agreements on either an asset-based or liability-based basis. A swaption is a contract that gives a counterparty the right (but not the obligation) to enter into a new swap agreement or to shorten, extend, cancel or otherwise modify an existing swap agreement, at some designated future time on specified terms. The Fund may write (sell) and purchase put and call swaptions. Depending on the terms of the particular option agreement, the Fund generally will incur a greater degree of risk when it writes a swaption than it will incur when it purchases a swaption. When the Fund purchases a swaption, it risks losing only the amount of the premium it has paid should it decide to let the option expire unexercised. When the Fund writes a swaption, upon exercise of the option, the Fund will become obligated according to the terms of the underlying agreement.

Credit-Linked Securities Risk. Among the income producing securities in which the Fund may invest are credit-linked securities, which generally are issued by a limited purpose trust or other vehicle that, in turn, invests in a Derivative instrument or basket of Derivative instruments, such as credit default swaps, interest rate swaps and other securities, in order to provide exposure to certain fixed income markets. For instance, the Fund may invest in credit-linked securities as a cash management tool in order to gain exposure to a certain market and/or to remain fully invested when more traditional income producing securities are not available.

Like an investment in a bond, investments in credit-linked securities generally represent the right to receive periodic income payments (in the form of dividends) and payment of principal at the end of the term of the security. However, these payments are conditioned on the issuer’s receipt of payments from, and the issuer’s potential obligations to, the counterparties to the Derivative instruments and other securities in which the issuer invests. For instance, the issuer may sell one or more credit default swaps, under which the issuer would receive a stream of payments over the term of the swap agreements provided that no event of default has occurred with respect to the referenced debt obligation upon which the swap is based. If a default occurs, the stream of payments may stop and the issuer would be obligated to pay the counterparty the par (or other agreed upon value) of the referenced debt obligation. This, in turn, would reduce the amount of income and principal that the Fund would receive as an investor in the issuer. The Fund’s investments in these instruments are indirectly subject to the risks associated with Derivatives, including, among others, credit risk and leverage risk. There may be no established trading market for these securities and they may constitute illiquid investments.

Structured Products Risk.

General. The Fund may invest in structured products, including, without limitation, investment grade rated CLO Debt Securities and structured notes. Holders of structured products bear risks of the underlying investments, index or reference obligation and are subject to counterparty risk.

The Fund may have the right to receive payments only from the structured product, and generally does not have direct rights against the issuer or the entity that sold the assets to be securitized. While certain structured products enable the investor to acquire interests in a pool of securities without the brokerage and other expenses associated with directly holding the same assets, investors in structured products generally pay their share of the structured product’s administrative and other expenses. Although it is difficult to predict whether the prices of indices and securities underlying structured products will rise or fall, these prices (and, therefore, the prices of structured products) will be influenced by the same types of political

and economic events that affect issuers of securities and capital markets generally. If the issuer of a structured product uses shorter-term financing to purchase longer term securities, the issuer may be forced to sell its securities at below market prices if it experiences difficulty in obtaining short-term financing, which may adversely affect the value of the structured products owned by the Fund.

Investments in structured products involve risks, including credit risk and market risk. Certain structured products may be thinly traded or have a limited trading market. Where the Fund's investments in structured products are based upon the movement of one or more factors, including currency exchange rates, interest rates, reference bonds and share indices, depending on the factor used and the use of multipliers or deflators, changes in interest rates and movement of the factor may cause significant price fluctuations. Additionally, changes in the reference instrument or security may cause the interest rate on the structured product to be reduced to zero, and any further changes in the reference instrument may then reduce the principal amount payable on maturity. Structured products may be less liquid than other types of securities and more volatile than the reference instrument or security underlying the product.

The Fund may invest in structured products collateralized by below investment grade or distressed loans or securities. Investments in such structured products are subject to the risks associated with below investment grade securities. Such securities are characterized by high risk. It is likely that an economic recession could severely disrupt the market for such securities and may have an adverse impact on the value of such securities.

Collateralized Debt Obligations. Cash flows in a collateralized debt obligation (“CDO”) are split into two or more tranches, with differing payment characteristics, credit ratings, risks, and yield. The rated tranches of CDO debt securities are generally assigned credit ratings by one or more NRSROs. Residual tranches are the most junior and are not rated. The Fund will not invest in residual tranches and will invest only in rated tranches of CDO debt securities. CDO debt securities are limited recourse and may not be paid in full and may be subject to up to a 100% loss. The riskiest portion is the “equity” tranche, which bears the first loss from defaults from the underlying pool of bonds and serves to protect the other, more senior tranches from default (though such protection is not complete). Since it is partially protected from defaults, a senior tranche from a CDO typically has higher ratings and lower yields than its underlying securities, and may be rated investment grade. Despite the protection from the equity tranche, CDO tranches can experience substantial losses due to actual defaults, downgrades of the underlying collateral by rating agencies, forced liquidation of the collateral pool due to a failure of coverage tests, increased sensitivity to defaults due to collateral default and disappearance of protecting tranches, market anticipation of defaults as well as investor aversion to CDO securities as a class. CDOs carry additional risks including, but not limited to: (i) the possibility that distributions from collateral securities may not be adequate to make interest or other payments; (ii) the risk that the collateral may default or decline in value or be downgraded, if rated by an NRSRO; (iii) the Fund is likely to invest in tranches of CDOs that are subordinate to other tranches; (iv) the structure and complexity of the transaction and the legal documents could lead to disputes among investors regarding the characterization of proceeds; (v) the investment return achieved by the Fund could be significantly different than those predicted by financial models; (vi) the lack of a readily available secondary market for CDOs; (vii) the risk of forced “fire sale” liquidations due to technical defaults such as coverage test failures; and (viii) the CDO's manager may perform poorly.

Risk of Leveraged Loan Market Price Decline. Prior to the onset of the financial crisis, CLOs holding corporate loans, hedge funds and other highly leveraged investment vehicles comprised a substantial portion of the market for purchasing and holding first and second lien secured loans. As the secondary market pricing of the loans underlying these portfolios deteriorated during the fourth quarter of 2008, it is the Fund's understanding that many investors, as a result of their generally high degrees of leverage, were forced to raise cash by selling their interests in performing loans to satisfy margin requirements or the equivalent of margin requirements imposed by their lenders. This resulted in a forced deleveraging cycle of price declines, compulsory sales and further price declines, with widespread redemption requests and other constraints resulting from the credit crisis generating further selling pressure.

Conditions in the leveraged loan market may experience similar disruption or deterioration, which may cause pricing levels to similarly decline or be volatile. As a result, the Fund may suffer unrealized depreciation and could incur realized losses in connection with the sale of the Fund's syndicated loans, which could have a material adverse impact on the Fund's business, financial condition and results of operations.

When-Issued Securities and Forward Commitments. Securities may be purchased on a “forward commitment” or “when-issued” basis, meaning securities are purchased or sold with payment and delivery taking place in the future, to secure what is considered to be an advantageous price and yield at the time of entering into the transaction. However, the return on a comparable security when the transaction is consummated may vary from the return on the security at the time that the forward commitment or when-issued transaction was made. From the time of entering into the transaction until delivery and payment is made at a later date, the securities that are the subject of the transaction are subject to market fluctuations. In forward commitment or when-issued transactions, if the seller or buyer, as the case may be, fails to consummate the transaction, the counterparty may miss the opportunity of obtaining a price or yield considered to be advantageous. Forward commitment or when-issued transactions may occur a month or more before delivery is due. However, no payment or delivery is made until payment is received or delivery is made from the other party to the transaction.

Repurchase Agreements and Reverse Repurchase Agreements Risk. Repurchase agreements carry certain risks not associated with direct investments in securities, including a possible decline in the market value of the underlying obligations. If their value becomes less than the repurchase price, plus any agreed-upon additional amount, the counterparty must provide additional collateral so that at all times the collateral is at least equal to the repurchase price plus any agreed-upon additional amount. The difference between the total amount to be received upon repurchase of the obligations and the price that was paid by the Fund upon acquisition is accrued as interest and included in its net investment income.

Repurchase agreements involving obligations other than U.S. Government securities (such as commercial paper and Corporate Bonds) may be subject to special risks and may not have the benefit of certain protections in the event of the counterparty’s insolvency. In the event of the bankruptcy or other default of a seller of a repurchase agreement, the Fund could experience both delays in liquidating the underlying securities and losses, including (i) possible decline in the value of the underlying security during the period in which the Fund seeks to enforce its rights thereto; (ii) possible lack of access to income on the underlying security during this period; and (iii) expenses of enforcing its rights.

Reverse repurchase agreements involve the risk that the buyer of the securities sold by the Fund might be unable to deliver them when the Fund seeks to repurchase. In the event that the buyer of securities under a reverse repurchase agreement files for bankruptcy or becomes insolvent, the buyer, trustee or receiver may receive an extension of time to determine whether to enforce the Fund’s obligation to repurchase the securities, and the Fund’s use of the proceeds of the reverse repurchase agreement may effectively be restricted pending such decision.

U.S. Government Debt Securities Risk. U.S. Government debt securities historically have not involved the credit risks associated with investments in other types of debt securities, although, as a result, the yields available from U.S. Government debt securities are generally lower than the yields available from other securities. Like other debt securities, however, the values of U.S. Government securities change as interest rates fluctuate and in 2011 the credit rating of the United States was downgraded. Fluctuations in the value of portfolio securities will not affect interest income on existing portfolio securities but will be reflected in the Fund’s NAV. Because the magnitude of these fluctuations will generally be greater at times when the Fund’s average maturity is longer, under certain market conditions, the Fund may, for temporary defensive purposes, accept lower current income from short-term investments rather than investing in higher yielding long-term securities.

Counterparty Risk. The Fund’s investments may be exposed to the credit risk of the counterparties with which, or the dealers, brokers and exchanges through which, the Fund deals, whether in exchange-traded or OTC transactions. The Fund may be subject to the risk of loss of Fund assets on deposit or being settled or cleared with a broker in the event of the broker’s bankruptcy, the bankruptcy of any clearing broker through which the broker executes and clears transactions on behalf of the Fund, the bankruptcy of an exchange clearing house or the bankruptcy of any other counterparty. In the case of any such bankruptcy, it is expected that all securities and other assets deposited with such broker or dealer will be clearly identified as being assets of the Fund and the Fund should not be exposed to a credit risk with regard to such parties. However, it may not always be possible to achieve this and the Fund might recover, even in respect of property specifically traceable to the Fund, only a *pro rata* share of all property available for distribution to all of the counterparty’s customers and counterparties. Such an amount may be less than the amounts owed to the Fund. Such events would have an adverse effect on the Fund’s NAV.

Liquidity Risk. The Fund generally considers “illiquid securities” to be securities or loans that cannot be sold within seven days in the ordinary course of business at approximately the value used by the Fund in determining its NAV. The Fund may not be able to readily dispose of such securities or loans at prices that approximate those at which the Fund could sell the securities or loans if they were more widely traded and, as a result of that illiquidity, the Fund may have to sell other investments or engage in borrowing transactions if necessary to raise cash to meet its obligations. Limited liquidity can also affect the market price of securities, thereby adversely affecting the Fund’s NAV and ability to make dividend distributions.

Some Syndicated Loans are not readily marketable and may be subject to restrictions on resale. Syndicated Loans generally are not listed on any national securities exchange and no active trading market may exist for the Syndicated Loans in which the Fund may invest. When a secondary market exists, if at all, the market for some Syndicated Loans may be subject to irregular trading activity, wide bid/ask spreads and extended trade settlement periods. The Fund has no limitation on the amount of its assets that may be invested in securities that are not readily marketable or are subject to restrictions on resale.

Valuation Risk. Where possible, the Fund utilizes independent pricing services approved by the Board to value certain portfolio instruments at their market value. If the pricing services are unable to provide a market value or if a significant event occurs such that the valuation(s) provided are deemed unreliable, the Fund may value portfolio instrument(s) at their fair value, which is generally the amount an owner might reasonably expect to receive upon a current sale. Valuation risks associated with investing in Syndicated Loans including, but not limited to: a limited number of market participants compared to publicly traded investment grade securities, a lack of publicly available information about some borrowers, resale restrictions, settlement delays, corporate actions and adverse market conditions may make it difficult to value or sell such instruments.

A large percentage of the Fund’s portfolio investments are not publicly traded. The fair value of investments that are not publicly traded may not be readily determinable. The Fund values these investments at fair value as determined in good faith by the Board. The types of factors that may be considered in valuing the Fund’s investments include the enterprise value of the portfolio company (the entire value of the portfolio company to a market participant, including the sum of the values of debt and equity securities used to capitalize the enterprise at a point in time), the nature and realizable value of any collateral, the portfolio company’s ability to make payments and its earnings and discounted cash flows, the markets in which the portfolio company does business, a comparison of the portfolio company’s securities to similar publicly traded securities, changes in the interest rate environment and the credit markets generally that may affect the price at which similar investments would trade in their principal markets and other relevant factors. When an external event such as a purchase transaction, public offering or subsequent equity sale occurs, the Fund considers the pricing indicated by the external event to corroborate the Fund’s valuation. Because such valuations, and particularly valuations of private investments and private companies, are inherently uncertain, may fluctuate over short periods of time and may be based on estimates, the Fund’s determinations of fair value may differ materially from the values that would have been used if a ready market for these investments existed and may differ materially from the values that the Fund may ultimately realize. The Fund’s NAV per share could be adversely affected if the Fund’s determinations regarding the fair value of these investments are higher than the values that the Fund realizes upon disposition of such investments.

Leverage Risk. The Fund intends to utilize leverage and may utilize leverage to the maximum extent permitted by law for investment and other general corporate purposes. The Fund may obtain leverage by issuing preferred shares and/or notes and it may also borrow funds from banks and other financial institutions. The Fund may also gain leverage synthetically through swaps and other Derivatives. The use of leverage to purchase additional securities creates an opportunity for increased common share dividends, but also creates risks for the Fund’s common shareholders, including increased variability of the Fund’s net income, distributions, NAV and/or market price of its common shares in relation to market changes. Leverage is a speculative technique that exposes the Fund to greater risk and increased costs than if it were not implemented. Increases and decreases in the value of the Fund’s portfolio will be magnified if the Fund uses leverage. In particular, leverage may magnify interest rate risk, which is the risk that the prices of portfolio securities will fall (or rise) if market interest rates for those types of securities rise (or fall). As a result, leverage may cause greater changes in the Fund’s NAV, which will be borne entirely by the Fund’s

common shareholders, and in the price at which its common shares trade in the secondary market. To the extent that the Fund makes investments in Syndicated Loans or other debt instruments structured with LIBOR floors, the Fund will not realize additional income if rates increase during periods when LIBOR remains below the LIBOR floor but the Fund's cost of financing is expected to increase, resulting in the potential for a decrease in the level of income available for dividends or distributions made by the Fund. If the Fund issues preferred shares and/or notes or engages in other borrowings, it will have to pay dividends on its preferred shares or interest on its notes or borrowings, which will increase expenses and may reduce the Fund's return. These dividend payments or interest expenses (which will be borne entirely by common shareholders) may be greater than the Fund's return on the underlying investments. The Fund's leveraging strategy, if utilized, may not be successful.

The Fund may issue preferred shares and/or notes or other forms of indebtedness as a form of leverage. These means of obtaining leverage would be senior to the Fund's common shares, such that holders of preferred shares and/or notes or other Fund indebtedness would have priority over the common shareholders in the distribution of the Fund's assets, including dividends, distributions of principal and liquidating distributions. If preferred shares are issued and outstanding, holders of preferred shares would vote together with the holders of common shares on all matters, including the election of trustees. Additionally, holders of preferred shares would have the right separately to elect two trustees of the Fund, voting separately as a class, and would vote separately as a class on certain matters which may at times give holders of preferred shares disproportionate influence over the Fund's affairs. If the preferred shares were limited in their term, redemptions of such preferred shares would require the Fund to liquidate its investments and would reduce the Fund's use of leverage, which could negatively impact common shareholders. In addition, if the Fund elects to issue preferred shares and/or notes (or other forms of indebtedness) its ability to make distributions to its common shareholders or to repurchase its shares will be limited by the asset coverage requirements and other limitations imposed by the 1940 Act and the Fund's lenders.

The Fund will pay (and common shareholders will bear) all costs and expenses relating to the issuance and ongoing maintenance of any preferred shares and/or notes or other forms of indebtedness issued by the Fund, including higher advisory fees. As a result, the Fund cannot assure you that the issuance of preferred shares and/or notes or other forms of indebtedness will provide a higher yield or return to the holders of the Fund's common shares. If the Fund offers and/or issues preferred shares and/or notes or other forms of indebtedness, the costs of the offering will be borne immediately by the Fund's common shareholders and result in a reduction of the NAV of the Fund's common shares.

The Fund anticipates that any money borrowed from a bank or other financial institution for investment purposes will accrue interest based on shorter-term interest rates that would be periodically reset. So long as the Fund's portfolio provides a higher rate of return, net of expenses, than the interest rate on borrowed money, as reset periodically, the leverage may cause common shareholders to receive a higher current rate of return than if the Fund were not leveraged. If, however, long-term and/or short-term rates rise, the interest rate on borrowed money could exceed the rate of return on securities held by the Fund, reducing returns to common shareholders. Developments in the credit markets may adversely affect the ability of the Fund to borrow for investment purposes and may increase the costs of such borrowings, which would reduce returns to common shareholders.

There is no assurance that a leveraging strategy will be successful. Leverage involves risks and special considerations for common shareholders, including:

- the likelihood of greater volatility of NAV, market price and dividend rate of common shares than a comparable portfolio without leverage;
- the risk that fluctuations in interest rates on borrowings or in dividend payments on, principal proceeds distributed to, or redemption of any preferred shares and/or notes or other forms of indebtedness that the Fund has issued will reduce the return to the common shareholders;
- the effect of leverage in a declining market, which is likely to cause a greater decline in the NAV of the Fund's common shares than if the Fund were not leveraged, which may result in a greater decline in the market price of the Fund's common shares;

- when the Fund uses financial leverage, the investment advisory fees payable to the Advisors will be higher than if the Fund did not use leverage, and may provide a financial incentive to the Advisors to increase the Fund's use of leverage and create an inherent conflict of interest; and
- leverage may increase expenses (which will be borne entirely by common shareholders), which may reduce total return.

If the Fund issues preferred shares and/or notes or other forms of indebtedness, the Fund may be subject to certain restrictions on investments imposed by the guidelines of one or more rating agencies, which may issue ratings for the preferred shares and/or notes or short-term debt securities issued by the Fund, or may be subject to covenants or other restrictions imposed by its lenders. These guidelines may impose asset coverage or portfolio composition requirements that are more stringent than those imposed by the 1940 Act. Certain types of borrowings by the Fund may result in the Fund being subject to covenants relating to asset coverage and portfolio composition requirements. These covenants and restrictions may negatively affect the Fund's ability to achieve its investment objective.

Effects of Leverage. Assuming that borrowings represent approximately 16.04% of the Fund's Managed Assets, as of December 31, 2020, and that the Fund bears expenses relating to such borrowings at an annual effective interest rate of 1.63% (based on interest rates for such borrowings as of a recent date), the annual return that the Fund's portfolio must experience (net of expenses not related to borrowings) in order to cover the costs of such borrowings would be approximately 0.25%. These figures are estimates based on current market conditions, used for illustration purposes only. Actual expenses associated with borrowings used by the Fund may vary frequently and may be significantly higher or lower than the rate used for the example above.

The following table is designed to illustrate the effects of the Fund's leverage due to borrowings on corresponding Share total return, assuming investment portfolio total returns (consisting of income and changes in the value of investments held in the Fund's portfolio) of -10%, -5%, 0%, 5% and 10%. These assumed investment portfolio returns are hypothetical figures and are not necessarily indicative of the investment portfolio returns expected to be experienced by the Fund. The table further assumes that the Fund's borrowings represent approximately 16.04% of the Fund's Managed Assets and an annual rate of interest of 1.63% (as discussed above). Your actual returns may be greater or less than those appearing below.

Assumed Return on Portfolio (Net of Expenses not related to borrowings)	(10.00)%	(5.00)%	0.00%	5.00%	10.00%
Corresponding Share Total Return	(12.90)%	(6.61)%	(0.31)%	5.99%	12.28%

Corresponding Share total return is composed of the Share dividends paid by the Fund (the amount of which is largely determined by the net investment income of the Fund after paying interest expenses on the Fund's borrowings) and gains or losses on the value of the securities the Fund owns.

Warrants Risk. Warrants give holders the right, but not the obligation, to buy common stock of an issuer at a given price, usually higher than the market price at the time of issuance, during a specified period. The risk of investing in a warrant is that the warrant may expire prior to the market value of the common stock exceeding the price fixed by the warrant. Warrants have a subordinate claim on a borrower's assets compared with Syndicated Loans. As a result, the values of warrants generally are dependent on the financial condition of the borrower and less dependent on fluctuations in interest rates than are the values of many debt securities. The values of warrants may be more volatile than those of Syndicated Loans or Corporate Bonds and this may increase the volatility of the NAV of the common shares.

Contingent Liabilities. From time to time the Fund may incur contingent liabilities in connection with an investment. For example, the Fund may purchase a revolving credit facility from a lender that has not yet been fully drawn. If the borrower subsequently draws down on the facility, the Fund would be obligated to fund the amounts due. The Fund may also enter into agreements pursuant to which it agrees to assume responsibility for default risk presented by a third party, and may, on the other hand, enter into agreements through which third parties offer default protection to the Fund.

Cost of Capital and Net Investment Income Risk. If the Fund uses debt to finance investments, its net investment income may depend, in part, upon the difference between the rate at which it borrows funds and the rate at which it invests those funds. As a result, the Fund can offer no assurance that a significant change in market interest rates will not have a material adverse effect on the Fund's net investment income. In periods of rising interest rates when it has debt outstanding, the Fund's cost of funds will increase, which could reduce the Fund's net investment income. The Fund may use interest rate risk management techniques in an effort to limit its exposure to interest rate fluctuations. These techniques may include various interest rate hedging activities to the extent permitted by the 1940 Act. These activities may limit its ability to participate in the benefits of lower interest rates with respect to the hedged portfolio. Adverse developments resulting from changes in interest rates or hedging transactions could have a material adverse effect on the Fund's business, financial condition and results of operations.

A rise in the general level of interest rates can be expected to lead to higher interest rates applicable to the Fund's debt investments, particularly to the extent that it holds floating rate debt securities. Accordingly, an increase in interest rates would make it easier for the Fund to meet or exceed the Incentive Fee hurdle rate and may result in a substantial increase to the amount of Incentive Fees payable to the Advisors with respect to pre-incentive fee net investment income. See "Management and Incentive Fees."

Distressed Investments, Litigation, Bankruptcy and Other Proceedings Risk. Investments in distressed securities involve a material risk of involving the Fund in a related litigation. Such litigation can be time consuming and expensive, and can frequently lead to unpredicted delays or losses. Litigation expenses, including payments pursuant to settlements or judgments, generally will be borne by the Fund.

There are a number of significant risks when investing in companies involved in bankruptcy or other reorganization proceedings, and many events in a bankruptcy are the product of contested matters and adversary proceedings which are beyond the control of the creditors. A bankruptcy filing may have adverse and permanent effects on a company. Further, if the proceeding is converted to a liquidation, the liquidation value of the company may not equal the liquidation value that was believed to exist at the time of the investment. In addition, the duration of a bankruptcy or other reorganization proceeding is difficult to predict. A creditor's return on investment can be impacted adversely by delays while a plan of reorganization is being negotiated, approved by the creditors and, if applicable, confirmed by the bankruptcy court, and until it ultimately becomes effective. In bankruptcy, certain claims, such as claims for taxes, wages and certain trade claims, may have priority by law over the claims of certain creditors and administrative costs in connection with a bankruptcy proceeding are frequently high and will be paid out of the debtor's estate prior to any return to creditors.

Certain fixed-income securities invested in by the Fund could be subject to U.S. federal, state or non-U.S. bankruptcy laws or fraudulent transfer or conveyance laws, if such securities were issued with the intent of hindering, delaying or defrauding creditors or, in certain circumstances, if the issuer receives less than reasonably equivalent value or fair consideration in return for issuing such securities. If a court were to find that the issuance of the securities was a fraudulent transfer or conveyance, the court could void the payment obligations under the securities, further subordinate the securities to other existing and future indebtedness of the issuer or require the Fund to repay any amounts received by it with respect to the securities. In the event of a finding that a fraudulent transfer or conveyance occurred, the Fund may not receive any payment on the securities. If the Fund or the Advisors is found to have interfered with the affairs of a company in which the Fund holds a debt investment, to the detriment of other creditors or common shareholders of such company, the Fund may be held liable for damages to injured parties or a bankruptcy court. While the Fund will attempt to avoid taking the types of action that would lead to such liability, there can be no assurance that such claims will not be asserted or that the Fund will be able to successfully defend against them. Moreover, such debt may be disallowed or subordinated to the claims of other creditors or treated as equity.

Insofar as the Fund's portfolio includes obligations of non-United States obligors, the laws of certain foreign jurisdictions may provide for avoidance remedies under factual circumstances similar to those described above or under different circumstances, with consequences that may or may not be analogous to those described above under U.S. federal or state laws. Changes in bankruptcy laws (including U.S. federal and state laws and applicable non-United States laws) may adversely impact the Fund's securities.

Lender Liability Risk. A number of U.S. judicial decisions have upheld judgments of borrowers against lending institutions on the basis of various evolving legal theories, collectively termed “lender liability”. Generally, lender liability is founded on the premise that a lender has violated a duty (whether implied or contractual) of good faith, commercial reasonableness and fair dealing, or a similar duty owed to the Borrower or has assumed an excessive degree of control over the Borrower resulting in the creation of a fiduciary duty owed to the Borrower or its other creditors or shareholders. Because of the nature of its investments, the Fund may be subject to allegations of lender liability.

In addition, under common law principles that in some cases form the basis for lender liability claims, if a lender or bondholder (i) intentionally takes an action that results in the undercapitalization of a Borrower to the detriment of other creditors of such Borrower; (ii) engages in inequitable conduct to the detriment of the other creditors; (iii) engages in fraud with respect to, or makes misrepresentations to, the other creditors; or (iv) uses its influence as a shareholder to dominate or control a Borrower to the detriment of other creditors of the Borrower, a court may elect to subordinate the claim of the offending lender or bondholder to the claims of the disadvantaged creditor or creditors, a remedy called “equitable subordination”.

Because affiliates of, or persons related to, the Advisors may hold equity or other interests in obligors of the Fund, the Fund could be exposed to claims for equitable subordination or lender liability or both based on such equity or other holdings.

Sourcing of Suitable Assets Risk. No assurance can be given the Advisors will be able to find enough appropriate investments that meet the Fund’s investment criteria.

Reinvestment Risk. The Fund may reinvest the cash flows received from a security. There is a risk that the interest rate at which interim cash flows can be reinvested will fall. Reinvestment risk is greater for longer holding periods and for securities with large, early cash flows such as high-coupon bonds. Reinvestment risk also applies generally to the reinvestment of the proceeds the Fund receives upon the maturity or sale of an investment in a portfolio company.

Dilutive Effect of Receiving Cash Distributions Rather than Reinvesting Risk. Investors in the Fund will automatically participate in the DRP unless they affirmatively elect to “opt out” of the plan. All dividends declared in cash payable to shareholders that are participants in the DRP are generally automatically reinvested in common shares. As a result, shareholders that do not participate in the DRP may experience dilution over time to the extent participants in the plan receive such common shares at a price below NAV.

Small-Cap and Mid-Cap Risk. The Fund may invest from time to time in smaller and midsize companies and the securities of such portfolio companies tend to be more volatile and less liquid than those of larger companies. The markets for these securities are also less liquid than those for larger companies. This can adversely affect the prices at which the Fund can purchase and sell these securities, and thus the value of the Shares.

Privately Held Middle-Market Company Risk. The Fund’s direct lending investments primarily represent investments in privately held U.S. middle-market companies. Investments in privately held middle-market companies involve a number of significant risks, including the following:

- these companies may have limited financial resources and may be unable to meet their obligations, which may be accompanied by a deterioration in the value of any collateral and a reduction in the likelihood of the Fund realizing any guarantees it may have obtained in connection with its investment;
- they typically have shorter operating histories, narrower product lines and smaller market shares than larger businesses, which tend to render them more vulnerable to competitors’ actions and market conditions, as well as general economic downturns;
- they typically depend on the management talents and efforts of a small group of persons; therefore, the death, disability, resignation or termination of one or more of these persons could have a material adverse effect on the Fund’s portfolio company and, in turn, on us;

- there is generally little public information about these companies. These companies and their financial information are not subject to the Exchange Act and other regulations that govern public companies, and the Fund may be unable to uncover all material information about these companies, which may prevent the Fund from making a fully informed investment decision and cause us to lose money on the Fund's investments;
- they generally have less predictable operating results and may require substantial additional capital to support their operations, finance expansion or maintain their competitive position;
- the Fund's executive officers, trustees and the Advisors may, in the ordinary course of business, be named as defendants in litigation arising from the Fund's investments in the Fund's portfolio companies;
- changes in laws and regulations, as well as their interpretations, may adversely affect their business, financial structure or prospects; and
- they may have difficulty accessing the capital markets to meet future capital needs.

Fraud Risk. A major concern when investing in loans and other debt securities is the possibility of a material misrepresentation or omission on the part of the borrower. Such inaccuracy or incompleteness may adversely affect the valuation of the collateral underlying the loans or may adversely affect the ability of the Fund to perfect or effectuate a lien on the collateral securing the loan. The Fund relies upon the accuracy and completeness of representations made by borrowers to the extent reasonable when it makes its investments, but cannot guarantee such accuracy or completeness. Under certain circumstances, payments to the Fund may be reclaimed if any such payment or distribution is later determined to have been a fraudulent conveyance or a preferential payment.

Risks Relating to the Fund's Investment Program

Market and Economic Risks. The Fund and its portfolio companies may be materially affected by market, economic and political conditions globally and in the jurisdictions and sectors in which they invest or operate, including factors affecting interest rates, the availability of credit, currency exchange rates and trade barriers. These factors are outside the Fund's control and could adversely affect the liquidity and value of its investments, and may reduce the ability of the Fund to make attractive new investments.

In particular, economic and financial market conditions began to significantly deteriorate in 2008. Global financial markets experienced considerable declines in the valuations of debt and equity securities, an acute contraction in the availability of credit and the failure of a number of leading financial institutions. As a result, certain government bodies and central banks worldwide, including the U.S. Treasury Department and the U.S. Federal Reserve, undertook unprecedented intervention programs, the long-term effects of which remain uncertain. Trends and historical events do not imply, forecast or predict future events and past performance is not necessarily indicative of future results. There can be no assurance that the assumptions made or the beliefs and expectations currently held by the Advisors or their affiliates will prove correct, and actual events and circumstances may vary significantly.

The Fund may be subject to risk arising from a default by one of several large institutions that are dependent on one another to meet their liquidity or operational needs, so that a default by one institution may cause a series of defaults by the other institutions. This is sometimes referred to as "systemic risk" and may adversely affect Financial Intermediaries, such as clearing agencies, clearing houses, banks, securities firms and exchanges, with which the Fund interacts on a daily basis.

Instability in the credit markets has made it more difficult at certain times for a number of issuers of debt instruments to obtain financing or refinancing for their investment or lending activities or operations. In particular, because of volatile conditions in the credit markets, issuers of debt instruments may be subject to increased cost for debt, tightening underwriting standards and reduced liquidity for loans they make, securities they purchase and securities they issue. Certain Borrowers may, due to macroeconomic conditions, be unable to repay their Syndicated Loans or other debt obligations because of these conditions. A Borrower's failure to satisfy financial or operating covenants imposed by lenders could lead to defaults and, potentially, termination of the Syndicated Loans and foreclosure on the underlying secured assets,

which could trigger cross-defaults under other agreements and jeopardize a Borrower's ability to meet its obligations under its debt instruments. The Fund may incur expenses to the extent necessary to seek recovery upon default or to negotiate new terms with a defaulting Borrower. The Fund may also experience a loss of principal.

These developments also (i) may make it more difficult for the Fund to accurately value its portfolio securities or to sell its portfolio securities on a timely basis; (ii) could adversely affect the ability of the Fund to use leverage for investment purposes and increase the cost of such leverage, which would reduce returns to the common shareholders; and (iii) may adversely affect the broader economy, which in turn may adversely affect the ability of issuers of securities owned by the Fund to make payments of principal and interest when due, lead to lower credit ratings of the issuer and increased defaults by the issuer. Such developments could, in turn, reduce the value of securities owned by the Fund and adversely affect the NAV and market price of the common shares.

Non-U.S. Securities Risk. The Fund may invest in securities, including direct loans, Syndicated Loans and Subordinated Loans, of non-U.S. issuers or Borrowers. These investments involve certain risks not involved in domestic investments and may experience more rapid and extreme changes in value than investments in securities of U.S. companies. Markets for these investments in foreign countries often are not as developed, efficient or liquid as similar markets in the United States, and therefore, the prices of non-U.S. securities may be more volatile. Certain foreign countries may impose restrictions on the ability of issuers of non-U.S. securities to make payments of principal and interest to investors located outside the country, whether from currency blockage or otherwise. In addition, the Fund will be subject to risks associated with adverse political and economic developments in foreign countries, including seizure or nationalization of foreign deposits, different legal systems and laws relating to creditors' rights and the potential inability to enforce legal judgments, all of which could cause the Fund to lose money on its investments in non-U.S. securities. Generally, there is less readily available and reliable information about non-U.S. issuers or Borrowers due to less rigorous disclosure or accounting standards and regulatory practices. The ability of a foreign sovereign issuer to make timely payments on its debt obligations will also be strongly influenced by the sovereign issuer's balance of payments, including export performance, its access to international credit facilities and investments, fluctuations of interest rates and the extent of its foreign reserves. The cost of servicing external debt generally will also be adversely affected by rising international interest rates, as many external debt obligations bear interest at rates that are adjusted based upon international interest rates. Investments in so-called "emerging markets" (or lesser developed countries) are particularly speculative and entail all of the risks of investing in non-U.S. securities but to a heightened degree. Compared to developed countries, emerging market countries may have relatively unstable governments, economies based on only a few industries and securities markets that trade a small number of securities. Securities issued by companies located in emerging market countries tend to be especially volatile and may be less liquid than securities traded in developed countries. Additionally, companies in emerging market countries may not be subject to accounting, auditing, financial reporting and recordkeeping requirements that are as robust as those in more developed countries.

Foreign Currency Risk. Because the Fund may invest in securities denominated or quoted in currencies other than the U.S. dollar, changes in foreign currency exchange rates may affect the value of securities in the Fund and the unrealized appreciation or depreciation of investments. Currencies of certain countries may be volatile and therefore may affect the value of securities denominated in such currencies, which means that the Fund's NAV could decline as a result of changes in the exchange rates between foreign currencies and the U.S. dollar. The Advisors may, but are not required to, elect for the Fund to seek to protect itself from changes in currency exchange rates through hedging transactions depending on market conditions. The Fund may incur costs in connection with the conversions between various currencies. In addition, certain countries may impose foreign currency exchange controls or other restrictions on the repatriation, transferability or convertibility of currency.

Currency Hedging Risk. The Advisors may seek to hedge all or a portion of the Fund's foreign currency risk. However, the Advisors cannot guarantee that it will be practical to hedge these risks in certain markets or conditions or that any efforts to do so will be successful.

Arbitrage Risk. The Fund may engage in capital structure arbitrage and other arbitrage strategies. Arbitrage strategies entail various risks, including the risk that external events, regulatory approvals and

other factors will impact the consummation of announced corporate events and/or the prices of certain positions. In addition, hedging is an important feature of capital structure arbitrage. There is no guarantee that the Advisors will be able to hedge the Fund's investment portfolio in the manner necessary to employ successfully the Fund's strategy.

Market Disruption and Geopolitical Risk. Disease outbreaks, public health emergencies (e.g. the coronavirus outbreak, epidemics and other pandemics), the European sovereign debt crisis, instability in the Middle East, Afghanistan and Pakistan, the aftermath of the war in Iraq, terrorist attacks in the United States and around the world, the impact of natural disasters, growing social and political discord in the United States, the European debt crisis, the response of the international community—through economic sanctions and otherwise—to Russia's annexation of the Crimea region of Ukraine and posture vis-a-vis Ukraine, increasingly strained relations between the United States and a number of foreign countries, including traditional allies, such as certain European countries, and historical adversaries, such as North Korea, Iran, China and Russia, and the international community generally, new and continued political unrest in various countries, such as Venezuela and Spain, and other similar events may result in market volatility, may have long-term adverse effects on the United States and worldwide financial markets and may cause further economic uncertainties in the United States and worldwide. The Fund does not know how long the financial markets may be affected by these events and cannot predict the effects of these events or similar events in the future on the U.S. and global economies and financial markets. Wars and occupation, terrorism and related geopolitical risks have led, and may in the future lead, to increased short-term market volatility and may have adverse long-term effects on U.S. and global economies and markets generally. These events could have an acute effect on individual issuers or related groups of issuers. These events could also impact interest rates, secondary trading, ratings, credit risk, inflation and other factors relating to an investment in the common shares. The Fund may be adversely affected by abrogation of international agreements and national laws which have created the market instruments in which the Fund may invest, failure of the designated national and international authorities to enforce compliance with the same laws and agreements, failure of local, national and international organization to carry out their duties prescribed to them under the relevant agreements, revisions of these laws and agreements which dilute their effectiveness or conflicting interpretation of provisions of the same laws and agreements. Syndicated Loans and Corporate Bonds rated below investment grade and investments with similar characteristics tend to be more volatile than investment grade fixed income securities and, as a result, these events and other market disruptions may have a greater impact on the prices and volatility of such instruments than on investment grade fixed income securities. There can be no assurance that such market disruptions may not have other material and adverse implications for the Syndicated Loan and Corporate Bond markets or other markets in which the Fund may invest.

Recently, many countries have experienced outbreaks of an infectious respiratory illness caused by a unique strain of coronavirus ("COVID-19"), including markets for the securities the Fund holds, which has and will likely to continue to adversely affect the Fund's investments and operations. The transmission of COVID-19 and efforts to contain its spread has resulted in the imposition of both local and more widespread "work from home" and other quarantine measures, including travel restrictions and disruptions, closed international borders, enhanced health screenings at ports of entry and elsewhere, disruption of and delays in healthcare service preparation and delivery, event and service cancellations or interruptions, disruptions to business operations (including staff furloughs and reductions) and supply chains, and a substantial reduction in consumer spending and business revenue and spending, as well as general concern and uncertainty that has negatively affected the economy. As a result, COVID-19 has significantly diminished global economic production and activity of all kinds and contributed to both volatility and declines in markets for financial assets as well as commodities and other assets. Among other things, these unprecedented developments have resulted in material reductions in demand across some, many or all categories of consumers and businesses, dislocation (or in some cases a complete halt) in the credit and capital markets, labor force and operational disruptions, slowing or complete idling of certain supply chains and manufacturing activity, and strain and uncertainty for businesses and households.

The foregoing developments have had adverse, and potentially materially adverse, consequences for certain companies and other issuers in which the Fund invests and the value of the Fund's investments therein. Certain industries are likely to be particularly acutely impacted, for instance industries dependent on travel and public accessibility, such as transportation, hospitality, tourism, retail, sports and

entertainment and industries related to natural resources production and development. Additionally, the operations of the Adviser (including those relating to the Fund) could be impacted adversely, including through quarantine measures and travel restrictions imposed on the Adviser's or service providers' personnel located in affected countries, regions or local areas, or any related health issues of such personnel. Such impacts could materially and adversely affect the Adviser's ability to source, manage and divest investments on behalf of the Fund and pursue the Fund's investment objectives and strategies. Similar consequences could arise with respect to other infectious diseases. The disruptions associated with the COVID-19 pandemic may lead to a significant economic downturn or recession, increased market volatility, increased market closures, higher default rates and material adverse effects on the values and liquidity of securities or other assets which in turn could materially adversely affect the valuation and performance of the Fund's investments. In addition, such disruptions could have adverse consequences on the Fund's liquidity and its ability to meet its obligations. Further, in certain cases, an exchange or market may close or issue trading halts on specific securities or even the entire market, which may result in the Fund being, among other things, unable to buy or sell certain securities or financial instruments or to accurately price its investments.

U.S. Credit Rating and European Economic Crisis Risk. In August 2011, S&P lowered its long-term sovereign credit rating on the United States from "AAA" to "AA+," which was re-affirmed by S&P in June 2016. In January 2012, S&P lowered its long-term sovereign credit ratings for France, Italy, Spain and six other European countries, which negatively impacted global markets and economic conditions. During subsequent periods, S&P further lowered its long-term sovereign credit rating for Spain. S&P subsequently raised its long-term sovereign credit rating on Spain to "BBB," but its current credit rating still signifies significant ongoing risk. Recent U.S. budget deficit concerns, together with signs of deteriorating sovereign debt conditions in Europe, have increased the possibility of additional credit-rating downgrades and economic slowdowns. The impact of any further downgrade to the U.S. government's sovereign credit rating, or its perceived creditworthiness, and the impact of the current crisis in Europe with respect to the ability of certain European Union ("EU") countries to continue to service their sovereign debt obligations is inherently unpredictable and could adversely affect the U.S. and global financial markets and economic conditions. In addition, the economic downturn and the significant government interventions into the financial markets and fiscal stimulus spending over the last several years have contributed to significantly increased U.S. budget deficits. There can be no assurance that future fiscal or monetary measures to aid economic recovery will be effective. These developments and reactions of the credit markets to these developments could cause interest rates and borrowing costs to rise, which may negatively impact the Fund's ability to obtain debt financing on favorable terms. In addition, any adverse economic conditions resulting from any further downgrade of the U.S. government's sovereign credit rating or the economic crisis in Europe could have a material adverse effect on the Fund's business, financial condition and results of operations.

Government Intervention in the Financial Markets Risk. Instability in the financial markets has led the U.S. Government, the Federal Reserve and foreign governments and central banks around the world to take a number of unprecedented actions designed to support certain financial institutions and segments of the financial markets that have experienced extreme volatility, and in some cases a lack of liquidity. U.S. federal and state and foreign governments, their regulatory agencies or self-regulatory organizations may take additional actions that affect the regulation of the securities, debt instruments or structured products in which the Fund invests, or the issuers of such securities or structured products, in ways that are unforeseeable or not fully understood or anticipated. Governments or their agencies may also acquire distressed assets from financial institutions and acquire ownership interests in those institutions. The implications of government ownership and disposition of these assets are unclear, and such programs may have positive or negative effects on the liquidity, valuation and performance of the Fund's portfolio holdings. Furthermore, volatile financial markets can expose the Fund to greater market and liquidity risk and potential difficulty in valuing portfolio instruments held by the Fund. The Advisor will monitor developments and seek to manage the Fund's portfolio in a manner consistent with achieving the Fund's investment objective, but there can be no assurance that it will be successful in doing so.

Eurozone Risk. The Fund may invest from time to time in European companies and companies that may be affected by the Eurozone economy. Ongoing concerns regarding the sovereign debt of various Eurozone countries, including the potential for investors to incur substantial write-downs, reductions in the

face value of sovereign debt and/or sovereign defaults, as well as the possibility that one or more countries might leave the EU or the Eurozone create risks that could materially and adversely affect the Fund's investments. Sovereign debt defaults and EU and/or Eurozone exits could have material adverse effects on the Fund's investments in European companies, including, but not limited to, the availability of credit to support such companies' financing needs, uncertainty and disruption in relation to financing, increased currency risk in relation to contracts denominated in Euros and wider economic disruption in markets served by those companies, while austerity and/or other measures introduced to limit or contain these issues may themselves lead to economic contraction and resulting adverse effects for the Fund. Legal uncertainty about the funding of Euro denominated obligations following any breakup or exits from the Eurozone, particularly in the case of investments in companies in affected countries, could also have material adverse effects on the Fund.

Brexit Risk. The Fund may invest a portion of its capital in debt securities issued by issuers domiciled in Europe, including issuers domiciled in the United Kingdom ("U.K."). The government of the U.K. held an in-or-out referendum on the U.K.'s membership in the EU on June 23, 2016. The referendum resulted in a vote in favor of the exit of the U.K. from the EU ("Brexit"). The U.K. ceased to be a member state of the EU on January 31, 2020, and the transition period provided for in the withdrawal agreement entered by the U.K. and the EU ended on December 31, 2020. In December 2020, the U.K. and the EU agreed on a trade and cooperation agreement, which was subsequently ratified by the parties. The trade and cooperation agreement covers the general objectives and framework of the relationship between the U.K. and the EU. The impact of Brexit on the U.K. and EU and the broader global economy is unknown but could be significant and could result in increased volatility and illiquidity and potentially lower economic growth. Brexit also may lead to greater volatility in the global currency and financial markets, which could adversely affect the Fund. In connection with investments in non-US issuers, the Fund may engage in foreign currency exchange transactions but is not required to hedge its currency exposure. As such, the Fund makes investments that are denominated in British pound sterling or Euros. The Fund's assets are valued in US dollars, and the depreciation of the British pound sterling and/or the Euro in relation to the US dollar could adversely affect the Fund's investments denominated in British pound sterling or Euros that are not fully hedged regardless of the performance of the underlying issuer.

Economic Recession or Downturn Risk. Many of the Fund's portfolio companies may be susceptible to economic slowdowns or recessions and may be unable to repay the Fund's debt investments during these periods. Therefore, the Fund's non-performing assets are likely to increase, and the value of its portfolio is likely to decrease, during these periods. Adverse economic conditions may also decrease the value of any collateral securing the Fund's secured loans. A prolonged recession may further decrease the value of such collateral and result in losses of value in the Fund's portfolio and a decrease in the Fund's revenues, net income and NAV. Unfavorable economic conditions also could increase the Fund's funding costs, limit the Fund's access to the capital markets or result in a decision by lenders not to extend credit to it on terms it deems acceptable. These events could prevent the Fund from increasing investments and harm the Fund's operating results.

Legal and Regulatory Risks. On July 21, 2010, former President Barack Obama signed into law major financial services reform legislation in the form of the Dodd-Frank Act. The Dodd-Frank Act, among other things, grants regulatory authorities such as the Commodity Futures Trading Commission ("CFTC") and SEC broad rulemaking authority to implement various provisions of the Dodd-Frank Act, including comprehensive regulation of the over-the-counter Derivatives market. It is unclear how these regulators will exercise these revised and expanded powers and whether they will undertake rulemaking, supervisory or enforcement actions that would adversely affect the Fund or investments made by the Fund. Possible regulatory actions taken under these revised and expanded powers may include actions related to financial consumer protection, proprietary trading and Derivatives. While some regulations have been adopted, a number of important rulemakings have not yet been completed and there can be no assurance that future regulatory actions authorized by the Dodd-Frank Act will not significantly reduce the revenues of the Fund. The implementation of the Dodd-Frank Act could adversely affect the Fund by increasing transaction and/or regulatory compliance costs and may impact the availability, liquidity and cost of Derivatives, including potentially limiting or restricting the ability of the Fund to use certain Derivatives or certain counterparties as a part of its investment strategy, increasing the costs of using these instruments or making these instruments less effective. In addition, greater regulatory scrutiny may increase the Fund's and

the Advisors' exposure to potential liabilities. Increased regulatory oversight can also impose administrative burdens on the Fund and the Advisors, including, without limitation, responding to examinations or investigations and implementing new policies and procedures.

In October 2020, the SEC adopted a final rule related to the use of derivatives, short sales, reverse repurchase agreements and certain other transactions by registered investment companies that will rescind and withdraw applicable SEC Staff guidance and relief regarding asset segregation and coverage transactions reflected in a Fund's asset segregation and cover practices. The final rule requires a Fund to trade derivatives and other transactions that create future payment or delivery obligations (except reverse repurchase agreements and similar financing transactions) subject to a limit on notional derivatives exposure as a limited derivatives user or subject to value-at-risk ("VaR") leverage limits and certain derivatives risk management program and reporting requirements. Such requirements may limit the ability of the Fund to invest in derivatives, short sales and similar financing transactions, limit the Fund's ability to employ certain strategies that use these instruments and/or adversely affect Fund performance, efficiency in implementing its strategy, liquidity and/or ability to pursue its investment objectives and may increase the cost of a Fund's investments and cost of doing business, which could adversely affect investors.

At any time after the date of this prospectus, legislation may be enacted that could negatively affect the assets of the Fund or the issuers of such assets. Changing approaches to regulation may have a negative impact on the entities in which the Fund invests. Legislation or regulation may also change the way in which the Fund itself is regulated. There can be no assurance that future legislation, regulation or deregulation will not have a material adverse effect on the Fund or will not impair the ability of the Fund to achieve its investment objective.

Risks Associated with Changes in LIBOR. Certain financial instruments in which the Fund invests use a floating interest rate based on LIBOR, the offered rate for short-term Eurodollar deposits between large international banks. LIBOR has recently faced scrutiny over concerns that its rate-setting process, which is based on a limited number of interbank transactions, is susceptible to manipulation. As a result, many central banks, including the U.S. Federal Reserve Board ("Federal Reserve"), have begun studying potential replacements for LIBOR and reforms to other interest rate benchmarks. Notably, on July 27, 2017, the U.K. Financial Conduct Authority announced that it intended to stop persuading or compelling banks to submit LIBOR rates after 2021. On November 30, 2020, ICE Benchmark Administration, the administrator of LIBOR, with the support of the Federal Reserve and the U.K. Financial Conduct Authority, announced plans to consult on ceasing publication of U.S. dollar LIBOR ("USD LIBOR") on December 31, 2021 for only the one week and two month USD LIBOR tenors, and on December 31, 2023 for all other USD LIBOR tenors. Accordingly, certain LIBOR tenors could be discontinued or modified by the end of 2021. The Alternative Reference Rates Committee, established by the Federal Reserve, announced the replacement of LIBOR with a new index calculated by short-term repurchase agreements collateralized by U.S. Treasury securities, called the Secured Overnight Financing Rate ("SOFR"). The Federal Reserve Bank of New York began publishing SOFR in April 2018. It is uncertain whether SOFR will attain sufficient market traction to supplant LIBOR.

Because the future of LIBOR is uncertain, the impact to the Fund of a transition away from LIBOR cannot presently be determined. The market transition away from LIBOR and other current reference rates to alternative reference rates is complex and could have a range of adverse impacts on the Fund's investment program, financial condition and results of operations. Among other negative consequences, this transition could:

- > Adversely impact the pricing, liquidity, value of, return on and trading for a broad array of financial products, including any LIBOR-linked securities, loans and derivatives in which the Fund may invest;
- > Require extensive negotiations of and/or amendments to agreements and other documentation governing LIBOR-linked investments products;
- > Lead to disputes, litigation or other actions with counterparties or portfolio companies regarding the interpretation and enforceability of "fall back" provisions that provide for an alternative reference rate in the event of LIBOR's unavailability;

- > Cause us to incur additional costs in relation to any of the above factors.

The risks associated with the above factors are heightened with respect to investments in LIBOR-based products that do not include a fall back provision that addresses how interest rates will be determined if LIBOR stops being published. Other important factors include the pace of the transition, the specific terms of alternative reference rates accepted in the market, the depth of the market for investments based on alternative reference rates, and the Advisors' ability to develop appropriate investment and compliance systems capable of addressing alternative reference rates.

Risks Associated with Recent Commodity Futures Trading Commission Rulemaking. The Advisors claim an exclusion from the definition of the term "commodity pool operator" in accordance with CFTC Regulation 4.5 so that the Advisors are not subject to registration or regulation as a CPO under the CEA with respect to the Fund. In order to maintain the exclusion for the Advisors, the Fund must invest no more than a prescribed level of its liquidation value in certain futures, certain swap contracts and certain other Derivatives subject to the CEA's jurisdiction, and the Fund must not market itself as providing investment exposure to such instruments. If the Fund's investments no longer qualify the Advisors for the exclusion, the Advisors may be subject to the CFTC's CPO registration requirements with respect to the Fund, and the disclosure and operations of the Fund would need to comply with all applicable regulations governing commodity pools registered as investment companies under the 1940 Act and commodity pool operators. Compliance with the additional registration and regulatory requirements may increase operating expenses. Other potentially adverse regulatory initiatives could also develop.

Inflation and Deflation Risk. Inflation risk is the risk that the value of certain assets or income from the Fund's investments will be worth less in the future as inflation decreases the value of money. As inflation increases, the real value of investments and distributions can decline. In addition, during any periods of rising inflation, the dividend rates or borrowing costs associated with the Fund's use of leverage would likely increase, which would tend to further reduce returns to shareholders. Deflation risk is the risk that prices throughout the economy decline over time — the opposite of inflation. Deflation may have an adverse effect on the creditworthiness of issuers and may make issuer defaults more likely, which may result in a decline in the value of the Fund's portfolio.

Interest Rate Risk. Because Syndicated Loans with floating or variable rates reset their interest rates periodically, changes in prevailing interest rates can be expected to cause some fluctuations in the Fund's NAV. Similarly, an increase in market interest rates (which are currently considered low by historic standards) may cause a decline in the Fund's NAV. In addition, Syndicated Loans or similar loans or securities may allow the Borrower to opt between LIBOR-based interest rates and interest rates based on bank prime rates, which may have an effect on the Fund's NAV.

Investment Terms and Timeframe Risk. Delays in investing the net proceeds of this offering may impair the Fund's performance. The Fund cannot assure investors that it will be able to identify any investments that meet the Fund's investment objective or that any investment that the Fund makes will produce a positive return. The Fund may be unable to invest its assets on acceptable terms within the time period that it anticipates or at all, which could harm the Fund's financial condition and results of operations.

Prior to investing in securities of portfolio companies, the Fund may invest primarily in cash, cash equivalents, U.S. government securities, repurchase agreements and high-quality debt instruments maturing in one year or less from the time of investment, which may produce returns that are significantly lower than the returns which it expects to achieve when the Fund's portfolio is fully invested in securities meeting its investment objective. As a result, any distributions that the Fund pays while its portfolio is not fully invested in securities meeting its investment objective may be lower than the distributions that the Fund may be able to pay when its portfolio is fully invested in securities meeting its investment objective.

Restrictions on Entering into Affiliated Transactions. The Advisors may enter into transactions and invest in securities, instruments and currencies on behalf of the Fund in which customers of its affiliates, to the extent permitted by applicable law, serve as the counterparty, principal or issuer. In such cases, such party's interests in the transaction could be adverse to the interests of the Fund, and such party may have no incentive to assure that the Fund obtains the best possible prices or terms in connection with the

transaction. In addition, the purchase, holding and sale of such investments by the Fund may enhance the profitability of the Advisors or their affiliates. One or more affiliates may also create, write or issue Derivatives for their customers, the underlying securities, currencies or instruments of which may be those in which the Fund invests or which may be based on the performance of the Fund. The Fund may, subject to applicable law, purchase investments that are the subject of an underwriting or other distribution by one or more of the Advisors affiliates and may also enter into transactions with other clients of an affiliate where such other clients have interests adverse to those of the Fund. By reason of the various activities of the Advisors and their affiliates, the Advisors and such affiliates may acquire confidential or material non-public information or otherwise be restricted from purchasing certain potential Fund investments that otherwise might have been purchased or be restricted from selling certain Fund investments that might otherwise have been sold at the time.

Lack of Funds to Make Additional Investments Risk. The Fund may not have the funds or ability to make additional investments in its portfolio companies. After the Fund's initial investment in a portfolio company, it may be called upon from time to time to provide additional funds to such company or have the opportunity to increase its investment through the exercise of a warrant to purchase common shares. There is no assurance that the Fund will make, or will have sufficient funds to make, follow-on investments. Any decisions not to make a follow-on investment or any inability on the Fund's part to make such an investment may have a negative impact on a portfolio company in need of such an investment, may result in a missed opportunity for the Fund to increase its participation in a successful operation or may reduce the expected return on the investment.

Uncertain Exit Strategies. Due to the illiquid nature of some of the positions that the Fund is expected to acquire, as well as the risks associated with the Fund's investment strategies, the Fund is unable to predict with confidence what the exit strategy may ultimately be for any given investment, or that one will definitely be available. Exit strategies which appear to be viable when an investment is initiated may be precluded by the time the investment is ready to be realized due to economic, legal, political or other factors.

Other Risks Relating to the Fund

Advisor Risk. The Advisor utilizes the resources of Ares' U.S. and European credit teams who manage direct lending, syndicated loan, corporate bond, opportunistic credit and structured credit investment strategies for the Ares Credit Group as well as the real estate debt and stressed/distressed investment teams. The Fund's portfolio management team is comprised of members of Ares' Credit Group. The Advisor intends to use the resources of Ares. There can be no assurance that any such investment professionals will remain employed by Ares or if employed, will remain involved with the Advisors' performance obligations. The Advisor is a joint venture and conflicts could arise between the parties to the joint venture that could impact the Advisor's ability to perform its duties.

Senior Management Personnel of the Advisors. Since the Fund has no employees, it depends on the investment expertise, skill and network of business contacts of the Advisors. The Advisors evaluate, negotiate, structure, execute, monitor and service the Fund's investments. The Fund's future success depends to a significant extent on the continued service and coordination of the Advisors and their senior management team. The departure of any members of the Advisors' senior management team could have a material adverse effect on the Fund's ability to achieve its investment objective.

The Fund's ability to achieve its investment objective depends on the Advisors' ability to identify, analyze, invest in, finance and monitor companies that meet the Fund's investment criteria. The Advisors' capabilities in managing the investment process, providing competent, attentive and efficient services to the Fund, and facilitating access to financing on acceptable terms depend on the employment of investment professionals in an adequate number and of adequate sophistication to match the corresponding flow of transactions. To achieve the Fund's investment objective, the Advisors may need to hire, train, supervise and manage new investment professionals to participate in the Fund's investment selection and monitoring process. The Advisors may not be able to find investment professionals in a timely manner or at all. Failure to support the Fund's investment process could have a material adverse effect on the Fund's business, financial condition and results of operations.

In addition, the Investment Advisory Agreement has termination provisions that allow the parties to terminate the agreements without penalty. The Investment Advisory Agreement, Investment Sub-Advisory Agreement and the CAM Administration Agreement may be terminated at any time, without penalty, by the Advisors upon 60 days' notice to the Fund. If either agreement is terminated, it may adversely affect the quality of the Fund's investment opportunities. In addition, in the event such agreements are terminated, it may be difficult for the Fund to replace the Advisors. Furthermore, the termination of either of these agreements may adversely impact the terms of the Fund's or its subsidiaries' financing facilities or any financing facility into which the Fund or its subsidiaries may enter in the future, which could have a material adverse effect on the Fund's business and financial condition.

Key Personnel Risk. The Advisor depends on the diligence, skill and network of business contacts of certain Ares Credit Group and CION professionals. The Advisor also depends, to a significant extent, on access to other investment professionals within Ares and CION and the information and deal flow generated by these investment professionals in the course of their investment and portfolio management activities. The Fund's success depends on the continued service of such personnel. The investment professionals associated with the Advisors are actively involved in other investment activities not concerning the Fund and will not be able to devote all of their time to the Fund's business and affairs. The departure of any of the senior managers of the Advisors, or of a significant number of the investment professionals or partners of the Advisors' affiliates, could have a material adverse effect on the Fund's ability to achieve its investment objective. Individuals not currently associated with the Advisors may become associated with the Fund and the performance of the Fund may also depend on the experience and expertise of such individuals. In addition, there is no assurance that the Advisors will remain the Fund's investment advisor or that the Advisors will continue to have access to the investment professionals and partners of its affiliates and the information and deal flow generated by the investment professionals of its affiliates.

Ares and CION Relationships. The Fund expects that Ares and CION will depend on their existing relationships with private equity sponsors, investment banks and commercial banks, and the Fund expects to rely to a significant extent upon these relationships for purposes of potential investment opportunities. If Ares or CION fails to maintain their existing relationships or develop new relationships with other sources or sponsors of investment opportunities, the Fund may not be able to expand its investment portfolio. In addition, individuals with whom Ares and CION have relationships are not obligated to provide the Fund with investment opportunities and, therefore, there is no assurance that such relationships will generate investment opportunities for the Fund.

The Advisors' Incentive Fee Risk. The Investment Advisory Agreement and Investment Sub-Advisory Agreement entitle the Advisors to receive incentive compensation on income regardless of any capital losses. In such case, the Fund may be required to pay the Advisors incentive compensation for a fiscal quarter even if there is a decline in the value of the Fund's portfolio or if the Fund incurs a net loss for that quarter.

Any Incentive Fee payable by the Fund that relates to its net investment income may be computed and paid on income that may include interest that has been accrued but not yet received. If a portfolio company defaults on a loan that is structured to provide accrued interest, it is possible that accrued interest previously included in the calculation of the Incentive Fee will become uncollectible. The Advisors are not under any obligation to reimburse the Fund for any part of the Incentive Fee they received that was based on accrued income that the Fund never received as a result of a default by an entity on the obligation that resulted in the accrual of such income, and such circumstances would result in the Fund's paying an Incentive Fee on income it never received.

The Incentive Fee payable by the Fund to the Advisors may create an incentive for them to make investments on the Fund's behalf that are risky or more speculative than would be the case in the absence of such compensation arrangement. The way in which the Incentive Fee payable to the Advisors is determined may encourage them to use leverage to increase the return on the Fund's investments. In addition, the fact that the Management Fee is payable based upon the Fund's average daily gross assets, which would include any borrowings for investment purposes, may encourage the Advisors to use leverage to make additional investments. Under certain circumstances, the use of leverage may increase the likelihood of default, which would disfavor shareholders. Such a practice could result in the Fund's investing in more speculative securities than would otherwise be in its best interests, which could result in higher investment losses, particularly during cyclical economic downturns.

Shares Not Listed; No Market for Shares. The Fund has been organized as a closed-end management investment company. Closed-end funds differ from open-end management investment companies (commonly known as mutual funds) because investors in a closed-end fund do not have the right to redeem their shares on a daily basis. Unlike most closed-end funds, which typically list their shares on a securities exchange, the Fund does not currently intend to list the Shares for trading on any securities exchange, and the Fund does not expect any secondary market to develop for the Shares in the foreseeable future. Therefore, an investment in the Fund, unlike an investment in a typical closed-end fund, is not a liquid investment.

Closed-end Interval Fund; Liquidity Risks. The Fund is a diversified, closed-end management investment company structured as an “interval fund” and designed primarily for long-term investors. The Fund is not intended to be a typical traded investment. There is no secondary market for the Fund’s Shares and the Fund expects that no secondary market will develop. An investor should not invest in the Fund if the investor needs a liquid investment. Closed-end funds differ from open-end management investment companies, commonly known as mutual funds, in that investors in a closed-end fund do not have the right to redeem their shares on a daily basis at a price based on NAV. Although the Fund, as a fundamental policy, will make quarterly offers to repurchase at least 5% and up to 25% of its outstanding Shares at NAV, the number of Shares tendered in connection with a repurchase offer may exceed the number of Shares the Fund has offered to repurchase, in which case not all of your Shares tendered in that offer will be repurchased. In connection with any given repurchase offer, it is expected the Fund will offer to repurchase only the minimum amount of 5% of its outstanding Shares. Hence, you may not be able to sell your Shares when and/or in the amount that you desire.

Competition for Investment Opportunities. The Fund competes for investments with other closed-end funds and investment funds, as well as traditional financial services companies such as commercial banks and other sources of funding. Moreover, alternative investment vehicles, such as hedge funds, have begun to invest in areas in which they have not traditionally invested. As a result of these new entrants, competition for investment opportunities may intensify. Many of the Fund’s competitors are substantially larger and may have considerably greater financial, technical and marketing resources than the Fund. For example, some competitors may have a lower cost of capital and access to funding sources that are not available to the Fund. In addition, some of the Fund’s competitors may have higher risk tolerances or different risk assessments than it has. These characteristics could allow the Fund’s competitors to consider a wider variety of investments, establish more relationships and pay more competitive prices for investments than it is able to do. The Fund may lose investment opportunities if it does not match its competitors’ pricing. If the Fund is forced to match its competitors’ pricing, it may not be able to achieve acceptable returns on its investments or may bear substantial risk of capital loss. A significant increase in the number and/or the size of the Fund’s competitors could force it to accept less attractive investment terms. Furthermore, many of the Fund’s competitors have greater experience operating under, or are not subject to, the regulatory restrictions that the 1940 Act imposes on it as a closed-end fund.

“Best-Efforts” Offering Risk. This offering is being made on a best efforts basis, whereby the Distributor is only required to use its best efforts to sell the Shares and has no firm commitment or obligation to purchase any of the Shares. To the extent that less than the maximum number of Shares is subscribed for, the opportunity for the allocation of the Fund’s investments among various issuers and industries may be decreased, and the returns achieved on those investments may be reduced as a result of allocating all of the Fund’s expenses over a smaller capital base.

Inadequate Return Risk. No assurance can be given that the returns on the Fund’s investments will be commensurate with the risk of investment in the common shares.

Inadequate Network of Broker-Dealer Risk. The success of the Fund’s continuous public offering, and correspondingly the Fund’s ability to implement its investment objective and strategies, depends upon the ability of the Distributor and the Advisor to establish, operate and maintain a network of Selected Broker-Dealers to sell the Shares. If the Distributor or the Advisor fails to perform, the Fund may not be able to raise adequate proceeds through the Fund’s continuous public offering to implement the Fund’s investment objective and strategies. If the Fund is unsuccessful in implementing its investment objective and strategies, an investor could lose all or a part of his or her investment in the Fund.

Repurchase Offers Risks. As described under “Share Repurchase Program,” the Fund is an “interval fund” and, to provide some liquidity to Shareholders, makes quarterly offers to repurchase between 5% and 25% of its outstanding Shares at NAV, pursuant to Rule 23c-3 under the 1940 Act. The Fund believes that these repurchase offers are generally beneficial to the Fund’s Shareholders, and generally are funded from available cash or sales of portfolio securities. However, the repurchase of Shares by the Fund decreases the assets of the Fund and, therefore, may have the effect of increasing the Fund’s expense ratio. Repurchase offers and the need to fund repurchase obligations may also affect the ability of the Fund to be fully invested or force the Fund to maintain a higher percentage of its assets in liquid investments, which may harm the Fund’s investment performance. Moreover, diminution in the size of the Fund through repurchases may result in untimely sales of portfolio securities, and may limit the ability of the Fund to participate in new investment opportunities. If the Fund uses leverage, repurchases of Shares may compound the adverse effects of leverage in a declining market. In addition, if the Fund borrows money to finance repurchases, interest on that borrowing will negatively affect Shareholders who do not tender their Shares by increasing Fund expenses and reducing any net investment income. Certain Shareholders may from time to time own or control a significant percentage of the Fund’s Shares. Repurchase requests by these Shareholders of these Shares of the Fund may cause repurchases to be oversubscribed, with the result that Shareholders may only be able to have a portion of their Shares repurchased in connection with any repurchase offer. If a repurchase offer is oversubscribed and the Fund determines not to repurchase additional Shares beyond the repurchase offer amount, or if Shareholders tender an amount of Shares greater than that which the Fund is entitled to purchase, the Fund will repurchase the Shares tendered on a pro rata basis, and Shareholders will have to wait until the next repurchase offer to make another repurchase request. Shareholders will be subject to the risk of NAV fluctuations during that period. Thus, there is also a risk that some Shareholders, in anticipation of proration, may tender more Shares than they wish to have repurchased in a particular quarter, thereby increasing the likelihood that proration will occur. The NAV of Shares tendered in a repurchase offer may fluctuate between the date a Shareholder submits a repurchase request and the Repurchase Request Deadline, and to the extent there is any delay between the Repurchase Request Deadline and the Repurchase Pricing Date. The NAV on the Repurchase Request Deadline or the Repurchase Pricing Date may be higher or lower than on the date a Shareholder submits a repurchase request. See “Share Repurchase Program.”

Distribution Payment Risk. The Fund cannot assure investors that the Fund will achieve investment results that will allow the Fund to make a specified level of cash distributions or year-to-year increases in cash distributions. All distributions will be paid at the discretion of the Board and may depend on the Fund’s earnings, the Fund’s net investment income, the Fund’s financial condition, maintenance of the Fund’s and the Fund’s RIC status, compliance with applicable regulations and such other factors as the Board may deem relevant from time to time.

In the event that the Fund encounters delays in locating suitable investment opportunities, all or a substantial portion of the Fund’s distributions may constitute a return of capital to Shareholders. To the extent that the Fund pays distributions that constitute a return of capital for U.S. federal income tax purposes, it will lower an investor’s tax basis in his or her Shares. A return of capital generally is a return of an investor’s investment, rather than a return of earnings or gains derived from the Fund’s investment activities, and generally results in a reduction of the tax basis in the Shares. As a result from such reduction in tax basis, Shareholders may be subject to tax in connection with the sale of Fund Shares, even if such Shares are sold at a loss relative to the Shareholder’s original investment.

Risks Associated with the Fund Distribution Policy. The Fund intends to make regular distributions. Currently, in order to maintain a relatively stable level of distributions, the Fund may pay out less than all of its net investment income to the extent consistent with maintaining its ability to be subject to tax as a “regulated investment company” under the Code, pay out undistributed income from prior months, return capital in addition to current period net investment income or borrow money to fund distributions. The distributions for any full or partial calendar year might not be made in equal amounts, and one distribution may be larger than the other. The Fund will make a distribution only if authorized by the Board and declared by the Fund out of assets legally available for these distributions. This distribution policy may, under certain circumstances, have certain adverse consequences to the Fund and its shareholders because it may result in a return of capital, which would reduce the NAV of the common shares and, over time, potentially increase the Fund’s expense ratio. If a distribution constitutes a return of capital, it means that

the Fund is returning to shareholders a portion of their investment rather than making a distribution that is funded from the Fund's earned income or other profits. The Fund's distribution policy may be changed at any time by the Board.

There is a possibility that the Fund may make total distributions during a calendar or taxable year in an amount that exceeds the Fund's net investment company taxable income and net capital gains for the relevant taxable year. In such situations, if a distribution exceeds the Fund's current and accumulated earnings and profits (as determined for U.S. federal income tax purposes), a portion of each distribution paid with respect to such taxable year would generally be treated as a return of capital for U.S. federal income tax purposes, thereby reducing the amount of a shareholder's tax basis in such shareholder's Fund Shares. When a shareholder sells Fund Shares, the amount, if any, by which the sales price exceeds the shareholder's tax basis in Fund Shares may be treated as a gain subject to tax. Because a return of capital reduces a shareholder's tax basis in Fund Shares, it generally will increase the amount of such shareholder's gain or decrease the amount of such shareholder's loss when such shareholder sells Fund Shares. To the extent that the amount of any return of capital distribution exceeds a shareholder's tax basis in Fund Shares, such excess generally will be treated as gain from a sale or exchange of the shares.

If the Fund elects to issue preferred shares and/or notes or other forms of indebtedness, its ability to make distributions to its common shareholders may be limited by the asset coverage requirements and other limitations imposed by the 1940 Act and the terms of the Fund's preferred shares, notes or other indebtedness.

Investment Dilution Risk. The Fund's investors do not have preemptive rights to any Shares the Fund may issue in the future. The Fund's amended and restated declaration of trust (the "Declaration of Trust") authorizes it to issue an unlimited number of Shares. The Board may amend the Declaration of Trust. After an investor purchases Shares, the Fund may sell additional Shares in the future or issue equity interests in private offerings. To the extent the Fund issues additional equity interests after an investor purchases its Shares, such investor's percentage ownership interest in the Fund will be diluted.

Anti-Takeover Risk. The Declaration of Trust and bylaws, as well as certain statutory and regulatory requirements, contain certain provisions that may have the effect of discouraging a third party from attempting to acquire it. Subject to the limitations of the 1940 Act, the Board may, without Shareholder action, authorize the issuance of Shares in one or more classes or series, including preferred Shares; and the Board may, without Shareholder action, amend the Declaration of Trust. These anti-takeover provisions may inhibit a change of control in circumstances that could give Shareholders the opportunity to realize a premium over the value of the Shares.

Conflicts of Interest Risk. The Fund is a party to the Investment Advisory Agreement with CAM, and the Investment Sub-Advisory Agreement with Ares Capital, entities in which certain of the Fund's trustees, officers and members of the investment committee of the Advisors may have indirect ownership and pecuniary interests. Certain of the Fund's trustees and officers and members of the investment committee of the Advisors also serve as officers or principals of other investment managers affiliated with the Advisors that currently, and may in the future, manage investment funds with investment objectives similar to the Fund's investment objective. In addition, certain of Fund's officers and trustees and the members of the investment committee of the Advisors serve or may serve as officers, trustees or principals of entities that operate in the same or related line of business as the Fund does or of investment funds managed by the Fund's affiliates. Accordingly, the Fund may not be made aware of and/or given the opportunity to participate in certain investments made by investment funds managed by advisors affiliated with the Advisors. However, the Advisors intend to allocate investment opportunities in a fair and equitable manner in accordance with the Advisors' investment allocation policy.

Pursuant to the terms of the CAM Administration Agreement, CAM provides the Fund with certain administrative and other services necessary to conduct the Fund's day-to-day operations, and the Fund reimburses CAM, at cost, for the Fund's allocable portion of overhead and other expenses (including travel expenses) incurred by CAM in performing its obligations under the CAM Administration Agreement, including the Fund's allocable portion of the cost of certain of the Fund's officers (including but not limited to the chief compliance officer, chief financial officer, chief accounting officer, general counsel, secretary and treasurer) and their respective staffs, but not investment professionals. See "Conflicts of Interest."

Potential Conflicts of Interest Risk — Allocation of Investment Opportunities. The Advisors have adopted allocation procedures that are intended to treat each fund they advise in a manner that, over a period of time, is fair and equitable. Ares and CION currently provide investment advisory and administration services and may provide in the future similar services to other entities (collectively, “Advised Funds”). Certain existing Advised Funds have, and future Advised Funds may have, investment objectives similar to those of the Fund, and such Advised Funds will invest in asset classes similar to those targeted by the Fund. Certain other existing Advised Funds do not, and future Advised Funds may not, have similar investment objectives, but such funds may from time to time invest in asset classes similar to those targeted by the Fund. The Advisors will endeavor to allocate investment opportunities in a fair and equitable manner, and in any event consistent with any fiduciary duties owed to the Fund and other clients and in an effort to avoid favoring one client over another and taking into account all relevant facts and circumstances, including (without limitation): (i) differences with respect to available capital, size of client, and remaining life of a client; (ii) differences with respect to investment objectives or current investment strategies, including regarding: (a) current and total return requirements, (b) emphasizing or limiting exposure to the security or type of security in question, (c) diversification, including industry or company exposure, currency and jurisdiction, or (d) rating agency ratings; (iii) differences in risk profile at the time an opportunity becomes available; (iv) the potential transaction and other costs of allocating an opportunity among various clients; (v) potential conflicts of interest, including whether a client has an existing investment in the security in question or the issuer of such security; (vi) the nature of the security or the transaction, including minimum investment amounts and the source of the opportunity; (vii) current and anticipated market and general economic conditions; (viii) existing positions in a Borrower/loan/security; and (ix) prior positions in a Borrower/loan/security. Nevertheless, it is possible that the Fund may not be given the opportunity to participate in certain investments made by investment funds managed by investment managers affiliated with the Advisors.

In the event investment opportunities are allocated among the Fund and the other Advised Funds, the Fund may not be able to structure its investment portfolio in the manner desired. Furthermore, the Fund and the other Advised Funds may make investments in securities where the prevailing trading activity may make impossible the receipt of the same price or execution on the entire volume of securities purchased or sold by the Fund and the other Advised Funds. When this occurs, the various prices may be averaged, and the Fund will be charged or credited with the average price. Thus, the effect of the aggregation may operate on some occasions to the disadvantage of the Fund. In addition, under certain circumstances, the Fund may not be charged the same commission or commission equivalent rates in connection with a bunched or aggregated order.

It is likely that the other Advised Funds may make investments in the same or similar securities at different times and on different terms than the Fund. The Fund and the other Advised Funds may make investments at different levels of a Borrower’s capital structure or otherwise in different classes of a Borrower’s securities, to the extent permitted by applicable law. Such investments may inherently give rise to conflicts of interest or perceived conflicts of interest between or among the various classes of securities that may be held by such entities. Conflicts may also arise because portfolio decisions regarding the Fund may benefit the other Advised Funds. For example, the sale of a long position or establishment of a short position by the Fund may impair the price of the same security sold short by (and therefore benefit) one or more Advised Funds, and the purchase of a security or covering of a short position in a security by the Fund may increase the price of the same security held by (and therefore benefit) one or more Advised Funds.

Applicable law, including the 1940 Act, may at times prevent the Fund from being able to participate in investments that it otherwise would participate in, and may require the Fund to dispose of investments at a time when it otherwise would not dispose of such investment, in each case, in order to comply with applicable law.

The Advisors, their affiliates and their clients may pursue or enforce rights with respect to a Borrower in which the Fund has invested, and those activities may have an adverse effect on the Fund. As a result, prices, availability, liquidity and terms of the Fund’s investments may be negatively impacted by the activities of the Advisors and their affiliates or their clients, and transactions for the Fund may be impaired or effected at prices or terms that may be less favorable than would otherwise have been the case.

The Advisors may have a conflict of interest in deciding whether to cause the Fund to incur leverage or to invest in more speculative investments or financial instruments, thereby potentially increasing the management and incentive fee payable by the Fund and, accordingly, the fees received by the Advisors. Certain other Advised Funds pay the Advisors or their affiliates greater performance-based compensation, which could create an incentive for the Advisors or an affiliate to favor such investment fund or account over the Fund.

Potential Conflicts of Interest Risk — Allocation of Personnel. The Fund’s executive officers and trustees, and the employees of the Advisors, serve or may serve as officers, directors or principals of entities that operate in the same or a related line of business as the Fund or of investment funds or accounts managed by the Advisors or their affiliates. As a result, they may have obligations to investors in those entities, the fulfillment of which might not be in the best interests of the Fund or its shareholders. Additionally, certain personnel of the Advisors and their management may face conflicts in their time management and commitments.

Potential Conflicts of Interest Risk — Lack of Information Barriers. By reason of the various activities of the Advisors and their affiliates, the Advisors and such affiliates may acquire confidential or material non-public information or otherwise be restricted from purchasing certain potential Fund investments that otherwise might have been purchased or be restricted from selling certain Acquiring Fund investments that might otherwise have been sold at the time.

Portfolio Fair Value Risk. Under the 1940 Act, the Fund is required to carry its portfolio investments at market value or, if there is no readily available market value, at fair value. There is not a public market for the securities of the privately held companies in which the Fund may invest. Many of the Fund’s investments are not exchange-traded, but are, instead, traded on a privately negotiated OTC secondary market for institutional investors. The Board is responsible for the valuation of the Fund’s portfolio investments, and has delegated day-to-day responsibility for implementing the portfolio valuation process set forth in the Fund’s valuation policy to management. Valuations of Fund investments are disclosed quarterly in reports publicly filed with the SEC. See “Determination of Net Asset Value.”

Certain factors that may be considered in determining the fair value of the Fund’s investments include dealer quotes for securities traded on the OTC secondary market for institutional investors, the nature and realizable value of any collateral, the portfolio company’s earnings and its ability to make payments on its indebtedness, the markets in which the portfolio company does business, comparison to comparable publicly-traded companies, discounted cash flow and other relevant factors. Because such valuations, and particularly valuations of private securities and private companies, are inherently uncertain, may fluctuate over short periods of time and may be based on estimates, determinations of fair value may differ materially from the values that would have been used if an exchange-traded market for these securities existed. Due to this uncertainty, the Fund’s fair value determinations may cause the Fund’s NAV on a given date to materially understate or overstate the value that it may ultimately realize upon the sale of one or more of its investments.

Portfolio Turnover Risk. The Fund’s annual portfolio turnover rate may vary greatly from year to year, as well as within a given year. However, portfolio turnover rate is not considered a limiting factor in the execution of investment decisions for the Fund. High portfolio turnover may result in the realization of net short-term capital gains by the Fund which, when distributed to the Fund and, ultimately, Shareholders, will be taxable as ordinary income. In addition, a higher portfolio turnover rate results in correspondingly greater brokerage commissions and other transactional expenses that are borne by the Fund.

General Risks Associated with Derivatives. Although the Fund does not expect Derivatives to represent a significant component of its portfolio initially, the Fund may use Derivatives including, in particular, swaps (including, total return swaps), synthetic collateralized loan obligations, reverse repurchase agreements and other similar transactions, in seeking to achieve its investment objective or for other reasons, such as cash management, financing activities or to hedge its positions. Accordingly, Derivatives may be used in limited instances as a form of leverage or to seek to enhance returns, including speculation on changes in credit spreads, interest rates or other characteristics of the market, individual securities or groups of securities. If the Fund invests in a Derivative for speculative purposes, which the Fund does not

initially intend to do, the Fund will be fully exposed to the risks of loss of that Derivative, which may sometimes be greater than the Derivative's cost. The use of Derivatives may involve substantial leverage. The use of Derivatives may subject the Fund to the following risks, including but not limited to:

- > *Credit risk* — the risk that the counterparty in a Derivative transaction will be unable to honor its financial obligation to the Fund, or the risk that the reference entity in a credit default swap or similar Derivative will not be able to honor its financial obligations. Certain participants in the Derivatives market, including larger financial institutions, have recently experienced significant financial hardship and deteriorating credit conditions. If the Fund's counterparty to a Derivative transaction experiences a loss of capital, or is perceived to lack adequate capital or access to capital, it may experience margin calls or other regulatory requirements to increase equity. Under such circumstances, the risk that a counterparty will be unable to honor its obligations may increase substantially. If a counterparty becomes bankrupt or otherwise fails to perform its obligations under a derivative contract, the Fund may experience significant delays in obtaining any recovery under the derivative contract in bankruptcy or other reorganization proceeding. The Fund may obtain only a limited recovery or may obtain no recovery in such circumstances.
- > *Currency risk* — the risk that changes in the exchange rate between two currencies will adversely affect the value (in U.S. dollar terms) of an investment.
- > *Leverage risk* — the risk associated with certain types of Derivative strategies that relatively small market movements may result in large changes in the value of an investment. Certain investments or trading strategies that involve leverage can result in losses that greatly exceed the amount originally invested.
- > *Liquidity risk* — the risk that certain securities may be difficult or impossible to sell at the time that the seller would like or at the price that the seller believes the security is currently worth. This risk is heightened to the extent the Fund engages in OTC Derivative transactions.
- > *Correlation risk* — the risk that changes in the value of a Derivative will not match the changes in the value of the portfolio holdings that are being hedged or of the particular market, security or loan to which the Fund seeks exposure.
- > *Index risk* — if the Derivative is linked to the performance of an index, it will be subject to the risks associated with changes in that index. If the index changes, the Fund could receive lower interest payments or experience a reduction in the value of the Derivative to below what the Fund paid. Certain indexed securities, including inverse securities (which move in an opposite direction to the index), may create leverage, to the extent that they increase or decrease in value at a rate that is a multiple of the changes in the applicable index.
- > *Regulatory risk* — various legislative and regulatory initiatives may impact the availability, liquidity and cost of Derivatives, including potentially limiting or restricting the ability of the Fund to use certain Derivatives or certain counterparties as a part of its investment strategy, increasing the costs of using these instruments or making these instruments less effective. See “Types of Investments and Related Risks — Legislation and Regulation Risks”.

As an investment company registered with the SEC, the Fund must identify on its books (often referred to as “asset segregation”) liquid assets, or engage in other SEC- or SEC staff-approved or other appropriate measures, to “cover” open positions with respect to certain kinds of Derivatives. For more information about these practices, see “Types of Investments and Related Risks — Asset Segregation”.

Options and Futures Risk. The Fund may utilize options and futures contracts and so-called “synthetic” options or other Derivatives written by broker-dealers or other permissible Financial Intermediaries. Options transactions may be effected on securities exchanges or in the OTC market. When options are purchased OTC, the Fund's portfolio bears the risk that the counterparty that wrote the option will be unable or unwilling to perform its obligations under the option contract. Options may also be illiquid and, in such cases, the Fund may have difficulty closing out its position. OTC options also may include options on baskets of specific securities. Under current SEC requirements, the Fund will “cover” its options and futures positions by segregating an amount of cash and/or liquid securities to the extent required by the 1940 Act and applicable SEC interpretations and guidance from time to time.

The Fund may purchase call and put options on specific securities, and may write and sell covered or uncovered call and put options for hedging purposes in pursuing its investment objective. A put option gives the purchaser of the option the right to sell, and obligates the writer to buy, the underlying security at a stated exercise price, typically at any time prior to the expiration of the option. A call option gives the purchaser of the option the right to buy, and obligates the writer to sell, the underlying security at a stated exercise price, typically at any time prior to the expiration of the option. A covered call option is a call option with respect to which the seller of the option owns the underlying security. The sale of a call option exposes the seller during the term of the option to possible loss of opportunity to realize appreciation in the market price of the underlying security or to possible continued holding of a security that might otherwise have been sold to protect against depreciation in the market price of the security. A covered put option is a put option with respect to which cash or liquid securities have been placed in a segregated account on the books of or with a custodian to fulfill the obligation undertaken. The sale of a put option exposes the seller during the term of the option to a decline in price of the underlying security while depriving the seller of the opportunity to invest the segregated assets.

The Fund may close out a position when writing options by purchasing an option on the same security with the same exercise price and expiration date as the option that it has previously written on the security. In such a case, the Fund will realize a profit or loss if the amount paid to purchase an option is less or more than the amount received from the sale of the option.

Purchasing a futures contract creates an obligation to take delivery of the specific type of financial instrument at a specific future time at a specific price for contracts that require physical delivery, or net payment for cash-settled contracts. Engaging in transactions in futures contracts involves risk of loss to the Fund. No assurance can be given that a liquid market will exist for any particular futures contract at any particular time. All terms of futures contracts are set forth in the rules of the exchange on which the futures contracts are traded. Many futures exchanges and boards of trade limit the amount of fluctuation permitted in futures contract prices during a single trading day. Once the daily limit has been reached in a particular contract, no trades may be made that day at a price beyond that limit or trading may be suspended for specified periods during the trading day. Futures contract prices could move to the limit for several consecutive trading days with little or no trading, preventing prompt liquidation of futures positions and potentially subjecting the Fund to substantial losses. Successful use of futures also is subject to the Advisors' ability to predict correctly the direction of movements in the relevant market, and, to the extent the transaction is entered into for hedging purposes, to determine the appropriate correlation between the transaction being hedged and the price movements of the futures contract.

Asset Segregation. As an investment company registered with the SEC, the Fund must identify on its books (often referred to as "asset segregation") liquid assets, or engage in other SEC or SEC-staff approved or other appropriate measures, to "cover" open positions with respect to certain kinds of Derivatives. In the case of swaps, futures contracts, options, forward contracts and other Derivatives that do not cash settle, for example, the Fund must identify on its books liquid assets equal to the full notional amount of the instrument while the positions are open, to the extent there is not an offsetting position. However, with respect to certain swaps, futures contracts, options, forward contracts and other Derivatives that are required to cash settle, the Fund may identify liquid assets in an amount equal to the Fund's daily marked-to-market net obligations (*i.e.*, the Fund's daily net liability) under the instrument, if any, rather than its full notional amount. Instruments that do not cash settle may be treated as cash settled for asset segregation purposes when the Fund has entered into a contractual arrangement with a third party futures commission merchant or other counterparty to off-set the Fund's exposure under the contract and, failing that, to assign its delivery obligation under the contract to the counterparty. The Fund reserves the right to modify its asset segregation policies in the future in its discretion, consistent with the Investment Company Act and SEC or SEC-staff guidance. By identifying assets equal to only its net obligations under certain instruments, the Fund will have the ability to employ leverage to a greater extent than if the Fund was required to identify assets equal to the full notional amount of the instrument.

Cybersecurity Risks. Cybersecurity refers to the combination of technologies, processes and procedures established to protect information technology systems and data from unauthorized access, attack or damage. The Fund and its respective affiliates and third-party service providers are subject to cybersecurity risks. Cyber security risks have significantly increased in recent years and, while the Fund has

not experienced any material losses relating to cyber attacks or other information security breaches, the Fund could suffer such losses in the future. The Fund's and its respective affiliates' and third-party service providers' computer systems, software and networks may be vulnerable to unauthorized access, computer viruses or other malicious code and other events that could have a security impact. If one or more of such events occur, this potentially could jeopardize confidential and other information, including nonpublic personal information and sensitive business data, processed and stored in, and transmitted through, computer systems and networks, or otherwise cause interruptions or malfunctions in the Fund's operations or the operations of its respective affiliates and third-party service providers. This could result in significant losses, reputational damage, litigation, regulatory fines or penalties, or otherwise adversely affect the Fund's business, financial condition or results of operations. Privacy and information security laws and regulation changes, and compliance with those changes, may result in cost increases due to system changes and the development of new administrative processes. In addition, the Fund may be required to expend significant additional resources to modify the Fund's protective measures and to investigate and remediate vulnerabilities or other exposures arising from operational and security risks.

Risks Relating to Fund's RIC Status. Although the Fund has elected to be treated as a RIC under Subchapter M of the Code, no assurance can be given that the Fund will be able to qualify for and maintain RIC status. If the Fund qualifies as a RIC under the Code, the Fund generally will not be subject to corporate-level federal income taxes on its income and capital gains that are timely distributed (or deemed distributed) as dividends for U.S. federal income tax purposes to its shareholders. To qualify as a RIC under the Code and to be relieved of federal taxes on income and gains distributed as dividends for U.S. federal income tax purposes to the Fund's shareholders, the Fund must, among other things, meet certain source-of-income, asset diversification and distribution requirements. The distribution requirement for a RIC is satisfied if the Fund distributes dividends each tax year for U.S. federal income tax purposes of an amount generally at least equal to 90% of the sum of its net ordinary income and net short-term capital gains in excess of net long-term capital losses, if any, to the Fund's shareholders.

RIC-Related Risks of Investments Generating Non-Cash Taxable Income. Certain of the Fund's investments will require the Fund to recognize taxable income in a tax year in excess of the cash generated on those investments during that year. In particular, the Fund expects to invest in loans and other debt instruments that will be treated as having "market discount" and/or original issue discount ("OID") for U.S. federal income tax purposes. Because the Fund may be required to recognize income in respect of these investments before, or without receiving, cash representing such income, the Fund may have difficulty satisfying the annual distribution requirements applicable to RICs and avoiding Fund-level U.S. federal income and/or excise taxes. Accordingly, the Fund may be required to sell assets, including at potentially disadvantageous times or prices, raise additional debt or equity capital, make taxable distributions of Shares or debt securities, or reduce new investments, to obtain the cash needed to make these income distributions. If the Fund liquidates assets to raise cash, the Fund may realize additional gain or loss on such liquidations. In the event the Fund realizes additional net capital gains from such liquidation transactions, Shareholders, may receive larger capital gain distributions than it or they would in the absence of such transactions.

Instruments that are treated as having OID for U.S. federal income tax purposes may have unreliable valuations because their continuing accruals require judgments about the collectability of the deferred payments and the value of any collateral. Loans that are treated as having OID generally represent a significantly higher credit risk than coupon loans. Accruals on such instruments may create uncertainty about the source of Fund distributions to Shareholders. OID creates the risk of non-refundable cash payments to the Advisors based on accruals that may never be realized. In addition, the deferral of payment-in-kind ("PIK") interest also reduces a loan's loan-to-value ratio at a compounding rate.

Uncertain Tax Treatment. The Fund may invest a portion of its net assets in below investment grade instruments. Investments in these types of instruments may present special tax issues for the Fund. U.S. federal income tax rules are not entirely clear about issues such as when the Fund may cease to accrue interest, OID or market discount, when and to what extent deductions may be taken for bad debts or worthless instruments, how payments received on obligations in default should be allocated between principal and income and whether exchanges of debt obligations in a bankruptcy or workout context are taxable. These and other issues will be addressed by the Fund to the extent necessary in connection with the Fund's intention to distribute sufficient income each tax year to minimize the risk that it becomes subject to U.S. federal income or excise tax.

MANAGEMENT OF THE FUND

Trustees

Pursuant to the Declaration of Trust and bylaws, the Fund's business and affairs are managed under the direction of the Board, which has overall responsibility for monitoring and overseeing the Fund's management and operations. The Board consists of nine members, five of whom are considered Independent Trustees. The Trustees are subject to removal or replacement in accordance with Delaware law and the Declaration of Trust. The Trustees serving on the Board were elected by the organizational Shareholder of the Fund. The Statement of Additional Information provides additional information about the Trustees.

CAM serves as the Fund's investment advisor pursuant to the terms of the Investment Advisory Agreement and subject to the authority of, and any policies established by, the Board. Ares Capital serves as the Fund's investment sub-advisor pursuant to the terms of the Investment Sub-Advisory Agreement. Pursuant to the Investment Advisory Agreement and Investment Sub-Advisory Agreement, the Advisors manage the Fund's investment portfolio, direct purchases and sales of portfolio securities and report thereon to the Fund's officers and Trustees regularly.

The Board, including a majority of the Independent Trustees, oversees and monitors the Fund's investment performance. After an initial two-year term, the Board will review on an annual basis the Investment Advisory Agreement and the Investment Sub-Advisory Agreement to determine, among other things, whether the fees payable under such agreements are reasonable in light of the services provided.

Investment Personnel

The Fund is primarily the responsibility of two portfolio managers, Mr. Mitch Goldstein and Mr. Greg Margolies. The Fund is also supported by thirteen additional members of the Sub-Advisor's Allocation Committee.

Below is biographical information relating to Messrs. Goldstein and Margolies and the members of the Sub-Advisor's Allocation Committee:

Mitch Goldstein

Mr. Goldstein is a Partner and Co-Head of the Ares Credit Group. He serves on the Ares Executive Management Committee. He additionally serves as Co-President of ARCC and Vice President and Interested Trustee of the Fund. He is a member of the Ares Credit Group's U.S. Direct Lending and Commercial Finance Investment Committees and Ivy Hill Asset Management Investment Committee. Prior to joining Ares Management in May 2005, Mr. Goldstein worked at Credit Suisse First Boston ("CSFB"), where he was a Managing Director in the Financial Sponsors Group. At CSFB, Mr. Goldstein was responsible for providing investment banking services to private equity funds and hedge funds with a focus on M&A and restructurings as well as capital raisings, including high yield, bank debt, mezzanine debt, and initial public offerings. Mr. Goldstein joined CSFB in 2000 at the completion of the merger with Donaldson, Lufkin & Jenrette. From 1998 to 2000, Mr. Goldstein was at Indosuez Capital, where he was a member of the Investment Committee and a Principal, responsible for originating, structuring and executing leveraged transactions across a broad range of products and asset classes. From 1993 to 1998, Mr. Goldstein worked at Bankers Trust. He also serves on the Board of Managers of Ivy Hill Asset Management GP, LLC. Mr. Goldstein graduated summa cum laude from the State University of New York at Binghamton with a B.S. in Accounting and received an M.B.A. from Columbia University's Graduate School of Business.

Greg Margolies

Mr. Margolies is a Partner in the Ares Credit Group, the Head of Markets for Ares and is Vice President of the Fund. Additionally, Mr. Margolies serves as a member of the Ares Credit Group's Alternative Credit Investment Committee, the Ares Dynamic Credit Allocation Fund Investment Committee and the Ares Private Equity Group's Special Opportunities Investment Committee. Prior to joining Ares in 2009, Mr. Margolies served as a Managing Director and Global Head of Leveraged Finance

and Capital Commitments at Merrill Lynch & Co. and was a member of the Executive Committee for Merrill Lynch's Global Investment Banking Group. Previously, Mr. Margolies was Co-Head of the DB Capital Mezzanine Fund. Mr. Margolies serves on the Board of Directors for the International Organization for Women and Development, the Advisory Council for University of Michigan's Life Science Institute and the Board of Trustees for The Juilliard School. Mr. Margolies holds a B.A. from the University of Michigan in International Economics and Finance and an M.B.A. from the University of Pennsylvania Wharton School of Business.

Keith Ashton

Mr. Ashton is a Partner, Portfolio Manager and Co-Head of Alternative Credit in the Ares Credit Group. Mr. Ashton serves as a Vice President and Portfolio Manager for the Ares Dynamic Credit Allocation Fund, Inc. (NYSE:ARDC). Additionally, he serves as a member of the Ares Credit Group's Alternative Credit Executive Committee, Alternative Credit Investment Committee, Ares Dynamic Credit Allocation Fund Investment Committee and the Ares Diversity and Inclusion Council. Prior to joining Ares in 2011, Mr. Ashton was a Partner at Indicus Advisors LLP, where he focused on launching the global structured credit business in May 2007. Previously, Mr. Ashton was a Portfolio Manager and Head of Structured Credit at TIAA-CREF, where he focused on managing a portfolio of structured credit investments and helped launch TIAA's institutional asset management business. Mr. Ashton's experience as an investor in alternative fixed income products spans virtually all securitized asset classes, including CLOs, consumer and commercial receivables, insurance and legal settlements, small business and trade receivables, whole business securitizations, timeshare and other mortgage-related receivables, and esoteric asset classes such as catastrophe risk and intellectual property. Mr. Ashton holds a B.A. from Brigham Young University in Economics and an M.B.A. from the University of Rochester William E. Simon School of Business in Finance and Accounting.

Seth Brufsky

Mr. Brufsky is a Partner in the Ares Credit Group, Co-Head of Global Liquid Credit, Portfolio Manager. Mr. Brufsky also serves as a Director, President, Chief Executive Officer and Portfolio Manager of ARDC. Additionally, he serves as a member of the Ares Credit Group's U.S. Liquid Credit Investment Committee and the Ares Dynamic Credit Allocation Fund Investment Committee. Prior to joining Ares in 1998, Mr. Brufsky was a member of the Corporate Strategy and Research Group of Merrill Lynch & Co., where he focused on analyzing and marketing non-investment grade securities and was acknowledged by Institutional Investor as a member of the top-ranked credit analyst team during each year of his tenure. Previously, Mr. Brufsky was a member of the Institutional Sales and Trading Group of the Global Fixed Income Division at Union Bank of Switzerland. Mr. Brufsky serves on the Board of Directors of the Luminescence Foundation, a charitable giving organization. Mr. Brufsky holds a B.S. from Cornell University in Applied Economics and Business Management and an M.B.A., with honors, from the University of Southern California Marshall School of Business in Finance, where he was awarded the Glassick Scholarship for academic achievement.

Kipp deVeer

Mr. deVeer is a Director and Partner of Ares Management Corporation and Head of the Ares Credit Group. He is a member of the Ares Executive Management Committee. He additionally serves as a Director and Chief Executive Officer of Ares Capital Corporation. Mr. deVeer is a member of the Ares Credit Group's U.S. Direct Lending and European Direct Lending Investment Committees. Prior to joining Ares in 2004, Mr. deVeer was a partner at RBC Capital Partners, a division of Royal Bank of Canada, which led the firm's middle market financing and principal investment business. Mr. deVeer joined RBC in October 2001 from Indosuez Capital, where he was Vice President in the Merchant Banking Group. Mr. deVeer has also worked at J.P. Morgan and Co., both in the Special Investment Group of J.P. Morgan Investment Management, Inc. and the Investment Banking Division of J.P. Morgan Securities Inc. Mr. deVeer received a B.A. from Yale University and an M.B.A. from Stanford University's Graduate School of Business.

Mark Gatto

Mr. Gatto is Co-Chief Executive Officer and Co-President of CION as well as Co-Chief Executive Officer of CIC, a business development company focused on middle market loans. In addition, Mr. Gatto is

a Director and Co-Chief Executive Officer of CAM. Mr. Gatto serves on the investment committee of CIC and the investment allocation committee of the Fund. He joined CION in 1999. Mr. Gatto was formerly Executive Vice President and Chief Acquisitions Officer from May 2007 through January 2008. He served as Executive Vice President of Business Development from May 2006 through May 2007 and Vice President of Marketing from August 2005 through February 2006. Mr. Gatto was also Associate General Counsel from November 1999 until October 2000. Previously, Mr. Gatto was an executive for a leading international product development and marketing company from 2000 through 2003 and later co-founded a specialty business-consulting firm in New York City where he served as its managing partner before re-joining CION in 2005. Mr. Gatto was also an attorney in private practice from 1996 through 1999. Mr. Gatto received an M.B.A from the W. Paul Stillman School of Business at Seton Hall University, a J.D. from Seton Hall University School of Law, and a B.S. from Montclair State University.

Scott Graves

Mr. Graves is a Partner and Co-Head of Ares Private Equity Group and Head of Special Opportunities. He serves as a member of the Ares Executive Management Committee, the Business Advisory Group and the Ares Private Equity Group's Corporate Opportunities and Special Opportunities Investment Committees. Prior to joining Ares in 2017, Mr. Graves spent over 15 years in various capacities as a senior executive and investment professional for Oaktree Capital Management, L.P. From 2013 through 2016, Mr. Graves served as Oaktree's Head of Credit Strategies and Portfolio Manager of Multi-Strategy Credit. He was responsible for a substantial portion of Oaktree's credit platform, managed investment portfolios spanning the breadth of Oaktree's credit strategies and was active in Oaktree corporate management, serving on the Capital and Risk Management Board, the Senior Leadership Counsel, the Product Governance Board and the Project Steering Committee. From 2001 through 2013, Mr. Graves was an investment professional in Oaktree's Distressed Opportunities, Value Opportunities and Strategic Credit strategies, where he served as a Co-Portfolio Manager. From 2010 to 2015, Mr. Graves also managed Oaktree's corporate and strategic development group, leading the firm's product step-outs into emerging market credit, strategic credit, value equities, infrastructure, the enhanced income strategies, structured credit and senior secured lending. Prior to joining Oaktree, Mr. Graves served as a Principal in William E. Simon & Sons' private equity group and as an Analyst at Merrill Lynch & Company in the mergers and acquisitions group. Additionally, Mr. Graves worked at Price Waterhouse LLP in the audit business services division. Mr. Graves received a B.A. degree from the University of California, Los Angeles, in History, and an M.B.A. from the Wharton School at the University of Pennsylvania, where he currently serves on the Wharton School Graduate Executive Board. He is a Certified Public Accountant (inactive).

Blair Jacobson

Mr. Jacobson is a Partner and Co-Head of European Credit in the Ares Credit Group and a member of the Executive Management Committee of Ares. He also serves on the boards of Ares Management Limited and Ares Management UK Limited. Additionally, Mr. Jacobson serves on the Ares Credit Group's European Direct Lending and European Liquid Credit Investment Committees. Prior to joining Ares in 2012, Mr. Jacobson was a Partner at The StepStone Group, where he focused on building and running European operations, including oversight of private debt and equity investments. Previously, Mr. Jacobson was a Partner at Citigroup Private Equity and Mezzanine Partners in London and New York. In addition, he has held a variety of roles in investment banking and mergers and acquisitions in a broad range of industries, most recently at Lehman Brothers. Mr. Jacobson holds a B.A., magna cum laude, from Williams College in Political Economy and an M.B.A., with honors, from the University of Chicago Booth School of Business in Finance.

Jeffrey Kramer

Mr. Kramer is a Partner, Portfolio Manager and Strategy Head for ABS in the Ares Credit Group, where he focuses on alternative credit investments. Additionally, he serves as a member of the Ares Credit Group's Alternative Credit Executive Committee, Alternative Credit Investment Committee, and Commercial Finance Investment Committee. Prior to joining Ares in 2013, Mr. Kramer worked in the Special Situations Group at Goldman Sachs & Co., where he was a member of the Asset Investing team from 2009 through 2013, focusing on investing and lending across a wide range of consumer and

commercial related assets. Prior to Mr. Kramer's integration into the Special Situations Group at Goldman Sachs, he founded ReMark Capital Group, LLC, in 2005, an investment management company focused on the acquisition and structured lending of pools of consumer loans. ReMark Capital was a partnership between Mr. Kramer and Goldman Sachs, and the platform was acquired in full by Goldman Sachs in 2009. Previously, Mr. Kramer was an Executive Director in the Global Financial Markets Division and Co-Head of the Securitization and Structured Credit Unit of WestLB AG, a European based global commercial and investment bank. Prior to that, Mr. Kramer worked in the Structured Finance and Capital Markets Groups of both Rothschild, Inc. and Nomura Securities and was a Vice President in the Asset Finance Unit at Financial Security Assurance Inc. Mr. Kramer holds a B.B.A. from the University of Texas at Austin in Finance.

Michael A. Reisner

Mr. Reisner is Co-Chief Executive Officer and Co-President of CION as well as Co-Chief Executive Officer of CIC, a business development company focused on middle market loans. In addition, Mr. Reisner is a Director and Co-Chief Executive Officer of CAM. Mr. Reisner serves on the investment committee of CIC as well as the investment allocation committee of the Fund. He joined CION in 2001. Mr. Reisner was formerly Chief Financial Officer from January 2007 through April 2008. Mr. Reisner was also formerly Executive Vice President — Originations from February 2006 through January 2007. Mr. Reisner was Senior Vice President and General Counsel from January 2004 through January 2006. Mr. Reisner was Vice President and Associate General Counsel from March 2001 until December 2003. Previously, from 1996 to 2001, Mr. Reisner was an attorney in private practice in New York. Mr. Reisner received a J.D., cum laude, from New York Law School and a B.A. from the University of Vermont.

David A. Sachs

Mr. Sachs is a Partner in the Ares Strategy and Relationship Management Group, where he focuses on the Ares Credit Group's publicly traded funds, strategic growth opportunities for Ares and facilitating the sharing of credit knowledge across the Ares platform. He serves as a Director and Chairman of the Board of ARDC and is an Interested Trustee of the Fund. Additionally, Mr. Sachs serves as a member of Ares Credit Group, Private Equity Group and Real Estate Group fund investment committees and the Ares Equity Income Opportunity Strategy Portfolio Review Committee. Prior to joining Ares in 1997, Mr. Sachs was a Principal of Onyx Partners, Inc., where he focused on merchant banking and related capital raising activities in the private equity and mezzanine debt markets. Previously, he also worked with Taylor & Co., an investment manager providing investment advisory and consulting services to members of the Bass Family of Fort Worth, Texas, and Columbia Savings and Loan Association as Executive Vice President, where he was responsible for asset-liability management and running the investment management department. Mr. Sachs serves as the Non-Executive Chairman of Terex Corporation and is on the Board of Trustees and the McCormick Advisory Council at Northwestern University. He holds a B.S. from Northwestern University in Industrial Engineering and Management Science.

Kort Schnabel

Mr. Schnabel is a Partner, Co-Head of U.S. Direct Lending and Portfolio Manager in the Ares Credit Group. Additionally, he serves on the Ares Credit Group's U.S. Direct Lending Investment Committee. Prior to joining Ares in 2001, Mr. Schnabel was in the Corporate Development Group at Walker Digital Corporation, a business and technology research and development firm, where he was responsible for corporate finance, merger and acquisition and strategic planning activities. Previously, Mr. Schnabel was in the Corporate Finance Group at Morgan Stanley, where he performed detailed financial analyses and modeling for mergers and acquisitions, leveraged buyouts and equity/debt offerings. Mr. Schnabel holds a B.A., cum laude, from the University of Pennsylvania in Economics.

Michael Smith

Mr. Smith is a Partner and Co-Head of the Ares Credit Group and a member of the Executive Management Committee of Ares. He additionally serves as Co-President of ARCC. He is a member of the Ares Credit Group's U.S. Direct Lending and Commercial Finance Investment Committees, the Ares

Private Equity Group's Special Opportunities Investment Committee, the Infrastructure and Power Group Funds Investment Committee and the Ivy Hill Asset Management Investment Committee. Prior to joining Ares in 2004, Mr. Smith was a Partner at RBC Capital Partners, a division of Royal Bank of Canada, which led the firm's middle market financing and principal investment business. Mr. Smith joined RBC in October 2001 from Indosuez Capital, where he was a Vice President in the Merchant Banking Group. Previously, Mr. Smith worked at Kenter, Glasstris & Company, and at Salomon Brothers Inc., in their Debt Capital Markets Group and Financial Institutions Group. Mr. Smith received a B.S. in Business Administration, cum laude, from the University of Notre Dame and a Masters in Management from Northwestern University's Kellogg Graduate School of Management.

Bryan Donohoe

Mr. Donohoe is a Partner in the Ares Real Estate Group and Head of Real Estate Debt. He is also the Chief Executive Officer of Ares Commercial Real Estate Corporation. Additionally, Mr. Donohoe serves on the Ares Real Estate Group Global Investment Committee and Ares Real Estate Debt Investment Committee. Prior to joining Ares in 2019, Mr. Donohoe was a Managing Director for Commercial Real Estate Debt in AllianceBernstein's Real Estate Investment Group. Previously, Mr. Donohoe was a Senior Professional at Ranieri Real Estate Partners. In addition, Mr. Donohoe spent 10 years at Deutsche Bank, where he focused on originating, structuring and closing of first mortgage loans, B notes and mezzanine debt. Mr. Donohoe holds a B.A. from Middlebury College in Political Science.

Boris Okuliar

Mr. Okuliar is a Partner in the Ares Credit Group, Co-Head of Global Liquid Credit, Portfolio Manager of European Liquid Credit. Additionally, he serves as a member of the Ares Credit Group's European Liquid Credit and European Direct Lending Investment Committees. Prior to joining Ares in 2016, Mr. Okuliar was a Managing Director and Head of Capital Markets for Global Market Strategies at The Carlyle Group, where he focused on sourcing credit investment opportunities from banks and sponsors, syndicating excess risk, and developing new business opportunities. Previously, Mr. Okuliar was Head of Leveraged Capital Markets for UBS, where he focused on the structuring and market execution of leveraged loans, bridge financing and high yield bond placements. In addition, Mr. Okuliar was Head of High Yield Capital Markets and Syndicate at Barclays Capital in London. He has also worked for Banc of America Securities in Syndicated Finance and High Yield Capital Markets in the U.S. and London. Mr. Okuliar holds a B.S.B.A. from Georgetown University with a double major in Finance and International Business.

Control Persons

A control person generally is a person who beneficially owns more than 25% of the voting securities of a company or has the power to exercise control over the management or policies of such company. To the knowledge of the Fund, as of April 1, 2021, no persons were deemed to control the Fund.

Administrative Services

Pursuant to the CAM Administration Agreement, CAM furnishes the Fund with office equipment and clerical, bookkeeping and record keeping services at the Fund's office facilities. Under the CAM Administration Agreement, the Fund is obligated to reimburse CAM, at cost, based upon the Fund's allocable portion of CAM's overhead and other expenses (including travel expenses) incurred by CAM in performing its obligations under the CAM Administration Agreement, including the Fund's allocable portion of the compensation of certain of its officers (including but not limited to the chief compliance officer, chief financial officer, chief accounting officer, general counsel, treasurer and assistant treasurer) and their respective staffs. The CAM Administration Agreement may be terminated by either party without penalty upon 60 days' written notice to the other party. The total expenses incurred under the CAM Administration Agreement for the year ended December 31, 2020 was approximately \$1,924,000.

Pursuant to the ALPS Administration Agreement, ALPS Fund Services performs, or administers the performance of, certain of the Fund's required administrative services, which include, among other things, providing administrative assistance in accounting, legal, compliance, and operations, preparing the financial

records that the Fund is required to maintain and preparing reports to the Fund's shareholders and reports filed with the SEC. In addition, ALPS Fund Services coordinates the preparation and filing of the Fund's tax returns and generally coordinates the payment of the Fund's expenses and the performance of administrative and professional services rendered to the Fund by others. The total expenses incurred under the ALPS Administration Agreement for the year ended December 31, 2020 was approximately \$410,000. ALPS Fund Services replaced State Street Bank and Trust Company as the administrator of the Fund on August 1, 2020. The total expenses incurred under the administration agreement between State Street Bank and Trust Company and the Fund for the year ended December 31, 2020 was approximately \$216,000.

Indemnification

The Investment Advisory Agreement and Investment Sub-Advisory Agreement provide that, absent willful misfeasance, bad faith or gross negligence in the performance of its duties or by reason of the reckless disregard of its duties and obligations, the Advisors, their members and their respective officers, managers, partners, agents, employees, controlling persons, members and any other person or entity affiliated with any of them are entitled to indemnification from the Fund for any damages, liabilities, costs and expenses (including reasonable attorneys' fees and amounts reasonably paid in settlement) arising out of or otherwise based upon the performance of any of the Advisors' duties or obligations under the Investment Advisory Agreement and Investment Sub-Advisory Agreement or otherwise as an investment advisor or investment sub-advisor of the Fund.

Custodians, Distribution Paying Agent, Transfer Agent and Registrar

State Street Bank and Trust Company, which has its principal office at Channel Center, 1 Iron Street, Boston, MA, 02210, serves as custodian for the Fund.

DST, which has its principal office at 333 West 11th Street, 5th Floor, Kansas City, MO 64105, serves as the Fund's distribution paying agent, transfer agent and registrar.

FUND EXPENSES

The Advisors bear all of their own costs incurred in providing investment advisory and sub-advisory services to the Fund. As described below, however, the Fund bears all other expenses incurred in the business and operation of the Fund, including amounts that the Fund reimburses to CAM and ALPS Fund Services for certain administrative services that CAM and ALPS Fund Services provide or arrange to be provided to the Fund.

Expenses borne directly by the Fund include:

- corporate, organizational and offering costs relating to offerings of Shares;
- the cost of calculating the NAV of Shares, including the cost of any third-party pricing or valuation services;
- the cost of effecting sales and repurchases of Shares and other securities;
- the Management Fee and Incentive Fee;
- investment related expenses (*e.g.*, expenses that, in the Advisors' discretion, are related to the investment of the Fund's assets, whether or not such investments are consummated), including, as applicable, brokerage commissions, borrowing charges on securities sold short, clearing and settlement charges, recordkeeping, interest expense, dividends on securities sold but not yet purchased, margin fees, investment related travel and lodging expenses and research-related expenses;
- professional fees relating to investments, including expenses of consultants, investment bankers, attorneys, accountants and other experts;
- fees and expenses relating to software tools, programs or other technology (including risk management software, fees to risk management services providers, third-party software licensing, implementation, data management and recovery services and custom development costs);
- research and market data (including news and quotation equipment and services, and any computer hardware and connectivity hardware (*e.g.*, telephone and fiber optic lines) incorporated into the cost of obtaining such research and market data);
- all costs and charges for equipment or services used in communicating information regarding the Fund's transactions among the Advisors and any custodian or other agent engaged by the Fund;
- transfer agent and custodial fees;
- Distributor costs;
- fees and expenses associated with marketing efforts;
- federal and any state registration or notification fees;
- federal, state and local taxes;
- fees and expenses of Trustees not also serving in an executive officer capacity for the Fund or the Advisors;
- the costs of preparing, printing and mailing reports and other communications, including tender offer correspondence or similar materials, to Shareholders;
- fidelity bond, Trustees and officers errors and omissions liability insurance and other insurance premiums;
- direct costs such as printing, mailing, long distance telephone and staff;
- overhead costs, including rent, office supplies, utilities and capital equipment;
- legal expenses (including those expenses associated with preparing the Fund's public filings, attending and preparing for Board meetings, as applicable, and generally serving as counsel to the Fund);

- external accounting expenses (including fees and disbursements and expenses related to the annual audit of the Fund and the preparation of the Fund's tax information);
- any costs and expenses associated with or related to due diligence performed with respect to the Fund's offering of its shares, including but not limited to, costs associated with or related to due diligence activities performed by, on behalf of, or for the benefit of broker-dealers, registered investment advisors, and third-party due diligence providers;
- costs associated with reporting and compliance obligations under the 1940 Act and applicable federal and state securities laws, including compliance with The Sarbanes-Oxley Act of 2002;
- all other expenses incurred by the Fund, CAM and ALPS Fund Services in connection with administering the Fund's business, including expenses incurred by CAM and ALPS Fund Services in performing administrative services for the Fund and administrative personnel paid by CAM and ALPS Fund Services, to the extent they are not controlling persons of CAM and ALPS Fund Services or any of their respective affiliates, subject to the limitations included in the Administration Agreements; and
- any expenses incurred outside of the ordinary course of business, including, without limitation, costs incurred in connection with any claim, litigation, arbitration, mediation, government investigation or similar proceeding and indemnification expenses as provided for in the Fund's organizational documents.

It is also understood and agreed that if persons associated with the Advisors or any of their affiliates, including persons who are officers of the Fund, provide accounting, legal, clerical or administrative services to the Fund at the request of the Fund, the Fund will reimburse the Advisors and their affiliates for their costs in providing such accounting, legal, clerical or administrative services to the Fund (which costs may include an allocation of overhead including rent and the allocable portion of the salaries and benefits of the relevant persons and their respective staffs, including travel expenses), using a methodology for determining costs approved by the Board. Nothing contained herein shall be construed to restrict the Fund's right to hire its own employees or to contract for services to be performed by third parties.

Except as otherwise described in this prospectus, the Advisors and ALPS Fund Services will be reimbursed by the Fund, as applicable, for any of the above expenses that they pay on behalf of the Fund, including administrative expenses they incur on the Fund's behalf.

Expense Support and Conditional Reimbursement Agreement

The Advisor and the Fund have entered into the Expense Support and Conditional Reimbursement Agreement under which the Advisor may voluntarily determine to provide an Expense Payment to the Fund to the extent that it deems appropriate in order to ensure that the Fund bears an appropriate level of expenses. The Expense Support and Conditional Reimbursement Agreement will remain in effect at least until July 31, 2021, unless and until the Board approves its modification or termination. The Expense Support and Conditional Reimbursement Agreement may be renewed for additional one-year terms by the mutual agreement of the Advisor and the Fund. Prior to July 31, 2019, the Advisor had agreed contractually to reimburse the Fund's initial organizational and offering costs, as well as the Fund's operating expenses, to the extent that aggregate distributions made to the Fund's shareholders during the applicable quarter exceeded the sum of (i) the Fund's net investment Fund taxable income (including net short-term capital gains reduced by net long-term capital losses); (ii) the Fund's net capital gains (including the excess of net long-term capital gains over net short-term capital losses); and (iii) dividends and other distributions paid to or otherwise earned by the Fund on account of investments in portfolio companies (to the extent such amounts listed in clause (iii) are not included under clauses (i) and (ii) above).

An Advisor Reimbursement will be made only if and to the extent that (i) it is payable not more than three years from the last business day of the calendar quarter in which the applicable Expense Payment was made by the Advisor; (ii) the Advisory Reimbursement does not cause Other Fund Operating Expenses (as defined herein) (on an annualized basis and net of any reimbursements received by the Fund during such fiscal year) during the applicable quarter to exceed the percentage of the Fund's average net assets attributable to Class I Shares represented by Other Fund Operating Expenses (on an annualized basis)

during the quarter in which the applicable Expense Payment from the Advisor was made; and (iii) the distributions per share declared by the Fund for the applicable class at the time of the applicable Expense Payment are less than the effective rate of distributions per share for such class at the time the Advisor Reimbursement would be paid.

Other Fund Operating Expenses is defined as, the Fund's total Operating Expenses (as defined below), excluding the Management and Incentive fees, offering expenses, financing fees and costs, interest expense and extraordinary expenses. "Operating Expenses" means all operating costs and expenses incurred by the Fund, as determined in accordance with generally accepted accounting principles for investment companies.

Organization and Offering Costs

Organizational costs include, among other things, the cost of organizing as a Delaware statutory trust, including the cost of legal services and other fees pertaining to the Fund's organization. These costs were expensed as incurred by the Fund and were paid by the Advisor on behalf of the Fund.

The Fund's initial offering costs include, among other things, legal, accounting, printing and other expenses pertaining to this offering. Any initial offering costs paid by the Advisor on behalf of the Fund will be recorded as a Payable for offering costs in the Statement of Assets and Liabilities and will be accounted for as a deferred charge until commencement of operations. Thereafter these initial offering costs will be amortized over 12 months on a straight-line basis. Ongoing offering costs will be expensed as incurred.

All organizational and offering costs of the Fund paid by the Advisor shall be subject to reimbursement pursuant to the Expense Support and Conditional Reimbursement Agreement.

MANAGEMENT AND INCENTIVE FEES

Pursuant to the Investment Advisory Agreement, and in consideration of the advisory services provided by the Advisor to the Fund, the Advisor is entitled to a fee consisting of two components — the Management Fee and the Incentive Fee. Pursuant to the Investment Sub-Advisory Agreement, the Advisor pays the Sub-Advisor 40% of the Management Fee and Incentive Fee actually received and retained and not otherwise used to support expenses.

Management Fee

The Management Fee is calculated and payable monthly in arrears at the annual rate of 1.25% of the average daily value of the Fund's Managed Assets. "Managed Assets" means the total assets of the Fund (including any assets attributable to any preferred shares that may be issued or to indebtedness) minus the Fund's liabilities other than liabilities relating to indebtedness. The Management Fees incurred during the fiscal year ended December 31, 2020, the period from November 1, 2019 to December 31, 2019, the fiscal year ended October 31, 2019, the fiscal year ended October 31, 2018 and the period from January 26, 2017 (commencement of operations) to October 31, 2017 were approximately \$11,238,000, \$1,365,363, \$4,757,628, \$1,177,937 and \$77,609, respectively.

Incentive Fee

The Incentive Fee is calculated and payable quarterly in arrears based upon "pre-incentive fee net investment income" attributable to each class of the Fund's common shares for the immediately preceding fiscal quarter, and is subject to a hurdle rate, expressed as a rate of return based on each class's average daily net asset value (calculated in accordance with GAAP), equal to 1.50% per quarter (or an annualized hurdle rate of 6.00%), subject to a "catch-up" feature. For this purpose, "pre-incentive fee net investment income" means interest income, dividend income and any other income accrued during the fiscal quarter, minus each class's operating expenses for the quarter and the distribution and/or shareholder servicing fees (if any) applicable to each class accrued during the fiscal quarter. For such purposes, the Fund's operating expenses will include the Management Fee, expenses reimbursed to CAM under the administration agreement, dated as of December 6, 2016 (the "CAM Administration Agreement"), by and between the Fund and CAM, and any interest expense and distributions paid on any issued and outstanding preferred shares, but will exclude the Incentive Fee.

Thus, the calculation of the Incentive Fee for each fiscal quarter is as follows:

- No Incentive Fee is payable in any fiscal quarter in which the applicable pre-incentive fee net investment income attributable to the applicable share class does not exceed the quarterly hurdle rate of 1.50% of such class's average daily net assets (calculated in accordance with GAAP), or 6.00% annualized;
- 100% of the pre-incentive fee net investment income attributable to the applicable share class, if any, that exceeds the hurdle rate but is less than or equal to 1.765% of such class's average daily net asset value (calculated in accordance with GAAP) in any fiscal quarter (7.06% annualized) is payable to the Advisor; and
- 15% of the pre-incentive fee net investment income attributable to the applicable share class, if any, that exceeds 1.765% of such class's average daily net assets (calculated in accordance with GAAP) in any fiscal quarter (7.06% annualized) is payable to the Advisor (i.e. once the hurdle rate is reached and the catch-up is achieved).

The following is a graphical representation of the calculation of the Incentive Fee:

Quarterly Incentive Fee
Class's pre-incentive fee net investment income
(expressed as a percentage of the Class's average daily net asset value)

Percentage of each Class's pre-incentive fee net investment income allocated to the Incentive Fee.

These calculations will be appropriately prorated for any period of less than three months. During the year ended December 31, 2020, Class I, Class L and Class W of the Fund incurred a total of approximately \$1,092,000 in incentive fees. There were no incentive fees paid by the Fund for the period from November 1, 2019 to December 31, 2019 and the fiscal years ended October 31, 2019 and 2018.

Approval of the Investment Advisory Agreement and Sub-Advisory Agreement

Such approval of the Investment Advisory Agreement was made in accordance with, and on the basis of an evaluation satisfactory to the Board, as required by Section 15(c) of the 1940 Act and the applicable rules and regulations thereunder, including consideration of, among other factors, (i) the nature, quality and extent of the services provided by CAM under the Investment Advisory Agreement; (ii) the investment performance of the Fund, CAM; (iii) comparative information with respect to advisory fees and other expenses paid by other comparable investment companies; and (iv) information about the services performed by CAM and the personnel of CAM providing such services under the Investment Advisory Agreement.

Such approval of the Investment Sub-Advisory Agreement was made in accordance with, and on the basis of an evaluation satisfactory to the Board, as required by Section 15(c) of the 1940 Act and the applicable rules and regulations thereunder, including consideration of, among other factors, (i) the nature, quality and extent of the services provided by Ares Capital under the Investment Sub-Advisory Agreement; (ii) the investment performance of the Fund, Ares Capital; (iii) comparative information with respect to advisory fees and other expenses paid by other comparable investment companies; and (iv) information about the services performed by Ares Capital and the personnel of Ares Capital providing such services under the Investment Sub-Advisory Agreement.

A discussion of the basis for the Board's renewal of the Investment Advisory Agreement and Investment Sub-Advisory Agreement (together, the "Agreements") can be found in the Fund's Annual Report dated October 31, 2019 and the Fund's Annual Report dated December 31, 2020, respectively.

DETERMINATION OF NET ASSET VALUE

NAV per common share will be determined daily by the Advisor on each day the NYSE is open for trading or at such other times as the Board may determine. NAV per common share is determined, on a class-specific basis, by dividing the total value of the Fund's net assets attributable to the applicable class by the total number of Fund Shares of such class outstanding. The Fund's net assets are determined by subtracting any liabilities (including borrowings for investment purposes) from the total value of its portfolio investments and other assets. Class I Shares will be offered at NAV. The Fund's net assets are available to holders of preferred shares (if any) and common shares. If any preferred shares are outstanding, net assets available for the common shareholders is determined by deducting from net assets the liquidation preference and any accrued dividends on the preferred shares.

Bank loans, including syndicated loans, are valued by using readily available market quotations or another commercially reasonable method selected by an independent, third party pricing service that has been approved by the Board, or, if such independent, third-party valuations are not available, by using broker quotations.

Corporate Bonds and CLOs, and certain other domestic debt securities, are valued at the last reported bid prices supplied by an independent, third party pricing service that has been approved by the Board. If the last reported bid price is not readily available or is otherwise deemed to be unreliable by the Valuation Committee, then such securities are valued at fair value pursuant to procedures adopted by the Board.

If they are traded on the valuation date, equity securities that are listed or traded on a national exchange will be valued at the last quoted sale price. Likewise, equity securities that are traded on NASDAQ will be valued at the NASDAQ official closing price if the securities are traded on the valuation date. If securities are listed on more than one exchange, and if the securities are traded on the valuation date, they will be valued at the last quoted sale price on the exchange on which the security is principally traded. If there is no sale of the security on the valuation date, the Fund will value the securities at the last reported sale price, unless the Valuation Committee believes such price no longer represents the fair market value and elects to value the security at fair value pursuant to procedures adopted by the Board. If the validity of such quoted prices appears to be questionable or if such quoted prices are not readily available, then the securities will be valued at fair value pursuant to procedures adopted by the Board. Market quotations may be deemed not to represent fair value in certain circumstances where the Advisors reasonably believe that facts and circumstances applicable to an issuer, seller or purchaser or to the market for a particular security cause current market quotations not to reflect the fair value of the security. Examples of these events could include situations in which material events are announced after the close of the market on which a security is primarily traded, a security trades infrequently causing a quoted purchase or sale price to become stale, or a security's trading has been halted or suspended.

The value of swaps, including credit default swaps, total return swaps and interest rate swaps will be determined by obtaining at least one dealer quotation (including information from counterparties) or valuations from third-party pricing services. If no quotations or valuations are available, or if such quotations or valuations are believed to be unreliable, swaps will be fair valued pursuant to procedures adopted by the Board.

Generally, trading in U.S. Government securities and money market instruments is substantially completed each day at various times prior to the close of business on the NYSE. The values of such securities used in computing the NAV of the Fund's common shares are determined as of such times.

CONFLICTS OF INTEREST

Certain of the Fund's executive officers and trustees, and the employees of the Advisors, serve or may serve as officers, trustees or principals of entities that operate in the same or a related line of business as the Fund or of other Ares- or CION-advised funds ("Other Managed Funds"). As a result, they have obligations to investors in those entities, the fulfillment of which might not be in the best interests of the Fund or its shareholders. Moreover, notwithstanding the difference in principal investment objectives between the Fund and the Other Managed Funds, such other funds, including potential new pooled investment vehicles or managed accounts not yet established (whether managed or sponsored by affiliates or the Advisors), have, and may from time to time have, overlapping investment objectives with the Fund and, accordingly, invest in, whether principally or secondarily, asset classes similar to those targeted by the Fund. To the extent the Other Managed Funds have overlapping investment objectives, the scope of opportunities otherwise available to the Fund may be adversely affected and/or reduced. Additionally, certain employees of the Advisors and their management face conflicts in their time management and commitments as well as in the allocation of investment opportunities to other Ares funds.

The results of the Fund's investment activities may differ significantly from the results achieved by the Other Managed Funds. It is possible that one or more of such funds will achieve investment results that are substantially more or less favorable than the results achieved by the Fund. Moreover, it is possible that the Fund will sustain losses during periods in which one or more affiliates achieve significant profits on their trading for proprietary or other accounts. The opposite result is also possible. The investment activities of one or more Advisor affiliates for their proprietary accounts and accounts under their management may also limit the investment opportunities for the Fund in certain markets.

The Advisors may determine that the Fund should invest on a side-by-side basis with one or more Other Managed Funds. In certain circumstances, negotiated co-investments may be made only in accordance with the terms of the exemptive order Ares received from the SEC (the "Order"). Co-investments made under the Order are subject to compliance with the conditions and other requirements contained in the Order, which could limit the Fund's ability to participate in a co-investment transaction.

In the event investment opportunities are allocated among the Fund and Other Managed Funds, the Fund may not be able to structure its investment portfolio in the manner desired. Although the Advisors endeavor to allocate investment opportunities in a fair and equitable manner, the Fund is not generally permitted to co-invest in any portfolio company in which a fund managed by Ares or any of its downstream affiliates (other than the Fund and its downstream affiliates) currently has an investment. However, the Fund may co-invest with funds managed by Ares or any of its downstream affiliates, subject to compliance with existing regulatory guidance, applicable regulations and its allocation procedures.

From time to time, the Fund and the Other Managed Funds may make investments at different levels of an issuer's capital structure or otherwise in different classes of an issuer's securities. Such investments inherently give rise to conflicts of interest or perceived conflicts of interest between or among the various classes of securities that may be held by such entities.

The Advisors, their affiliates and their clients may pursue or enforce rights with respect to an issuer in which the Fund has invested, and those activities may have an adverse effect on the Fund. As a result, prices, availability, liquidity and terms of the Fund's investments may be negatively impacted by the activities of the Advisors and their affiliates or their clients, and transactions for the Fund may be impaired or effected at prices or terms that may be less favorable than would otherwise have been the case.

The Advisors may enter into transactions and invest in securities, instruments and currencies on behalf of the Fund in which customers of its affiliates, to the extent permitted by applicable law, serve as the counterparty, principal or issuer. In such cases, such party's interests in the transaction would generally be adverse to the interests of the Fund, and such party would have no incentive to assure that the Fund obtains the best possible prices or terms in connection with the transaction. In addition, the purchase, holding and sale of such investments by the Fund may enhance the profitability of the Advisors or their affiliates. One or more affiliates may also create, write or issue Derivatives for their customers, the underlying securities, currencies or instruments of which may be those in which the Fund invests or which

may be based on the performance of the Fund. The Fund may, subject to applicable law, purchase investments that are the subject of an underwriting or other distribution by one or more Advisor affiliates and may also enter into transactions with other clients of an affiliate where such other clients have interests adverse to those of the Fund.

The Fund will be required to establish business relationships with its counterparties based on the Fund's own credit standing. Neither the Advisors nor any of their affiliates will have any obligation to allow its credit to be used in connection with the Fund's establishment of its business relationships, nor is it expected that the Fund's counterparties will rely on the credit of the Advisors or their affiliates in evaluating the Fund's creditworthiness.

The Advisors are paid a fee based on a percentage of the Fund's Managed Assets. The participation of the Advisors' investment professionals in the valuation process therefore results in a conflict of interest. The Advisors also have a conflict of interest in deciding whether to cause the Fund to incur leverage or to invest in more speculative investments or financial instruments, which increase the assets or the yield of the Fund and, accordingly, the Management Fees or Incentive Fees received by the Advisors. Certain other Ares-advised funds pay the Advisors or their affiliates performance-based compensation, which could create an incentive for the Advisors or affiliate to favor such investment fund or account over the Fund.

By reason of the various activities of the Advisors and their affiliates, the Advisors and such affiliates may acquire confidential or material non-public information or otherwise be restricted from purchasing certain potential Fund investments that otherwise might have been purchased or be restricted from selling certain Fund investments that might otherwise have been sold at the time.

The Advisors have adopted policies and procedures designed to prevent conflicts of interest from influencing proxy voting decisions made on behalf of advisory clients, including the Fund, and to help ensure that such decisions are made in accordance with its fiduciary obligations to clients. Nevertheless, notwithstanding such proxy voting policies and procedures, actual proxy voting decisions may have the effect of favoring the interests of other clients, provided that the Advisors believe such voting decisions to be in accordance with its fiduciary obligations.

SHARE REPURCHASE PROGRAM

The Fund does not currently intend to list its Shares on any securities exchange and does not expect any secondary market for them to develop in the foreseeable future. Therefore, Shareholders should expect that they will be unable to sell their Shares for an indefinite time or at a desired price. No Shareholder will have the right to require the Fund to repurchase such Shareholder's Shares or any portion thereof. Shareholders may not transfer their investment from the Fund to any other registered investment company. Because no public market exists for the Shares, and none is expected to develop in the foreseeable future, Shareholders will not be able to liquidate their investment, other than through the Fund's share repurchase program, or, in limited circumstances, as a result of transfers of Shares to other investors.

To provide Shareholders with limited liquidity, the Fund is structured as an "interval fund" and intends to conduct quarterly offers to repurchase between 5% and 25% of its outstanding Shares at NAV, pursuant to Rule 23c-3 under the 1940 Act, unless such offer is suspended or postponed in accordance with regulatory requirements (as discussed below). In connection with any given repurchase offer, it is expected the Fund will offer to repurchase only the minimum amount of 5% of its outstanding Shares. Quarterly repurchases occur in the months of March, June, September and December. The offer to purchase Shares is a fundamental policy that may not be changed without the vote of the holders of a majority of the Fund's outstanding voting securities (as defined in the 1940 Act). The Repurchase Offer Notice is sent to Shareholders at least 21 calendar days before the Repurchase Request Deadline. The Fund expects to determine the NAV applicable to repurchases on the Repurchase Request Deadline. However, the NAV will be calculated no later than the Repurchase Pricing Date, although the NAV is expected to be determined on the Repurchase Request Deadline. The Fund expects to distribute payment to Shareholders between one and three business days after the Repurchase Pricing Date and will distribute such payment no later than seven calendar days after such Date. The Fund's Shares are not listed on any securities exchange, and the Fund anticipates that no secondary market will develop for its Shares. Accordingly, you may not be able to sell Shares when and/or in the amount that you desire. Thus, the Shares are appropriate only as a long-term investment. In addition, the Fund's repurchase offers may subject the Fund and Shareholders to special risks.

Determination of Repurchase Offer Amount

The Board, or a committee thereof, in its sole discretion, will determine the number of Shares that the Fund will offer to repurchase (the "Repurchase Offer Amount") for a given Repurchase Request Deadline. The Repurchase Offer Amount, however, will be no less than 5% and no more than 25% of the total number of Shares outstanding on the Repurchase Request Deadline.

If Shareholders tender for repurchase more than the Repurchase Offer Amount for a given repurchase offer, the Fund will repurchase the Shares on a pro rata basis. However, the Fund may accept all Shares tendered for repurchase by Shareholders who own less than one hundred Shares and who tender all of their Shares, before prorating other amounts tendered.

Notice to Shareholders

No less than 21 days and more than 42 days before each Repurchase Request Deadline, the Fund shall send to each Shareholder of record and to each beneficial owner of the Shares that are the subject of the repurchase offer a notification ("Shareholder Notification"). The Shareholder Notification will contain information Shareholders should consider in deciding whether to tender their Shares for repurchase. The notice also will include detailed instructions on how to tender shares for repurchase, state the Repurchase Offer Amount and identify the dates of the Repurchase Request Deadline, the scheduled Repurchase Pricing Date, and the date the repurchase proceeds are scheduled for payment (the "Repurchase Payment Deadline"). The notice also will set forth the NAV that has been computed no more than seven days before the date of notification, and how Shareholders may ascertain the NAV after the notification date.

Repurchase Price

The repurchase price of the shares will be the NAV of the share class as of the close of regular trading on the NYSE on the Repurchase Pricing Date. You may call 888-729-4266 to learn the NAV. The notice of the repurchase offer also will provide information concerning the NAV, such as the NAV as of a recent date or a sampling of recent NAVs, and a toll-free number for information regarding the repurchase offer.

Repurchase Amounts and Payment of Proceeds

Shares tendered for repurchase by shareholders prior to any Repurchase Request Deadline will be repurchased subject to the aggregate Repurchase Offer Amount established for that Repurchase Request Deadline. Payment pursuant to the repurchase offer will be made by check to the Shareholder's address of record, or credited directly to a predetermined bank account on the Purchase Payment Date, which will be no more than seven days after the Repurchase Pricing Date. The Board may establish other policies for repurchases of shares that are consistent with the 1940 Act, regulations thereunder and other pertinent laws.

If Shareholders tender for repurchase more than the Repurchase Offer Amount for a given repurchase offer, the Fund may, but is not required to, repurchase an additional amount of Shares not to exceed 2.00% of the outstanding Shares of the Fund on the Repurchase Request Deadline. If the Fund determines not to repurchase more than the Repurchase Offer Amount, or if Shareholders tender shares in an amount exceeding the Repurchase Offer Amount plus 2.00% of the outstanding Shares on the Repurchase Request Deadline, the Fund will repurchase the Shares on a pro rata basis. However, the Fund may accept all Shares tendered for repurchase by Shareholders who own less than one hundred Shares and who tender all of their Shares, before prorating other amounts tendered.

With respect to any required minimum distributions from an IRA or other qualified retirement plan, it is the obligation of the shareholder to determine the amount of any such required minimum distribution and to otherwise satisfy the required minimum. In the event that shareholders tender for repurchase more than the Repurchase Offer Amount for a given repurchase offer, the Fund will repurchase the shares on a pro rata basis, which may result in the Fund not honoring the full amount of a required minimum distribution requested by a shareholder.

DESCRIPTION OF CAPITAL STRUCTURE

The following description is based on relevant portions of the Delaware Statutory Trust Act, as amended, and on the Declaration of Trust and bylaws. This summary is not intended to be complete. Please refer to the Delaware Statutory Trust Act, as amended, and the Declaration of Trust and bylaws, copies of which have been filed as exhibits to the registration statement of which this prospectus forms a part, for a more detailed description of the provisions summarized below.

Shares of Beneficial Interest

The Declaration of Trust authorizes the Fund's issuance of an unlimited number of Shares of beneficial interest of each class, par value \$0.001 per share. There is currently no market for Shares and the Fund does not expect that a market for Shares will develop in the foreseeable future. Pursuant to the Declaration of Trust and as permitted by Delaware law, Shareholders are entitled to the same limitation of personal liability extended to stockholders of private corporations organized for profit under the General Corporation Law of the State of Delaware, as amended (the "DGCL") and therefore generally will not be personally liable for the Fund's debts or obligations.

Shares

Under the terms of the Declaration of Trust, all Shares, when consideration for Shares is received by the Fund, will be fully paid and nonassessable. Distributions may be paid to Shareholders if, as and when authorized and declared by the Board. Shares will have no preference, preemptive, appraisal, conversion or redemption rights, and will be freely transferable, except where their transfer is restricted by law or contract. The Declaration of Trust provides that the Board shall have the power to repurchase or redeem Shares and provide Shareholders with the right to exchange Shares of any class for Shares of one or more other classes in the manner and on the terms described herein. In the event of the Fund's dissolution, after the Fund pays or adequately provides for the payment of all claims and obligations of the Fund, and upon the receipt of such releases, indemnities and refunding agreements deemed necessary by the Board, each Share will be entitled to receive, according to its respective rights, a *pro rata* portion of the Fund's assets available for distribution for the applicable class, subject to any preferential rights of holders of the Fund's outstanding preferred Shares, if any. Each whole Share will be entitled to one vote as to any matter on which it is entitled to vote and each fractional Share will be entitled to a proportionate fractional vote. However, to the extent required by the 1940 Act or otherwise determined by the Board, classes of the Fund will vote separately from each other. Shareholders shall be entitled to vote on all matters on which a vote of Shareholders is required by the 1940 Act, the Declaration of Trust or a resolution of the Board. There will be no cumulative voting in the election or removal of Trustees. Under the Declaration of Trust, the Fund is not required to hold annual meetings of Shareholders. The Fund only expects to hold Shareholder meetings to the extent required by the 1940 Act or pursuant to special meetings called by the Board or a majority of Shareholders.

Preferred Shares and Other Securities

The Declaration of Trust provides that the Board may, subject to the Fund's investment policies and restrictions and the requirements of the 1940 Act, authorize and cause the Fund to issue securities of the Fund other than Shares (including preferred Shares, debt securities or other senior securities), by action of the Board without the approval of Shareholders. The Board may determine the terms, rights, preferences, privileges, limitations and restrictions of such securities as the Board sees fit.

Preferred Shares could be issued with rights and preferences that would adversely affect Shareholders. Preferred Shares could also be used as an anti-takeover device. Every issuance of preferred Shares will be required to comply with the requirements of the 1940 Act. The 1940 Act requires, among other things, that (i) immediately after issuance of preferred Shares and before any distribution is made with respect to the Shares and before any purchase of Shares is made, the aggregate involuntary liquidation preference of such preferred Shares together with the aggregate involuntary liquidation preference or aggregate value of all other senior securities must not exceed an amount equal to 50% of the Fund's total assets after deducting the amount of such distribution or purchase price, as the case may be; and (ii) the holders of preferred

Shares, if any are issued, must be entitled as a class to elect two Trustees at all times and to elect a majority of the Trustees if distributions on such preferred Shares are in arrears by two years or more. Certain matters under the 1940 Act require the separate vote of the holders of any issued and outstanding preferred Shares.

Limitation on Liability of Trustees and Officers; Indemnification and Advance of Expenses

Pursuant to the Declaration of Trust, Trustees and officers of the Fund will not be subject in such capacity to any personal liability to the Fund or Shareholders, unless the liability arises from bad faith, willful misfeasance, gross negligence or reckless disregard for the Trustee's or officer's duty.

Except as otherwise provided in the Declaration of Trust, the Fund will indemnify and hold harmless any current or former Trustee or officer of the Fund against any liabilities and expenses (including reasonable attorneys' fees relating to the defense or disposition of any action, suit or proceeding with which such person is involved or threatened), while and with respect to acting in the capacity of a Trustee or officer of the Fund, except with respect to matters in which such person did not act in good faith in the reasonable belief that his or her action was in the best interest of the Fund, or in the case of a criminal proceeding, matters for which such person had reasonable cause to believe that his or her conduct was unlawful. In accordance with the 1940 Act, the Fund will not indemnify any Trustee or officer for any liability to which such person would be subject by reason of his or her willful misfeasance, bad faith, gross negligence or reckless disregard of the duties of his or her position. The Fund will provide indemnification to Trustees and officers prior to a final determination regarding entitlement to indemnification as described in the Declaration of Trust.

The Fund has entered into the Investment Advisory Agreement with CAM and the Investment Sub-Advisory Agreement with Ares Capital. The Investment Advisory Agreement and the Investment Sub-Advisory Agreement provide that, in the absence of willful misfeasance, bad faith, gross negligence or reckless disregard for its obligations and duties thereunder, the Advisors are not liable for any error of judgment or mistake of law or for any loss the Fund suffers.

Pursuant to the Declaration of Trust, the Fund will advance the expenses of defending any action for which indemnification is sought if the Fund receives a written undertaking by the indemnitee which provides that the indemnitee will reimburse the Fund unless it is subsequently determined that the indemnitee is entitled to such indemnification.

Number of Trustees; Appointment of Trustees; Vacancies; Removal

The Declaration of Trust provides that the number of Trustees shall be no less than one and no more than 15, as determined in writing by a majority of the Trustees then in office. As set forth in the Declaration of Trust, a Trustee's term of office shall continue until his or her death, resignation or removal. Subject to the provisions of the 1940 Act, individuals may be appointed by the Trustees at any time to fill vacancies on the Board by the appointment of such persons by a majority of the Trustees then in office. Each Trustee shall hold office until his or her successor shall have been appointed pursuant to the Declaration of Trust. To the extent that the 1940 Act requires that Trustees be elected by Shareholders, any such Trustees will be elected by a plurality of all Shares voted at a meeting of Shareholders at which a quorum is present.

The Declaration of Trust provides that any Trustee may be removed (provided that after the removal the aggregate number of Trustees is not less than the minimum required by the Declaration of Trust) (i) with cause, by at least two-thirds (66 $\frac{2}{3}$ %) of the remaining Trustees; or (ii) without cause, by all of the remaining Trustees.

Action by Shareholders

The Declaration of Trust provides that Shareholder action can be taken only at a meeting of Shareholders or by unanimous written consent in lieu of a meeting. Subject to the 1940 Act, the Declaration of Trust or a resolution of the Board specifying a greater or lesser vote requirement, the affirmative vote of a majority of Shares present in person or represented by proxy at a meeting and entitled to vote on the subject matter shall be the act of the Shareholders with respect to any matter submitted to a vote of the Shareholders.

Amendment of Declaration of Trust and Bylaws

Subject to the provisions of the 1940 Act, pursuant to the Declaration of Trust, the Board may amend the Declaration of Trust without any vote of Shareholders. Pursuant to the Declaration of Trust and bylaws, the Board has the exclusive power to amend or repeal the bylaws or adopt new bylaws at any time.

No Appraisal Rights

In certain extraordinary transactions, some jurisdictions provide the right to dissenting Shareholders to demand and receive the fair value of their Shares, subject to certain procedures and requirements set forth in such statute. Those rights are commonly referred to as appraisal rights. The Declaration of Trust provides that Shares shall not entitle Shareholders to appraisal rights.

Conflict with Applicable Laws and Regulations

The Declaration of Trust provides that if and to the extent that any provision of the Declaration of Trust conflicts with any provision of the 1940 Act, the provisions under the Code applicable to the Fund as a RIC or other applicable laws and regulations, the conflicting provision shall be deemed never to have constituted a part of the Declaration of Trust; provided, however, that such determination shall not affect any of the remaining provisions of the Declaration of Trust or affect the validity of any action taken or omitted to be taken prior to such determination.

TAX ASPECTS

The following is a general summary of certain material U.S. federal income tax considerations applicable to the Fund and an investment in the Fund. The discussion below provides general tax information related to an investment in the Fund, but does not purport to be a complete description of the U.S. federal income tax consequences of an investment in the Fund and does not address any state, local, non-U.S. or other tax consequences. It is based on the Code and U.S. Treasury regulations thereunder and administrative pronouncements, all as of the date hereof, any of which is subject to change, possibly with retroactive effect. In addition, it does not describe all of the tax consequences that may be relevant in light of a Shareholder's particular circumstances, including (but not limited to) alternative minimum tax consequences and tax consequences applicable to Shareholders subject to special tax rules, such as certain financial institutions; dealers or traders in securities who use a mark-to-market method of tax accounting; persons holding Shares as part of a hedging transaction, wash sale, conversion transaction or integrated transaction or persons entering into a constructive sale with respect to Shares; entities classified as partnerships or other pass-through entities for U.S. federal income tax purposes; insurance companies; U.S. Shareholders (as defined below) whose functional currency is not the U.S. dollar; or tax-exempt entities, including "individual retirement accounts" or "Roth IRAs." Unless otherwise noted, the following discussion applies only to a Shareholder that holds Shares as a capital asset and is a U.S. Shareholder. A "U.S. Shareholder" generally is a beneficial owner of Shares who is for U.S. federal income tax purposes:

- an individual who is a citizen or resident of the United States;
- a corporation, or other entity taxable as a corporation, created or organized in or under the laws of the United States, any state thereof or the District of Columbia;
- an estate the income of which is subject to U.S. federal income taxation regardless of its source; or
- a trust if it (a) is subject to the primary supervision of a court within the United States and one or more U.S. persons have the authority to control all substantial decisions of the trust or (b) has a valid election in effect under applicable U.S. Treasury regulations to be treated as a U.S. person.

If a partnership (including an entity treated as a partnership for U.S. federal income tax purposes) holds Shares, the tax treatment of a partner in the partnership will generally depend upon the status of the partner and the activities of the partnership. A prospective Shareholder that is a partner in a partnership holding Shares should consult his, her or its tax advisors with respect to the purchase, ownership and disposition of Shares.

The discussion set forth herein does not constitute tax advice. Tax laws are complex and often change, and Shareholders should consult their tax advisors about the U.S. federal, state, local or non-U.S. tax consequences of an investment in the Fund.

Taxation of the Fund

The Fund has elected, to be treated for U.S. federal income tax purposes, and intends to qualify annually, as a RIC under Subchapter M of the Code. As a RIC, the Fund generally will not be subject to corporate-level U.S. federal income taxes on any ordinary income or capital gains that it distributes as dividends to Shareholders. To qualify as a RIC in any tax year, the Fund must, among other things, satisfy both a source of income test and asset diversification tests. The Fund will qualify as a RIC if (i) at least 90% of the Fund's gross income for such tax year consists of dividends; interest; payments with respect to certain securities loans; gains from the sale or other disposition of shares, securities or foreign currencies; other income (including, but not limited to, gains from options, futures or forward contracts) derived with respect to its business of investing in such shares, securities or currencies; and net income derived from interests in "qualified publicly-traded partnerships" (such income, "Qualifying RIC Income"); and (ii) the Fund's holdings are diversified so that, at the end of each quarter of such tax year, (a) at least 50% of the value of the Fund's total assets is represented by cash and cash equivalents, securities of other RICs, U.S. government securities and other securities, with such other securities limited, in respect of any one issuer, to an amount not greater than 5% of the value of the Fund's total assets and not greater than 10% of the outstanding voting securities of such issuer and (b) not more than 25% of the value of the Fund's total assets is invested (x) in securities (other than U.S. government securities or securities of other RICs) of any

one issuer or of two or more issuers that the Fund controls and that are engaged in the same, similar or related trades or businesses or (y) in the securities of one or more “qualified publicly-traded partnerships.” The Fund’s share of income derived from a partnership other than a “qualified publicly-traded partnership” will be treated as Qualifying RIC Income only to the extent that such income would have constituted Qualifying RIC Income if derived directly by the Fund. A “qualified publicly-traded partnership” is generally defined as an entity that is treated as a partnership for U.S. federal income tax purposes if (1) interests in such entity are traded on an established securities market or are readily tradable on a secondary market or the substantial equivalent thereof and (2) less than 90% of its gross income for the relevant tax year consists of Qualifying RIC Income. The Code provides that the Treasury Department may by regulation exclude from Qualifying RIC Income foreign currency gains that are not directly related to the RIC’s principal business of investing in shares or securities (or options and futures with respect to shares or securities). The Fund anticipates that, in general, its foreign currency gains will be directly related to its principal business of investing in shares and securities.

In addition, to maintain RIC tax treatment, the Fund must distribute on a timely basis with respect to each tax year dividends of an amount at least equal to 90% of the sum of its “investment company taxable income” and its net tax-exempt interest income, determined without regard to any deduction for dividends paid, to Shareholders (the “90% distribution requirement”). If the Fund qualifies as a RIC and satisfies the 90% distribution requirement, the Fund generally will not be subject to U.S. federal income tax on its “investment company taxable income” and net capital gains (that is, the excess of net long-term capital gains over net short-term capital losses) that it distributes as dividends to Shareholders (including amounts that are reinvested pursuant to the DRP). In general, a RIC’s “investment company taxable income” for any tax year is its taxable income, determined without regard to net capital gains and with certain other adjustments. The Fund intends to distribute all or substantially all of its “investment company taxable income,” net tax-exempt interest income (if any) and net capital gains on an annual basis. Any taxable income, including any net capital gains that the Fund does not distribute in a timely manner, will be subject to U.S. federal income tax at regular corporate rates.

If the Fund retains any net capital gains for reinvestment, it may elect to treat such capital gains as having been distributed to Shareholders. If the Fund makes such an election, each Shareholder will be required to report its share of such undistributed net capital gains attributed to the Fund as long-term capital gain and will be entitled to claim its share of the U.S. federal income taxes paid by the Fund on such undistributed net capital gains as a credit against its own U.S. federal income tax liability, if any, and to claim a refund on a properly-filed U.S. federal income tax return to the extent that the credit exceeds such liability. In addition, each Shareholder will be entitled to increase the adjusted tax basis of its Shares by the difference between its share of such undistributed net capital gain and the related credit. There can be no assurance that the Fund will make this election if it retains all or a portion of its net capital gain for a tax year.

As a RIC, the Fund will be, subject to a nondeductible 4% federal excise tax on certain undistributed amounts for each calendar year (the “4% excise tax”). To avoid the 4% excise tax, the Fund must distribute in respect of each calendar year dividends of an amount at least equal to the sum of (1) 98% of its ordinary taxable income (taking into account certain deferrals and elections) for the calendar year, (2) 98.2% of its capital gain net income (adjusted for certain ordinary losses) generally for the one-year period ending on December 31 of the calendar year and (3) any ordinary income and capital gains for previous calendar years that were not distributed during those calendar years. For purposes of determining whether the Fund has met this distribution requirement, the Fund will be deemed to have distributed any income or gains previously subject to U.S. federal income tax. Furthermore, any distribution declared by the Fund in October, November or December of any calendar year, payable to Shareholders, of record on a specified date in such a month and actually paid during January of the following calendar year, will be treated for tax purposes as if it had been paid on December 31 of the calendar year in which the distribution was declared. The Fund generally intends to avoid the imposition of the 4% excise tax, but there can be no assurance in this regard.

If the Fund fails to qualify as a RIC or fails to satisfy the 90% distribution requirement in respect of any tax year, the Fund would be subject to U.S. federal income tax at regular corporate rates on its taxable income, including its net capital gains, even if such income were distributed, and all distributions out of

earnings and profits would be taxed as ordinary dividend income. Such distributions generally would be eligible for the dividends-received deduction in the case of certain corporate Shareholders and may be eligible to be qualified dividend income in the case of certain non-corporate Shareholders. In addition, the Fund could be required to recognize unrealized gains, pay taxes and make distributions (any of which could be subject to interest charges) before re-qualifying for taxation as a RIC. If the Fund fails to satisfy either the income test or asset diversification test described above, in certain cases, however, the Fund may be able to avoid losing its status as a RIC by timely providing notice of such failure to the IRS, curing such failure and possibly paying an additional tax or penalty.

Some of the investments that the Fund is expected to make, such as investments in debt instruments having market discount and/or treated as issued with OID, may cause the Fund to recognize income or gain for U.S. federal income tax purposes prior to the receipt of any corresponding cash or other property. As a result, the Fund may have difficulty meeting the 90% distribution requirement necessary to maintain RIC tax treatment. Because this income will be included in the Fund's investment company taxable income for the tax year it is accrued, the Fund may be required to make a distribution to Shareholders to meet the distribution requirements described above, even though the Fund will not have received any corresponding cash or property. The Fund may be required to borrow money, dispose of other securities or forgo new investment opportunities for this purpose.

There may be uncertainty as to the appropriate treatment of certain of the Fund's investments for U.S. federal income tax purposes. In particular, the Fund expects to invest a portion of its net assets in below investment grade instruments. U.S. federal income tax rules with respect to such instruments are not entirely clear about issues such as whether and to what extent the Fund should recognize interest, OID or market discount, when and to what extent deductions may be taken for bad debts or worthless instruments, how payments received on obligations in default should be allocated between principal and income and whether exchanges of debt obligations in a bankruptcy or workout context are taxable. These and other issues will be addressed by the Fund, to the extent necessary, in connection with the Fund's general intention to distribute sufficient income to qualify, and maintain its qualification to be subject to tax as a RIC and to minimize the risk that it becomes subject to U.S. federal income or excise tax.

Income received by the Fund from sources outside the United States may be subject to withholding and other taxes imposed by such countries, thereby reducing income available to the Fund. Tax conventions between certain countries and the United States may reduce or eliminate such taxes. The Fund generally intends to conduct its investment activities to minimize the impact of foreign taxation, but there is no guarantee that the Fund will be successful in this regard. If more than 50% of the value of the Fund's total assets at the close of its tax year consists of securities of foreign corporations, the Fund will be eligible to elect to "pass-through" to the Shareholders the foreign source amount of income deemed earned and the respective amount of foreign taxes paid by the Fund. If at least 50% of the value of the Fund's total assets at the close of each quarter of its tax year is represented by interests in other RICs, the Fund may elect to "pass-through" to Shareholders the foreign source amount of income deemed earned and the respective amount of foreign taxes paid or deemed paid by the Fund. If the Fund so elects, each Shareholder would be required to include in gross income, even though not actually received, each Shareholder's *pro rata* share of the foreign taxes paid or deemed paid by the Fund, but would be treated as having paid its *pro rata* share of such foreign taxes and would therefore be allowed to either deduct such amount in computing taxable income or use such amount (subject to various limitations) as a foreign tax credit against federal income tax (but not both).

The Fund may invest in shares of foreign companies that are classified under the Code as passive foreign investment companies ("PFICs"). In general, a foreign company is considered a PFIC if at least 50% of its assets constitute investment-type assets or 75% or more of its gross income is investment-type income. In general under the PFIC rules, an "excess distribution" received with respect to PFIC shares is treated as having been realized ratably over the period during which the Fund held the PFIC shares. The Fund generally will be subject to tax on the portion, if any, of the excess distribution that is allocated to the Fund's holding period in prior tax years (and an interest factor will be added to the tax, as if the tax had actually been payable in such prior tax years) even though the Fund distributes the corresponding income to Shareholders. Excess distributions include any gain from the sale of PFIC shares as well as certain distributions from a PFIC. All excess distributions are taxable as ordinary income.

The Fund may be eligible to elect alternative tax treatment with respect to PFIC shares. Under one such election (*i.e.*, a “QEF” election), the Fund generally would be required to include in its gross income its share of the earnings of a PFIC on a current basis, regardless of whether any distributions are received from the PFIC. If this election is made, the special rules, discussed above, relating to the taxation of excess distributions, would not apply. Furthermore, under U.S. Treasury Regulations, certain income derived by the Fund from a PFIC with respect to which the Fund has made a QEF election would generally constitute qualifying income for purposes of determining the Fund’s ability to be subject to tax as a RIC to the extent the PFIC makes distributions of that income to the Fund or if the income was derived with respect to the Fund’s business of investing. Alternatively, the Fund may be able to elect to mark its PFIC shares to market, resulting in any unrealized gains at the Fund’s tax year end being treated as though they were recognized and reported as ordinary income. Any mark-to-market losses and any loss from an actual disposition of the PFIC’s Shares would be deductible as ordinary losses to the extent of any net mark-to-market gains included in income in prior tax years with respect to shares in the same PFIC.

Because the application of the PFIC rules may affect, among other things, the character of gains, the amount of gain or loss and the timing of the recognition of income, gain or loss with respect to PFIC shares, as well as subject the Fund itself to tax on certain income from PFIC shares, the amount that must be distributed to Fund Shareholders, and which will be recognized by Fund Shareholders as ordinary income or long-term capital gain, may be increased or decreased substantially as compared to a fund that did not invest in PFIC shares. Note that distributions from a PFIC are not eligible for the reduced rate of tax on distributions of “qualified dividend income” as discussed below.

Some of the CLOs in which the Fund invests may be PFICs, which are generally subject to the tax consequences described above. Investment in certain equity interests of CLOs that are subject to treatment as PFICs for U.S. federal income tax purposes may cause the Fund to recognize income in a tax year in excess of the Fund’s distributions from such CLOs, PFICs and the Fund’s proceeds from sales or other dispositions of equity interests in other CLOs and other PFICs during that tax year. As a result, the Fund generally would be required to distribute such income to satisfy the distribution requirements applicable to RICs.

If the Fund holds more than 10% of the interests treated as equity for U.S. federal income tax purposes in a foreign corporation that is treated as a controlled foreign corporation (“CFC”), including equity tranche investments and certain debt tranche investments in a CLO treated as CFC, the Fund may be treated as receiving a deemed distribution (taxable as ordinary income) each tax year from such foreign corporation of an amount equal to the Fund’s *pro rata* share of the foreign corporation’s earnings for such tax year (including both ordinary earnings and capital gains), whether or not the corporation makes an actual distribution to the Fund during such tax year. This deemed distribution is required to be included in the income of certain U.S. shareholders of a CFC, such as the Fund, regardless of whether a U.S. shareholder has made a QEF election with respect to such CFC. The Fund is generally required to distribute such income in order to satisfy the distribution requirements applicable to RICs, even to the extent the Fund’s income from a CFC exceeds the distributions from the CFC and the Fund’s proceeds from the sales or other dispositions of CFC stock during that tax year. As such, the Fund may limit and/or manage its holdings in issuers that could be treated as CFCs in order to ensure the Fund’s continued qualification as a RIC and/or maximize the Fund’s after-tax return from these investments. In general, a foreign corporation will be treated as a CFC for U.S. federal income tax purposes if more than 50% of the shares of the foreign corporation, measured by reference to combined voting power or value, is owned (directly, indirectly or by attribution) by U.S. Shareholders. A “U.S. Shareholder,” for this purpose, is any U.S. person that possesses (actually or constructively) 10% or more of the combined voting power or value of all classes of shares of a corporation.

The functional currency of the Fund, for U.S. federal income tax purposes, is the U.S. dollar. Gains or losses attributable to fluctuations in foreign currency exchange rates that occur between the time a Fund accrues interest income or other receivables or accrues expenses or other liabilities denominated in a foreign currency and the time the Fund actually collects such receivables or pays such liabilities generally are respectively characterized as ordinary income or ordinary loss for U.S. federal income tax purposes. Similarly, on the sale or other disposition of certain investments, including debt securities, certain forward contracts, as well as other derivative financial instruments, denominated in a foreign currency, gains or

losses attributable to fluctuations in the value of foreign currency between the date of acquisition of the security or contract and the date of disposition also are generally treated as ordinary gain or loss. These gains and losses, referred to under the Code as “section 988” gains and losses, may increase or decrease the amount of the Fund’s investment company taxable income subject to distribution to Fund Shareholders as ordinary income. For example, fluctuations in exchange rates may increase the amount of income that the Fund must distribute to qualify for tax treatment as a RIC and to prevent application of an excise tax on undistributed income. Alternatively, fluctuations in exchange rates may decrease or eliminate income available for distribution. If section 988 losses exceed other investment company taxable income during a tax year, the Fund would not be able to distribute amounts considered dividends for U.S. federal income tax purposes, and any distributions during a tax year made by the Fund before such losses were recognized would be re-characterized as a return of capital to Fund Shareholders for U.S. federal income tax purposes, rather than as ordinary dividend income, and would reduce each Fund Shareholder’s tax basis in Fund Shares.

If the Fund utilizes leverage through the issuance of preferred Shares or borrowings, it will be prohibited from declaring a distribution or dividend if it would fail the applicable asset coverage test(s) under the 1940 Act after the payment of such distribution or dividend. In addition, certain covenants in credit facilities or indentures may impose greater restrictions on the Fund’s ability to declare and pay dividends on Fund Shares. Limits on the Fund’s ability to pay dividends on Fund Shares may prevent the Fund from meeting the distribution requirements described above and, as a result, may affect the Fund’s ability to be subject to tax as a RIC or subject the Fund to the 4% excise tax. The Fund endeavors to avoid restrictions on its ability to make distribution payments. If the Fund is precluded from making distributions on Fund Shares because of any applicable asset coverage requirements, the terms of preferred Shares (if any) may provide that any amounts so precluded from being distributed, but required to be distributed by the Fund to enable the Fund to satisfy the distribution requirements that would enable the Fund to be subject to tax as a RIC, will be paid to the holders of preferred Shares as a special distribution. This distribution can be expected to decrease the amount that holders of preferred Shares would be entitled to receive upon redemption or liquidation of such preferred Shares.

Certain of the Fund’s investments are expected to be subject to special U.S. federal income tax provisions that may, among other things, (1) disallow, suspend or otherwise limit the allowance of certain losses or deductions, (2) convert lower-taxed long-term capital gains into higher-taxed short-term capital gains or ordinary income, (3) convert an ordinary loss or a deduction into a capital loss, the deductibility of which is more limited, (4) adversely affect when a purchase or sale of shares or securities is deemed to occur, (5) adversely alter the intended characterization of certain complex financial transactions, (6) cause the Fund to recognize income or gain without a corresponding receipt of cash, (7) treat dividends that would otherwise constitute qualified dividend income as non-qualified dividend income, (8) treat dividends that would otherwise be eligible for the corporate dividends received deduction as ineligible for such treatment and (9) produce income that will not constitute Qualifying RIC Income. The application of these rules could cause the Fund to be subject to U.S. federal income tax or the 4% excise tax and, under certain circumstances, could affect the Fund’s status as a RIC. The Fund monitors its investments and may make certain tax elections to mitigate the effect of these provisions.

Under current tax law, conversion between share classes is generally not expected to be a taxable event to the Shareholder.

The remainder of this discussion assumes that the Fund has qualified and maintain its qualification as a RIC and has satisfied the distribution requirements described above.

Taxation of U.S. Shareholders

Distributions

Distributions of the Fund’s ordinary income and net short-term capital gains will, except as described below with respect to distributions of “qualified dividend income,” generally be taxable to Shareholders as ordinary income to the extent such distributions are paid out of the Fund’s current or accumulated earnings and profits, as determined for U.S. federal income tax purposes. Distributions (or deemed distributions, as described above), if any, of net capital gains will be taxable as long-term capital gains, regardless of the

length of time a Shareholder has owned Shares. The ultimate tax characterization of the Fund's distributions made in a tax year cannot be determined until after the end of the tax year. As a result, the Fund may make total distributions during a tax year in an amount that exceeds the current and accumulated earnings and profits of the Fund. A distribution of an amount in excess of the Fund's current and accumulated earnings and profits will be treated by a Shareholder as a return of capital that will be applied against and reduce the Shareholder's tax basis in its Shares. To the extent that the amount of any such distribution exceeds the Shareholder's tax basis in its Shares, the excess will be treated as gain from a sale or exchange of Shares. Distributions will be treated in the manner described above regardless of whether such distributions are paid in cash or invested in additional Shares. Generally, for U.S. federal income tax purposes, a Shareholder receiving Shares under the DRP will be treated as having received a distribution equal to the fair market value of such Shares on the date the Shares are credited to the Shareholder's account.

A return of capital to Shareholders is a return of a portion of their original investment in the Fund, thereby reducing the tax basis of their investment. As a result from such reduction in tax basis, Shareholders may be subject to tax in connection with the sale of Fund Shares, even if such Shares are sold at a loss relative to the Shareholder's original investment.

It is expected that a substantial portion of the Fund's income will consist of ordinary income. For example, interest and OID derived by the Fund characterized as ordinary income for U.S. federal income tax purposes. In addition, gain derived by the Fund from the disposition of debt instruments with "market discount" (generally, securities with a fixed maturity date of more than one year from the date of issuance acquired by the Fund at a price below the lesser of their stated redemption price at maturity or accreted value, in the case of securities with OID) will be characterized as ordinary income for U.S. federal income tax purposes to the extent of the market discount that has accrued, as determined for U.S. federal income tax purposes, at the time of such disposition, unless the Fund makes an election to accrue market discount on a current basis. In addition, certain of the Fund's investments will be subject to other special U.S. federal income tax provisions that may affect the character, increase the amount and/or accelerate the timing of distributions to Shareholders.

Under recently issued Treasury regulations, certain distributions reported by the Fund as section 163(j) interest dividends may be treated as interest income by Shareholders for purposes of the tax rules applicable to interest expense limitations under Code section 163(j). Such treatment by the Shareholder is generally subject to holding period requirements and other potential limitations, although the holding period requirements are generally not applicable to dividends declared by money market funds and certain other funds that declare dividends daily and pay such dividends on a monthly or more frequent basis. The amount that the Fund is eligible to report as a Section 163(j) dividend for a tax year is generally limited to the excess of the Fund's business interest income over the sum of the Fund's (i) business interest expense and (ii) other deductions properly allocable to the Fund's business interest income.

Distributions made by the Fund to a corporate Shareholder will qualify for the dividends-received deduction only to the extent that the distributions consist of qualifying dividends received by the Fund. In addition, any portion of the Fund's dividends otherwise qualifying for the dividends-received deduction will be disallowed or reduced if the corporate Shareholder fails to satisfy certain requirements, including a holding period requirement, with respect to its Shares. Distributions of "qualified dividend income" to an individual or other non-corporate Shareholder will be treated as "qualified dividend income" to such Shareholder and generally will be taxed at long-term capital gain rates, provided the Shareholder satisfies the applicable holding period and other requirements. "Qualified dividend income" generally includes dividends from domestic corporations and dividends from foreign corporations that meet certain specified criteria. Given the Fund's investment strategy, it is not expected that a significant portion of the distributions made by the Fund will be eligible for the dividends-received deduction or the reduced rates applicable to "qualified dividend income."

If a person acquires Shares shortly before the record date of a distribution, the price of the Shares may include the value of the distribution, and the person will be subject to tax on the distribution even though economically it may represent a return of his, her or its investment in such Shares.

Distributions paid by the Fund generally will be treated as received by a Shareholder at the time the distribution is made. However, the Fund may, under certain circumstances, elect to treat a distribution that

is paid during the following tax year as if it had been paid during the tax year in which the income or gains supporting the distribution was earned. If the Fund makes such an election, the Shareholder will still be treated as receiving the distribution in the tax year in which the distribution is received. In this instance, however, any distribution declared by the Fund in October, November or December of any calendar year, payable to Shareholders of record on a specified date in such a month and actually paid during January of the following calendar year, will be treated for tax purposes as if it had been received by Shareholders on December 31 of the calendar year in which the distribution was declared.

Shareholders will be notified annually, as promptly as practicable after the end of each calendar year, as to the U.S. federal tax status of distributions, and Shareholders receiving distributions in the form of additional Shares will receive a report as to the NAV of those Shares.

Sale or Exchange of Shares

The repurchase or transfer of Shares may result in a taxable gain or loss to the tendering Shareholder. Different tax consequences may apply for tendering and non-tendering Shareholders in connection with a repurchase offer. For example, if a Shareholder does not tender all of his or her Shares, such repurchase may not be treated as a sale or exchange for U.S. federal income tax purposes, and may result in deemed distributions to non-tendering Shareholders. On the other hand, Shareholders holding Shares as capital assets who tender all of their Shares (including Shares deemed owned by Shareholders under constructive ownership rules) will be treated as having sold their Shares and generally will recognize capital gain or loss. The amount of the gain or loss will be equal to the difference between the amount received for the Shares and the Shareholder's adjusted tax basis in the relevant Shares. Such gain or loss generally will be a long-term capital gain or loss if the Shareholder has held such Shares as capital assets for more than one year. Otherwise, the gain or loss will be treated as short-term capital gain or loss.

Losses realized by a Shareholder on the sale or exchange of Shares held as capital assets for six months or less will be treated as long-term capital losses to the extent of any distribution of long-term capital gains received (or deemed received, as discussed above) with respect to such Shares. In addition, no loss will be allowed on a sale or other disposition of Shares if the Shareholder acquires (including through reinvestment of distributions or otherwise) Shares, or enters into a contract or option to acquire Shares, within 30 days before or after any disposition of such Shares at a loss. In such a case, the basis of the Shares acquired will be adjusted to reflect the disallowed loss. Under current law, net capital gains recognized by non-corporate Shareholders are generally subject to U.S. federal income tax at lower rates than the rates applicable to ordinary income.

In general, U.S. Shareholders currently are generally subject to a maximum federal income tax rate of either 15% or 20% (depending on whether the Shareholder's income exceeds certain threshold amounts) on their net capital gain (*i.e.*, the excess of realized net long-term capital gains over realized net short-term capital losses), including any long-term capital gain derived from an investment in Shares. Such rate is lower than the maximum rate on ordinary income currently payable by individuals. Corporate U.S. Shareholders currently are subject to U.S. federal income tax on net capital gain at the maximum rate also applied to ordinary income (currently at 21%). Non-corporate Shareholders with net capital losses for a tax year (*i.e.*, capital losses in excess of capital gains) generally may deduct up to \$3,000 of such losses against their ordinary income each tax year. Any net capital losses of a non-corporate Shareholder in excess of \$3,000 generally may be carried forward and used in subsequent tax years as provided in the Code. Corporate Shareholders generally may not deduct any net capital losses for a tax year, but may carry back such losses for three tax years or carry forward such losses for five tax years.

An additional 3.8% Medicare tax is imposed on certain net investment income (including ordinary dividends and capital gain distributions received from the Fund and net gains from redemptions or other taxable dispositions of Shares) of U.S. individuals, estates and trusts to the extent that such person's "modified adjusted gross income" (in the case of an individual) or "adjusted gross income" (in the case of an estate or trust) exceeds certain threshold amounts. U.S. persons that are individuals, estates or trusts are urged to consult their tax advisors regarding the applicability of this tax to their income and gains in respect of their investment in the Fund.

The Fund (or if a U.S. Shareholder holds Shares through an intermediary, such intermediary) will send to each of its U.S. Shareholders, as promptly as possible after the end of each calendar year, a notice

detailing, on a per Share and per distribution basis, the amounts includible in such U.S. Shareholder's taxable income for such year as ordinary income and as long-term capital gain. In addition, the federal tax status of each year's distributions generally will be reported to the IRS, including the amount of distributions, if any, eligible for the preferential maximum rate generally applicable to long-term capital gains. Distributions paid by the Fund generally will not be eligible for the corporate dividends received deduction or the preferential tax rate applicable to Qualifying Dividends because the Fund's income generally will not consist of dividends. Distributions may also be subject to additional state, local and foreign taxes depending on a U.S. Shareholder's particular situation.

Under U.S. Treasury regulations, if a Shareholder recognizes losses with respect to Shares of \$2 million or more for an individual Shareholder or \$10 million or more for a corporate Shareholder, the Shareholder must file with the IRS a disclosure statement on IRS Form 8886. Direct Shareholders of portfolio securities are in many cases excepted from this reporting requirement, but under current guidance, shareholders of a RIC are not excepted. Future guidance may extend the current exception from this reporting requirement to shareholders of most or all RICs. The fact that a loss is reportable under these regulations does not affect the legal determination of whether the taxpayer's treatment of the loss is proper. Shareholders should consult their tax advisors to determine the applicability of these regulations in light of their individual circumstances.

Reporting of adjusted cost basis information is required for covered securities, which generally include shares of a RIC acquired after January 1, 2012, to the IRS and to taxpayers. Shareholders should contact their Financial Intermediaries with respect to reporting of cost basis and available elections for their accounts.

Backup Withholding and Information Reporting

Information returns will be filed with the IRS in connection with payments on Shares and the proceeds from a sale or other disposition of Shares. A Shareholder will be subject to backup withholding on all such payments if it fails to provide the payor with its correct taxpayer identification number (generally, in the case of a U.S. resident Shareholder, on an IRS Form W-9) and to make required certifications or otherwise establish an exemption from backup withholding. Corporate Shareholders and certain other Shareholders generally are exempt from backup withholding. Backup withholding is not an additional tax. Any amounts withheld as backup withholding may be credited against the applicable Shareholder's U.S. federal income tax liability, provided the required information is timely furnished to the IRS.

Taxation of Non-U.S. Shareholders

Whether an investment in the Fund is appropriate for a non-U.S. Shareholder (as defined below) will depend upon that investor's particular circumstances. An investment in the Fund by a non-U.S. Shareholder may have adverse tax consequences. Non-U.S. Shareholders should consult their tax advisors before investing in Shares.

The U.S. federal income taxation of a Shareholder that is a nonresident alien individual, a foreign trust or estate or a foreign corporation, as defined for U.S. federal income tax purposes (a "non-U.S. Shareholder"), depends on whether the income that the Shareholder derives from the Fund is "effectively connected" with a U.S. trade or business carried on by the Shareholder.

If the income that a non-U.S. Shareholder derives from the Fund is not "effectively connected" with a U.S. trade or business carried on by such non-U.S. Shareholder, distributions of "investment company taxable income" will generally be subject to a U.S. federal withholding tax at a rate of 30% (or a lower rate provided under an applicable treaty). Alternatively, if the income that a non-U.S. Shareholder derives from the Fund is effectively connected with a U.S. trade or business of the non-U.S. Shareholder, the Fund will not be required to withhold U.S. federal tax if the non-U.S. Shareholder complies with applicable certification and disclosure requirements, although such income will be subject to U.S. federal income tax in the manner described below and at the rates applicable to U.S. residents. Backup withholding will not, however, be applied to payments that have been subject to this 30% withholding tax applicable to non-U.S. Shareholders.

A non-U.S. Shareholder whose income from the Fund is not “effectively connected” with a U.S. trade or business will generally be exempt from U.S. federal income tax on capital gains distributions, any amounts retained by the Fund that are designated as undistributed capital gains and any gains realized upon the sale or exchange of Shares. If, however, such a non-U.S. Shareholder is a nonresident alien individual and is physically present in the United States for 183 days or more during the tax year and meets certain other requirements such as capital gains distributions, undistributed capital gains and gains from the sale or exchange of Shares will be subject to a 30% U.S. tax.

Furthermore, properly reported distributions by the Fund and received by non-U.S. Shareholders are generally exempt from U.S. federal withholding tax when they (a) are paid by the Fund in respect of the Fund’s “qualified net interest income” (*i.e.*, the Fund’s U.S. source interest income, subject to certain exceptions, reduced by expenses that are allocable to such income), or (b) are paid by the Fund in connection with the Fund’s “qualified short-term capital gains” (generally, the excess of the Fund’s net short-term capital gains over the Fund’s long-term capital losses for such tax year). However, depending on the circumstances, the Fund may report all, some or none of the Fund’s potentially eligible distributions as derived from such qualified net interest income or from such qualified short-term capital gains, and a portion of such distributions (*e.g.*, derived from interest from non-U.S. sources or any foreign currency gains) would be ineligible for this potential exemption from withholding. Moreover, in the case of Shares held through an intermediary, the intermediary may have withheld amounts even if the Fund reported all or a portion of a distribution as exempt from U.S. federal withholding tax. To qualify for this exemption from withholding, a non-U.S. Shareholder must comply with applicable certification requirements relating to its non-U.S. tax residency status (including, in general, furnishing an IRS Form W-8BEN, IRS Form W-8BEN-E, IRS Form W-8ECI, IRS Form W-8IMY or IRS Form W-8EXP, or an acceptable substitute or successor form). Thus, an investment in the Shares by a non-U.S. Shareholder may have adverse tax consequences as compared to a direct investment in the assets in which the Fund will invest.

If the income from the Fund is “effectively connected” with a U.S. trade or business carried on by a non-U.S. Shareholder, any distributions of “investment company taxable income,” capital gains distributions, amounts retained by the Fund that are designated as undistributed capital gains and any gains realized upon the sale or exchange of Shares will be subject to U.S. income tax, on a net income basis, in the same manner, and at the graduated rates applicable to, U.S. persons. If such a non-U.S. Shareholder is a corporation, it may also be subject to the U.S. branch profits tax.

A non-U.S. Shareholder other than a corporation may be subject to backup withholding on net capital gains distributions that are otherwise exempt from withholding tax or on distributions that would otherwise be taxable at a reduced treaty rate if such Shareholder does not certify its non-U.S. status under penalties of perjury or otherwise establish an exemption.

If the Fund distributes net capital gains in the form of deemed rather than actual distributions, a non-U.S. Shareholder will be entitled to a U.S. federal income tax credit or tax refund equal to the Shareholder’s allocable share of the tax the Fund pays on the capital gains deemed to have been distributed. To obtain the refund, the non-U.S. Shareholder must obtain a U.S. taxpayer identification number and file a federal income tax return even if the non-U.S. Shareholder would not otherwise be required to obtain a U.S. taxpayer identification number or file a federal income tax return.

Under the Foreign Account Tax Compliance Act provisions of the Code, the Fund is required to withhold U.S. tax (at a 30% rate) on payments of taxable dividends made to certain non-U.S. entities that fail to comply (or be deemed compliant) with extensive reporting and withholding requirements in the Code designed to inform the U.S. Department of the Treasury of U.S.-owned foreign investment accounts. Shareholders may be requested to provide additional information to the Fund to enable the Fund to determine whether withholding is required.

The tax consequences to a non-U.S. Shareholder entitled to claim the benefits of an applicable tax treaty may differ from those described herein. Non-U.S. Shareholders are advised to consult their tax advisors with respect to the particular tax consequences to them of an investment in the Fund, including the potential application of the U.S. estate tax.

Other Taxes

Shareholders may be subject to state, local and non-U.S. taxes applicable to their investment in the Fund. In those states or localities, entity-level tax treatment and the treatment of distributions made to

Shareholders under those jurisdictions' tax laws may differ from the treatment under the Code. Accordingly, an investment in Shares may have tax consequences for Shareholders that are different from those of a direct investment in the Fund's portfolio investments. Shareholders are advised to consult their tax advisors with respect to the particular tax consequences to them of an investment in the Fund.

ERISA CONSIDERATIONS

Employee benefit plans and other plans subject to ERISA or the Code, including corporate savings and 401(k) plans, IRAs and Keogh Plans (each, an “ERISA Plan”) may purchase Shares. ERISA imposes certain general and specific responsibilities on persons who are fiduciaries with respect to an ERISA Plan, including prudence, diversification, prohibited transactions and other standards. Because the Fund is registered as an investment company under the 1940 Act, the underlying assets of the Fund will not be considered to be “plan assets” of any ERISA Plan investing in the Fund for purposes of the fiduciary responsibility and prohibited transaction rules under Title I of ERISA or Section 4975 of the Code. Thus, none of the Fund or the Advisors will be a fiduciary within the meaning of ERISA or Section 4975 of the Code with respect to the assets of any ERISA Plan that becomes a Shareholder, solely as a result of the ERISA Plan’s investment in the Fund.

The provisions of ERISA are subject to extensive and continuing administrative and judicial interpretation and review. The discussion of ERISA contained herein is, of necessity, general and may be affected by future publication of regulations and rulings. Potential investors should consult their legal advisers regarding the consequences under ERISA of an investment in the Fund through an ERISA Plan.

ANTI-TAKEOVER PROVISIONS IN THE DECLARATION OF TRUST

The Declaration of Trust includes provisions that could have the effect of limiting the ability of other entities or persons to acquire control of the Fund or to change the composition of the Board. These provisions may have the effect of discouraging attempts to acquire control of the Fund, which attempts could have the effect of increasing the expenses of the Fund and interfering with the normal operation of the Fund. The Trustees are elected for indefinite terms and do not stand for reelection. A Trustee may be removed from office (i) with cause only by a written instrument signed or adopted by two-thirds of the remaining Trustees; or (ii) without cause only by a written instrument signed or adopted by all of the remaining Trustees. The Declaration of Trust does not contain any other specific inhibiting provisions that would operate only with respect to an extraordinary transaction such as a merger, reorganization, tender offer, sale or transfer of substantially all of the Fund's asset, or liquidation. Reference should be made to the Declaration of Trust on file with the SEC for the full text of these provisions.

PLAN OF DISTRIBUTION

ALPS Distributors, Inc., located at 1290 Broadway, Suite 1000, Denver, CO 80203, serves as the Fund's principal underwriter and acts as the Distributor of the Fund's Shares on a best efforts basis, subject to various conditions. Class I Shares are offered for sale through the Distributor at NAV. The Distributor also may enter into agreements with Financial Intermediaries for the sale and servicing of the Fund's Shares. In reliance on Rule 415 of the 1933 Act, the Fund intends to offer to sell up to 80,000,000 Shares, on a continual basis, through the Distributor and through July 31, 2021. Effective August 1, 2021, the Fund will offer an unlimited number of shares of beneficial interest. No arrangement has been made to place funds received in an escrow, trust or similar account. The Distributor is not required to sell any specific number or dollar amount of the Fund's Shares, but will use its best efforts to solicit orders for the purchase of the Shares. Shares of the Fund will not be listed on any national securities exchange and the Distributor will not act as a market maker in Fund Shares.

The Distributor has entered into a wholesale marketing agreement with CION Securities, a registered broker-dealer and an affiliate of CION. Pursuant to the terms of the wholesale marketing agreement, CION Securities will seek to market and otherwise promote the Fund through various wholesale distribution channels, including, but not limited to, regional and independent retail broker-dealers and registered investment advisors.

The Advisors or their affiliates, in the Advisors' discretion and from their own resources, may pay Additional Compensation to Financial Intermediaries in connection with the sale of Fund Shares. In return for the Additional Compensation, the Fund may receive certain marketing advantages including access to a Financial Intermediaries' registered representatives, placement on a list of investment options offered by a Financial Intermediary, or the ability to assist in training and educating the Financial Intermediaries. The Additional Compensation may differ among Financial Intermediaries in amount or in the manner of calculation: payments of Additional Compensation may be fixed dollar amounts, or based on the aggregate value of outstanding Shares held by Shareholders introduced by the Financial Intermediary, or determined in some other manner. The receipt of Additional Compensation by a selling Financial Intermediary may create potential conflicts of interest between an investor and its Financial Intermediary who is recommending the Fund over other potential investments. Additionally, the Fund pays a servicing fee to the Financial Intermediaries or financial institutions and for providing ongoing services in respect of clients with whom it has distributed shares of the Fund. Such services may include electronic processing of client orders, electronic fund transfers between clients and the Fund, account reconciliations with the Fund's transfer agent, facilitation of electronic delivery to clients of Fund documentation, monitoring client accounts for back-up withholding and any other special tax reporting obligations, maintenance of books and records with respect to the foregoing, and such other information and ongoing liaison services as the Fund or the Advisors may reasonably request.

The Fund and the Advisors have agreed to indemnify the Distributor against certain liabilities, including liabilities under the 1933 Act, or to contribute to payments the Distributor may be required to make because of any of those liabilities. Such agreement does not include indemnification of the Distributor against liability resulting from willful misfeasance, bad faith or negligence on the part of the Distributor in the performance of its duties or from reckless disregard by the Distributor of its obligations and duties under the Distribution Agreement.

Purchasing Shares

Investors may purchase Shares directly from the Fund in accordance with the instructions below. Investors will be assessed fees for returned checks and stop payment orders at prevailing rates charged by DST. The returned check and stop payment fee is currently \$25. Investors may buy and sell Shares of the Fund through Financial Intermediaries. Orders will be priced at the appropriate price next computed after it is received by a Financial Intermediary and accepted by the Fund. A Financial Intermediary may hold Shares in an omnibus account in the Financial Intermediary's name or the Financial Intermediary may maintain individual ownership records. The Fund may pay the Financial Intermediary for maintaining individual ownership records as well as providing other shareholder services. Financial Intermediaries may charge fees for the services they provide in connection with processing your transaction order or maintaining an investor's account with them. Investors should check with their Financial Intermediary to

determine if it is subject to these arrangements. Financial Intermediaries are responsible for placing orders correctly and promptly with the Fund, forwarding payment promptly. Orders transmitted with a Financial Intermediary before the close of regular trading (generally 4:00 p.m., Eastern Time) on a day that the NYSE is open for business, will be priced based on the Fund's NAV next computed after it is received by the Financial Intermediary.

Investors may purchase Shares through a broker-dealer or Financial Intermediary that may establish different minimum investment requirements than the Fund and may also independently charge transaction fees and additional amounts (which may vary) in return for its services, which will reduce an investor's return. Shares purchased through a broker-dealer or Financial Intermediary will normally be held in an investor's account with that firm.

The availability of sales charge waivers, discounts, and/or breakpoints may depend on the particular Financial Intermediary or type of account through which an investor purchases or holds Shares. Investors should contact their Financial Intermediary for more information regarding applicable sales charge waivers and discounts available to them and the Financial Intermediary's related policies and procedures.

If an investment is made through an IRA, Keogh plan or 401(k) plan, an approved trustee must process and forward the subscription to the Fund. In such case, the Fund will send the confirmation and notice of its acceptance to the trustee.

By Mail

To make an initial purchase by mail, complete an account application and mail the application, together with a check made payable to CION Ares Diversified Credit Fund to:

Overnight:

CION Ares Diversified Credit Fund
DST Systems, Inc.
430 West 7th Street
Kansas City, MO 64105
(800) 343-3736

Regular Mail:

CION Ares Diversified Credit Fund
DST Systems, Inc.
P.O. Box 219422
Kansas City, MO 64121-9422

All checks must be in US Dollars drawn on a domestic bank. The Fund will not accept payment in cash or money orders. The Fund may accept cashier's checks in amounts greater than \$10,000. To prevent check fraud, the Fund will neither accept third party checks, Treasury checks, credit card checks, traveler's checks or starter checks for the purchase of shares, nor post-dated checks, postdated on-line bill pay checks, or any conditional purchase order or payment.

The transfer agent will charge a \$25 fee against an investor's account, in addition to any loss sustained by the Fund, for any payment that is returned. It is the policy of the Fund not to accept applications under certain circumstances or in amounts considered disadvantageous to Shareholders. The Fund reserves the right to reject any application.

By Wire — Initial Investment

To make an initial investment in the Fund, the transfer agent must receive a completed account application from a Financial Intermediary before an investor wires funds. The Financial Intermediary may mail or overnight deliver an account application to the transfer agent. Upon receipt of the completed account application, the transfer agent will establish an account. The account number assigned will be required as part of the instruction that should be provided to an investor's bank to send the wire. An investor's bank must include both the name of the Fund, the account number, and the investor's name so that monies can be correctly applied. If you wish to wire money to make an investment in the Fund, please call the Fund at 800-343-3736 for wiring instructions and to notify the Fund that a wire transfer is coming. Any commercial bank can transfer same-day funds via wire. The Fund will normally accept wired funds for investment on the day received if they are received by the Fund's designated bank before the close of regular trading on the NYSE. Your bank may charge you a fee for wiring same-day funds. The bank should transmit funds by wire to:

ABA #: 101 000 695
Credit: UMB Bank, NA
Account #: 9872291549
Further Credit:
CION Ares Diversified Credit Fund
(shareholder registration)
(shareholder account number)

Automatic Investment Plan — Subsequent Investments

You may participate in the Fund's Automatic Investment Plan, an investment plan that automatically moves money from your bank account and invests it in the Fund through the use of electronic funds transfers or automatic bank drafts. You may elect to make subsequent investments by transfers of a minimum of \$100 on specified days of each month into your established Fund account. Please contact your registered representative/investment advisor for more information about the Fund's Automatic Investment Plan.

In compliance with the USA Patriot Act of 2001, DST will verify certain information on each account application as part of the Fund's Anti-Money Laundering Program. As requested on the application, investors must supply full name, date of birth, social security number and permanent street address. Mailing addresses containing only a P.O. Box will not be accepted. Registered representatives/investment advisors may call Investor Relations at 888-729-4266 for additional assistance when completing an application.

If DST does not have a reasonable belief of the identity of a customer, the account will be rejected or the customer will not be allowed to perform a transaction on the account until such information is received. The Fund also may reserve the right to close the account within 5 business days if clarifying information/documentation is not received.

Purchase Terms

The minimum initial purchase by an investor is \$1,000,000. The Fund reserves the right to waive the investment minimum. The Fund may permit a Financial Intermediary to waive the initial minimum per shareholder for Class I Shares in the following situations: broker-dealers purchasing fund shares for clients in broker-sponsored discretionary fee-based advisory programs; Financial Intermediaries with clients of a registered investment advisor (RIA) who have entered into an agreement to offer institutional shares through a no-load program or investment platform; and certain other situations deemed appropriate by the Fund. The Fund's Class I Shares are offered for sale through its Distributor at NAV. The price of Class I Shares during the Fund's continuous offering will fluctuate over time with the NAV of the Shares.

Share Class Considerations

When selecting a share class, you should consider the following:

- which share classes are available to you;
- how much you intend to invest;
- how long you expect to own the shares; and
- total costs and expenses associated with a particular share class.

Each investor's financial considerations are different. You should speak with your financial advisor to help you decide which share class is best for you. Not all Financial Intermediaries offer all classes of shares. If your Financial Intermediary offers more than one class of shares, you should carefully consider which class of shares to purchase.

Class I Shares

Class I Shares will be sold at the prevailing NAV per Class I Share and are not subject to any upfront sales charge. Class I Shares are not subject to a distribution fee, shareholder servicing fees, or contingent deferred sales charge. Class I Shares may only be available through certain Financial Intermediaries.

Because the Class I Shares of the Fund are sold at the prevailing NAV per Class I Share without an upfront sales charge, the entire amount of your purchase is available for investment immediately. However, for all accounts, Class I Shares require a minimum investment of \$1,000,000, while subsequent investments may be made with any amount. The Fund reserves the right to waive the investment minimum.

About the Distributor

ALPS Distributors, Inc., located at 1290 Broadway, Suite 1000, Denver, CO 80203, serves as distributor of the Fund's Shares.

DISTRIBUTIONS

The Fund intends to make a distribution each month to its Shareholders of the net investment income of the Fund after payment of Fund operating expenses. The dividend rate may be modified by the Board from time to time.

To the extent that any portion of the Fund's monthly distributions are considered a return of capital to Shareholders, such portion would not be considered dividends for U.S. federal income tax purposes, and would represent a return of the amounts that such Shareholders invested. Although such return of capital distributions are not currently taxable to Shareholders, such distributions will have the effect of lowering a Shareholder's tax basis in such Shares, and could result in a higher tax liability when the Shares are sold, even if they have not increased in value, or in fact, have lost value. The Fund's final distribution for each tax year is expected to include any remaining investment company taxable income and net tax-exempt income undistributed during the tax year, as well as any undistributed net capital gain realized during the tax year. If the total distributions made in any tax year exceed investment company taxable income, net tax-exempt income and net capital gain, such excess distributed amount would be treated as ordinary dividend income to the extent of the Fund's current and accumulated earnings and profits. This distribution policy, may, under certain circumstances, have adverse consequences to the Fund and its Shareholders because it may result in a return of capital resulting in less of a Shareholder's assets being invested in the Fund and, over time, increase the Fund's expense ratio. The distribution policy also may cause the Fund to sell securities at a time it would not otherwise do so to manage the distribution of income and gain. The initial distribution will be declared on date determined by the Board.

Each year, a statement on Form 1099-DIV identifying the sources of the distributions (*i.e.*, paid from ordinary income, paid from net capital gains on the sale of securities, and/or a return of capital, which is a nontaxable distribution) will be furnished to Shareholders subject to IRS reporting. Fund ordinary distributions may exceed the Fund's earnings, especially during the period before the Fund has substantially invested the proceeds from this offering. To the extent that the Fund pays distributions to Shareholders using proceeds it receives from Fund distributions, such distributions generally would constitute a return of investor capital and generally will lower an investor's tax basis in his or her Shares. A return of capital generally is a return of an investor's investment rather than a return of earnings or gains derived from the Fund's investment activities. There can be no assurance that the Fund will be able to pay distributions at a specific rate or at all.

As discussed in the "Tax Aspects" section, to qualify for and maintain RIC tax treatment, the Fund is required to distribute on a timely basis with respect to each tax year dividends for U.S. federal income tax purposes of an amount at least equal to the sum of 90% of "investment company taxable income" and net tax-exempt interest income, determined without regard to any deduction for dividends paid, for such tax year. To avoid certain excise taxes imposed on RICs, the Fund is required to distribute in respect of each calendar year dividends of an amount at least equal to the sum of (1) 98% of ordinary income (taking into account certain deferrals and elections) for the calendar year, (2) 98.2% of capital gain net income (adjusted for certain ordinary losses) generally for the one-year period ending on December 31 of the calendar year and (3) any ordinary income and capital gain net income for previous calendar years that were not distributed during such calendar years and on which the Fund paid no U.S. federal income tax. The Fund can offer no assurance that it will achieve results that will permit the payment of any cash distributions. If the Fund issues senior securities, the Fund will be prohibited from making distributions if doing so causes it to fail to maintain the asset coverage ratios stipulated by the 1940 Act or if distributions are limited by the terms of any of the Fund's borrowings. Any such limitations would adversely impact the Fund's ability to make distributions to Shareholders.

Dividend Reinvestment Plan

The Fund will operate under the DRP administered by DST. Pursuant to the plan, the Fund's Distributions, net of any applicable U.S. withholding tax, are reinvested in the same class of shares of the Fund.

Shareholders automatically participate in the DRP, unless and until an election is made to withdraw from the plan on behalf of such participating shareholder. A shareholder who does not wish to have Distributions automatically reinvested may terminate participation in the DRP at any time by written

instructions to that effect to DST. Shareholders who elect not to participate in the DRP will receive all distributions in cash paid to the shareholder of record (or, if the shares are held in street or other nominee name, then to such nominee). Such written instructions must be received by the DST 30 days prior to the record date of the Distribution or the shareholder will receive such Distribution in shares through the DRP. Under the DRP, the Fund's Distributions to shareholders are automatically reinvested in full and fractional shares as described below.

When the Fund declares a Distribution, DST, on the shareholder's behalf, will receive additional authorized shares from the Fund either newly issued or repurchased from shareholders by the Fund and held as treasury stock. The number of shares to be received when Distributions are reinvested will be determined by dividing the amount of the Distribution by the Fund's NAV per share.

DST will maintain all shareholder accounts and furnish written confirmations of all transactions in the accounts, including information needed by shareholders for personal and tax records. DST will hold shares in the account of the shareholders in non-certificated form in the name of the participant, and each shareholder's proxy, if any, will include those shares purchased pursuant to the DRP. Each participant, nevertheless, has the right to request certificates for whole and fractional shares owned. The Fund will issue certificates in its sole discretion. DST will distribute all proxy solicitation materials, if any, to participating shareholders.

In the case of shareholders, such as banks, brokers or nominees, that hold shares for others who are beneficial owners participating under the DRP, DST will administer the DRP on the basis of the number of shares certified from time to time by the record shareholder as representing the total amount of shares registered in the shareholder's name and held for the account of beneficial owners participating under the DRP.

Neither DST nor the Fund shall have any responsibility or liability beyond the exercise of ordinary care for any action taken or omitted pursuant to the DRP, nor shall they have any duties, responsibilities or liabilities except such as expressly set forth herein. Neither shall they be liable hereunder for any act done in good faith or for any good faith omissions to act, including, without limitation, failure to terminate a participant's account prior to receipt of written notice of his or her death or with respect to prices at which shares are purchased or sold for the participants account and the terms on which such purchases and sales are made, subject to applicable provisions of the federal securities laws.

The automatic reinvestment of Dividends will not relieve participants of any federal, state or local income tax that may be payable (or required to be withheld) on such Dividends. See "Tax Aspects."

The Fund reserves the right to amend or terminate the DRP. There is no direct service charge to participants with regard to purchases under the DRP; however, the Fund reserves the right to amend the DRP to include a service charge payable by the participants.

All correspondence concerning the DRP should be directed to DST at CION Ares Diversified Credit Fund c/o DST Systems, Inc., P.O. Box 219422, Kansas City, MO 64121-9422. Certain transactions can be performed by calling the toll free number 888-729-4266.

FISCAL YEAR; REPORTS

For accounting purposes, the Fund's fiscal year and tax year end on December 31. As soon as practicable after the end of each calendar year, a statement on Form 1099-DIV identifying the sources of the distributions paid by the Fund to Shareholders for tax purposes will be furnished to Shareholders subject to IRS reporting. In addition, the Fund will prepare and transmit to Shareholders an unaudited semi-annual and an audited annual report within 60 days after the close of the period for which the report is being made, or as otherwise required by the 1940 Act.

PRIVACY NOTICE

We are committed to maintaining the privacy of our shareholders and to safeguarding their nonpublic personal information. The following information is provided to help you understand what personal information we collect, how we protect that information and why, in certain cases, we may share information with select other parties.

Generally, we will not receive any non-public personal information about shareholders of the common stock of the Fund, although certain of our shareholders' non-public information may become available to us. The non-public personal information that we may receive falls into the following categories:

- Information we receive from shareholders, whether we receive it orally, in writing or electronically. This includes shareholders' communications to us concerning their investment;
- Information about shareholders' transactions and history with us; or
- Other general information that we may obtain about shareholders, such as demographic and contact information such as address.

We do not disclose any non-public personal information about shareholders, except:

- to our affiliates (such as our investment advisor) and their employees that have a legitimate business need for the information;
- to our service providers (such as our administrator, accountants, attorneys, custodians, transfer agent, underwriter and proxy solicitors) and their employees as is necessary to service shareholder accounts or otherwise provide the applicable service;
- to comply with court orders, subpoenas, lawful discovery requests, or other legal or regulatory requirements; or
- as allowed or required by applicable law or regulation.

When the Fund shares non-public shareholder personal information referred to above, the information is made available for limited business purposes and under controlled circumstances designed to protect our shareholders' privacy. The Fund does not permit use of shareholder information for any non-business or marketing purpose, nor does the Fund permit third parties to rent, sell, trade or otherwise release or disclose information to any other party.

The Fund's service providers, such as their advisor, administrator, and transfer agent, are required to maintain physical, electronic, and procedural safeguards to protect shareholder nonpublic personal information; to prevent unauthorized access or use; and to dispose of such information when it is no longer required.

Personnel of affiliates may access shareholder information only for business purposes. The degree of access is based on the sensitivity of the information and on personnel need for the information to service a shareholder's account or comply with legal requirements.

If a shareholder ceases to be a shareholder, we will adhere to the privacy policies and practices as described above. We may choose to modify our privacy policies at any time. Before we do so, we will notify shareholders and provide a description of our privacy policy.

In the event of a corporate change in control resulting from, for example, a sale to, or merger with, another entity, or in the event of a sale of assets, we reserve the right to transfer your non-public personal information to the new party in control or the party acquiring assets.
